construction or installation of a factory-built nonresidential structure, a factory-built residential structure, or a factory-built tiny home (factory-built structure), the state plumbing board, the state electrical board, and the state fire suppression administrator do not have jurisdiction over and their rules do not apply to a factory-built structure.

On or before July 1, 2026, the advisory committee on factory-built structures (advisory committee) is required to develop regional building codes for factory-built structures and implementation requirements and submit the recommended codes to the board.

On or before July 1, 2026, the board must adopt rules:

- Implementing regional building code recommendations from the advisory committee that account for local climatic and geographic conditions for the construction and installation of factory-built structures, which supersede any conflicting ordinance, code, regulation, or other law of a local government unless the local government adopts the rules of the board;
- Covering the implementation requirements developed by the advisory committee, including authorizing a local government certified by the division of housing (division) to perform inspections of factory-built structures on behalf of the division and registration, responsibility, and accountability requirements for a manufacturer, installer, seller, or general contractor who develops the installation site or completes the construction of a factory-built structure at the installation site;
- Covering electrical, plumbing, or fire suppression activity required to undertake or complete the construction or installation of a factory-built structure;
- Allowing the division to contract for third-party review and approval of a final design plan for a factory-built structure on behalf of the division;
- Allowing the division to create a process for vetting and approving the ability of a third party to review and approve a final design plan for a factory-built structure on behalf of the division; and
- Requiring the division to cause an audit to be performed on a third party that reviews and approves design plans.

On or before July 1, 2026, the advisory committee is required to conduct a study on behalf of the division about whether the international building code or residential code standards that apply to site requirements should be incorporated into state statutes and rules and to determine whether the state should regulate non-factory-built components that are connected to a factory-built structure at the installation site and are currently under local jurisdiction. The division is required to deliver the study to the board

when complete.

A county or municipality may not:

- Enact a regulation that excludes factory-built structures and manufactured homes from the county or municipality;
- Impose more restrictive standards on factory-built structures and manufactured homes than those that the county or municipality applies to site-built homes in the same residential zones in the county or municipality; or
- Enact or enforce a regulation, law, or ordinance affecting the installation or construction of a factory-built structure or manufactured home.

A county or municipality may:

- Enact land use regulations to the extent that the regulations are applicable to existing housing or structures or new site-built housing in the county or municipality; and
- Enact a building code provision for unique public safety requirements unless the provision applies to a factory-built structure or manufactured home.

A county or municipality must comply with the requirements established by the division for factory-built structures and by the United States department of housing and urban development for manufactured homes.

The bill requires the state treasurer to transfer \$600,000 on July 1, 2025, from the innovative housing incentive program fund to the building regulation fund.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds and declares that:

4 (a) Coloradans are overwhelmingly burdened with the cost of
5 housing;

6 (b) Forty-five percent of renters, 329,000 residents, spend more
7 than 30% of their income on rent;

8 (c) A household in Colorado must earn at least \$70,840 annually
9 to afford the median rent of \$1,771 without being cost-burdened;

10 (d) To purchase a median-priced home, which is \$550,300, with
11 a 20% down payment, and avoid being cost-burdened, a household must

1 earn \$129,178 annually;

2 (e) The average cost of construction of a new home as of
3 November 2024 was approximately \$483,000, which is an increase from
4 \$419,000 in 2023;

5 (f) In 2021, the general assembly enacted House Bill 21-1329,
6 which directed the executive committee of the legislative council to create
7 a task force to meet during 2021 and issue a report with recommendations
8 to the general assembly and the governor on policies to create
9 transformative changes in the area of housing;

10 (g) In 2022, the general assembly enacted House Bill 22-1282,
11 which authorized investment in companies pursuing innovative
12 construction methods, resulting in the establishment of the innovative
13 housing incentive program;

14 (h) Innovative housing incentive program investments are
15 intended to create new housing units, which lower housing costs and
16 encourage innovation; and

17 (i) Off-site construction partners participating in the innovative
18 housing incentive program, including modular manufacturers, have
19 expressed concerns that regulatory barriers are preventing intended
20 growth in housing units, reducing the cost and time-saving potential of
21 off-site construction.

22 (2) Therefore, the general assembly further finds and declares that
23 it seeks to address the shortage and cost of housing by enacting regional
24 standards for factory-built structures, rather than standards related to a
25 specific address, which will increase the supply of housing and lower
26 housing costs by lowering the cost of factory-built housing construction
27 and encouraging partners to take advantage of the economies of scale

1 afforded through factory-built construction.
