Summary of Legislation

The bill transfers specific amounts of interest income derived from the deposit and investment of money in 52 state cash funds and accounts to the General Fund at the end of the current FY 2024-25. For many of these funds, the bill requires that the interest income that these funds would otherwise receive in FY 2025-26, or in FY 2025-26 and all future years, instead be credited to the General Fund. See State Transfers and Diversions section for the affected funds and estimated transfer and diversion amounts.

State Transfers and Diversions

The bill transfers an estimated \$62.1 million from several cash funds to the General Fund in FY 2024-25 and diverts an additional \$29.9 million in future interest income to the General Fund in FY 2025-26, as shown in Table 2 below. Several cash funds also require ongoing diversions of interest income to the General Fund, which are denoted with an asterisk. Estimates beyond FY 2025-26 are not included due to the wide range of potential fund balances in future years, which will depend on numerous future decisions by state agencies and the General Assembly. Diversion amounts are estimates only and may change depending on future interest income amounts.
