This bill makes mid-year adjustments to the 2023 School Finance Act in order to maintain the budget stabilization factor at the level anticipated in the original appropriation. The bill results in a one-time reduction in state expenditures.

**Appropriation Summary:** For the current FY 2023-24, the bill requires and includes a \$24.0 million reduction in State Education Fund appropriations to the Department of Education.

**Fiscal Note Status:** The final fiscal note reflects the enacted bill.

## **Summary of Legislation**

**Formula funding.** This bill makes mid-year adjustments to the 2023 School Finance Act to maintain the budget stabilization factor at the level anticipated by the original appropriation. Adjustments are based on the October 2023 student count and certified property values for the 2023 tax year.

The decrease reflects higher-than-expected enrollment for total students and at-risk students, which increases total program funding before application of the budget stabilization factor by \$61.2 million. Concurrently, local revenue available to support school finance is \$85.2 million higher than anticipated. The bill holds the \$141.2 million budget stabilization factor constant, and increases total program funding by \$61.2 million. The higher local share decreases the state share of total program by \$24.0 million.

These adjustments increase the statewide average per pupil funding after application of the budget stabilization factor by \$57.27, to \$10,670.18 in FY 2023-24.

## **Background**

At the time that the Long Bill appropriation for school finance is established, many data are unknown. The initial appropriation is based on forecasts of the funded pupil count, the number of at-risk students, and property tax revenue. Subsequently, school districts conduct a student count in October, county assessors and the State Board of Equalization certify the total valuation for assessment of all taxable property, and school district boards certify each district's mill levy for school finance. By early January, these data are finalized by school districts and compiled by the Colorado Department of Education (CDE). CDE annually submits a supplemental request to make mid-year appropriation adjustments based on actual data.

For FY 2023-24, the funded pupil count was 1,128 higher than forecast, and the at-risk student count was 44,250 higher than projected. These two impacts increased overall school finance funding by \$61.2 million. In addition, actual local property tax revenue in 2023 was \$86.6 million higher than the estimates that were used for the initial appropriation during the 2023 session, and actual specific ownership tax revenue came in \$1.4 million lower than forecast. Thus, the overall local share for total program increased by \$85.2 million. Table 2 details these adjustments.

## State Expenditures

In the current FY 2023-24, the bill decreases state expenditures in CDE by \$24.0 million. The bill decreases the state share of school finance, paid from the State Education Fund.

**School finance.** This bill makes mid-year adjustments to school finance-related appropriations for FY 2023-24, decreasing the state share of total program by \$24.0 million and holding the budget stabilization factor at the level of the original appropriation. The cost of total program funding prior to the application of the budget stabilization factor increased by \$61.2 million due to a higher than anticipated student count and at-risk student count.

Because local tax revenue for school finance came in higher than was projected last spring, money available for the local share is \$85.2 million greater than anticipated. Maintaining the budget stabilization factor at its current level implies a decrease in the state share of total program by \$24.0 million. Table 3 details mid-year adjustments to the FY 2023-24 appropriations for school finance.

**Table 3**

*\*After the budget stabilization factor*

It should be noted that the statutory total program funding floor in the bill, \$9,171,827,315, is not the same as the actual total program funding that appears in Table 3 above. The statutory total program funding floor serves as a starting point for calculating the budget stabilization factor. The actual total program funding after application of the budget stabilization factor will be \$9,174,031,433, which is \$2,204,118 higher than the funding floor. The difference is the amount of the budget stabilization factor reduction attributable to the twelve school districts that are fully locally funded, and are thus not impacted by the budget stabilization factor in FY 2023-24.

**Budget stabilization factor.** By holding the budget stabilization factor at \$141.2 million across all school districts, the budget stabilization factor in percentage terms remains at 1.5 percent.

## School Districts

**Formula funding.** Under this bill, total funding for school districts through the formula will be increased by \$61.2 million from the funding amount that was originally appropriated for school finance in FY 2023-24, although the funding for individual districts will vary, depending on changes in pupil counts and local share. The \$61.2 million increase in the cost of total program combined with the \$85.2 million increase in the local share results in a \$24.0 million decrease in the state's share of total program.

District-level details for this funding adjustment are provided in Appendix A. It should be noted that the numbers for the FY 2023-24 initial appropriation in Appendix A exclude the \$8.5 million state share appropriation made in Senate Bill 23-187 for averaging in Charter School Institute (CSI) schools. The numbers for the FY 2023-24 adjusted appropriation with actual data include averaging in schools.

## Effective Date

The bill was signed into law by the Governor and took effect on March 8, 2024.

## State Appropriations

For FY 2023-24, the bill includes an appropriation reduction of \$23,964,790 from the State Education Fund to the Colorado Department of Education for the state share of total program.
