OFFICE OF THE STATE AUDITOR

C O L O R A D O

Key Concern

Colorado school districts and the Colorado Department of Education should review the fiscal health analysis and determine the cause and take action, as appropriate, for benchmarks missed over the 3-year period.

Key Findings

- This year's analysis reviewed the trends over the Fiscal Years Ending June 30, 2022, 2023, and 2024.
- In the previous year's analysis of the State's 178 school districts, for Fiscal Years 2021–2023, 36 districts missed one or more financial benchmarks. In the current year's analysis, 35 districts missed one or more financial benchmarks. In this year's analysis:
 - 1 district missed 5 benchmarks.
 - 1 district missed 3 benchmarks.
 - 10 districts missed 2 benchmarks.
 - 23 districts missed 1 benchmark.
- Most missed benchmarks occurred with the following two ratios:
 - The **Operating Margin Ratio**: the ratio calculating the amount added to the reserves for every \$1 in revenue, or the operating margin. This ratio identifies growth or decline in a school district's reserves over a 3-year period. A missed benchmark for this indicator may indicate a district is deliberately spending down fund balance to supplement operations or there is a reduction in state funding without a corresponding decrease in expenditures.
 - The **Change in Fund Balance Ratio**: the ratio calculating the change in general fund balance from previous to current years. A missed benchmark for this indicator identifies a potential concern of declining general fund balance as a whole, over time.
- All 12 school districts missing two or more benchmarks provided explanations for the trends. Overall:
 - 10 districts spent down fund balance to assist in retaining staff, including incurring costs related to salaries/benefits in order to remain competitive, higher utility costs, health insurance, capital needs, building maintenance, and to address overall inflation. The decrease in student enrollment and declines in the various federal funding also contributed to the missed benchmarks.
 - 1 district reported that the missed benchmarks were due to high turnover in their Finance Department, which resulted in a lack of oversight, and consistency in accounting practices.
 - 1 district reported that the missed benchmarks were due to an error that occurred in Fiscal Year 2022, resulting in a prior period adjustment in Fiscal Year 2023. Corrections were made in Fiscal Year 2024 that further reduced the general fund balance.

Background

- The Fiscal Health Analysis performed by the Office of the State Auditor provides a set of ratios and associated benchmarks by which to evaluate the financial health of each school district.
- The analysis examines the most current rolling 3-year period for which audited financial statements are available.
- Financial indicators from missed benchmarks can warn of financial stress that may require examination and remedial action by the appropriate parties
- The Fiscal Health Analysis uses six ratios to assess the following financial indicators:
 - The adequacy of assets to meet obligations.
 - The revenue coverage of debt service payments.
 - The reserves available to cover future expenses.
 - The amount added to the reserves for every \$1 in revenue.
 - The existence of a net deficit fund balance.
 - The increase or decrease to the reserves in the general fund.

Chapter 1

Background

This report provides information on the Fiscal Health Analysis of the State’s school districts. The Fiscal Health Analysis provides a set of financial indicators for each school district that may be used by the Colorado Department of Education, school districts, local government officials, and citizens, to evaluate the financial health of Colorado’s school districts. These financial indicators may require examination and remedial action by the appropriate parties. This report provides an analysis of each school district’s fiscal health for the 3-year period of Fiscal Years Ended June 30, 2022, 2023, and 2024, which represents the most recent, complete, 3-year data available. The school district’s final Fiscal Year 2025 financial information is not available until December 2025 at the earliest, and therefore, we do not include Fiscal Year 2025 in our analysis. The Fiscal Year Ended June 30, 2025 information will be included in our 2026 report.

In Colorado, 178 school districts provided public education to around 881,000 children enrolled in kindergarten through 12th grade (K–12) during the 2023-2024 school year. Total program funding for a district is calculated by the number of pupils in the district multiplied by a statewide base per-pupil amount. Each district has different calculations based on individual demographics and the amount of funding may be adjusted for various factors including: cost of living, personnel costs, and enrollment size. Funding for each school district’s total program is provided first by local sources of revenue, primarily through a property tax levy to finance the district’s local share. In limited cases across the state, the property tax resources may fully fund the district’s total program. Local property taxes can fluctuate from year to year due to changes in assessed valuations.

In Fiscal Year 2024, there were 11 school districts whose local share fully funded the district’s total program:

- Aspen 1
- Ault-Highland RE-9
- Briggsdale RE-10
- Cripple Creek-Victor RE-1
- East Grand 2
- Eaton RE-2
- Estes Park R-3
- Park County RE-2
- Pawnee RE-12
- Platte Valley RE-7
- Wiggins RE-50(J)

By comparison, in Fiscal Year 2023, there were four school districts whose local share fully funded the district’s total program:

- Briggsdale RE-10
- Eaton RE-2
- Pawnee RE-12
- Platte Valley RE-7

When a school district's property tax revenue does not fully fund the district's total program, the General Assembly appropriates additional funding to supplement local revenue. This funding is based on a formula under the Colorado Public School Finance Act [Section 22-54-104, C.R.S.] that considers, in part, the school district's annual pupil count, as well as the district's local share of revenue.

In 2010, the General Assembly passed House Bill 10-1369, codified as Section 22-54-104, C.R.S., which required, beginning in Fiscal Year 2011, a reduction in the amount of the annual appropriation to fund the State's share of total program funding to school districts. The intention of the bill was to assist in balancing the State's budget. This calculation is applied after the total program funding is calculated and is referred to as the Budget Stabilization Factor.

The Budget Stabilization Factor reductions have been used every year since Fiscal Year 2011 in varied amounts. The total amount of Budget Stabilization Factor reductions to school funding since its implementation through Fiscal Year 2024 is approximately \$10 billion. Senate Bill 24-188 eliminates the Budget Stabilization Factor for Fiscal Year 2025 "and subsequent years...subject to the continuing high levels of property values and changing economic conditions." Exhibit 1.1 shows the Budget Stabilization Factor from Fiscal Year 2011 through Fiscal Year 2025.

Exhibit 1.1
Budget Stabilization Factor for the Fiscal Years Ended
June 30, 2011 through 2025
(Dollars in Thousands)

Year	Budget Stabilization Factor
2011	\$597,066
2012	\$774,035
2013	\$1,011,401
2014	\$1,004,279
2015	\$879,957
2016	\$830,676
2017	\$828,846
2018	\$822,397
2019	\$672,397
2020	\$572,397
2021	\$1,052,662
2022	\$503,267
2023	\$321,243
2024	\$141,243
2025	\$0
TOTAL	\$10,011,866

Source: Colorado Department of Education

In Fiscal Year 2024, the General Assembly provided approximately \$5 billion to school districts' programs. The State's share includes funding from the general fund and cash funds. Exhibit 1.2 shows the original total state program funding, the Budget Stabilization Factor reduction, and the final appropriated state program funding, net of the Budget Stabilization Factor approved by the General Assembly for Fiscal Years 2022 through 2024.

Roles of the Department of Education and the Office of the State Auditor

The Colorado Department of Education (Department) and the Office of the State Auditor's Local Government Division (Division) serve different, yet complementary, roles in supporting school districts across Colorado. The Department is responsible for overseeing and monitoring districts, including their financial operations, while the Division is responsible for ensuring that local governments comply with the Colorado Local Government Audit Law (Audit Law), as described in the following section.

The Department of Education

As the administrative arm of the Colorado State Board of Education (State Board), the Department is responsible for overseeing public K–12 education on a statewide basis. This responsibility includes oversight of many aspects of school district administration and oversight of the annual accreditation of school districts. Accreditation requires school districts to comply with many factors, such as ensuring that students meet state academic standards and are prepared for post-secondary and workforce success. The State Board enters into an accreditation contract with each local district's school board for a 1-year term. The contract is renewed annually as long as the district achieves a minimum accreditation category of "accredited," meaning the district meets established performance indicators and has complied with the terms of its contract.

The Department uses accreditation to assess the quality of education and learning in public schools and school district administration. Sections 22-11-206 and 209, C.R.S., include a financial component that links districts' compliance with statutorily required budget and accounting policies to the Department's accreditation assessment. The State Board makes rules, regulations and policies that govern school districts, and approves or denies the accreditation for each public school districts.

Failure to comply with accreditation requirements may result in removal of accreditation and reorganization of the district subject to approval by the State Board. As of the time of our analysis, the Department reported that there were no districts currently approved by the State Board in violation of the financial component of the accreditation contract. For more information on financial accreditation, see the Department's website at: <http://www.cde.state.co.us/cdefinance/Accreditation.html>. In addition to accreditation information, the Department collects financial, enrollment, attendance, and other information for each district. To access the information collected by the Department, see the website's Schoolview section at: <http://www.cde.state.co.us/schoolview>.

The Public School Financial Transparency Act (Transparency Act), which was established through House Bill 10-1036 and subsequently amended, generally requires school districts to post financial information online. Required information posted to each district's website includes adopted budgets and financial audits. Additionally, House Bill 14-1292 called for the creation of a website that

translates financial information into a format that is readable by a layperson. Information for each school district, including details at the individual school level, can be found at: <https://www.cde.state.co.us/schoolview/financialtransparency/homepage>.

The Office of the State Auditor's Local Government Division

The Division tracks Colorado's local governments, including school districts, for compliance with the Audit Law [Section 29-1-601, et seq., C.R.S.]. The Audit Law requires most local governments to contract with independent certified public accountants for annual audits of their financial statements.

School districts are required to complete their financial statement audits within 5 months following the end of their fiscal year (i.e., June 30) and to submit their audit reports to the Division within 30 days of completion. If a school district cannot meet the deadline, it may file for an extension of up to 60 days, or until March 1. If a district does not submit its audit report by the statutory deadline, the Division has the authority to direct the county treasurer to prohibit the release of all property taxes collected on behalf of the school district until a satisfactory audit is submitted.

Once the school district submits its audit report, the Division reviews the report for deficiencies, contacts the auditor or the school district if further information is needed, and prepares a letter to the school district and its auditor if deficiencies are found. A deficiency may be related to noncompliance with statutory requirements or noncompliance with generally accepted accounting principles, such as the requirement that the audit report include both budgetary and actual information for certain funds. Once the audit report is reviewed, the information from the audit is entered into the Division's fiscal health database, providing the basis for this analysis.

Temporary Cash Flow Deficits

As part of the Tax Anticipation Note Act [Section 29-15-101, et. seq., C.R.S.], the State Treasurer is authorized to issue tax and revenue anticipation notes to provide interest-free loans to school districts to alleviate temporary cash flow deficits [Section 29-15-112(1), C.R.S.]. The notes are short-term payable from anticipated pledged revenue. Statute [Section 22-54-110(1)(a)(II), C.R.S.] requires school districts to repay the loans by the next June 25th following the date the loan was made. The notes issued by the State Treasurer for this purpose are known as the Education Loan Program Tax and Revenue Anticipation Notes (ETRAN).

To participate in the ETRAN program, school district management must obtain approval from its board of directors to submit an application to the State Treasurer. The district must demonstrate to the State Treasurer that a general fund cash deficit will exist and that the district has the capacity to repay the loan by June 25.

Exhibit 1.3 shows districts that participated in the ETRAN program anytime during the last 3 years, with a note showing the two participating districts that also missed two or more benchmarks for Fiscal Year 2024, as noted in Chapter 2 of this report.

¹ School districts are sorted by percent change from 2022 to 2024.

² School districts with two or more missed benchmarks for the 3-year period Fiscal Year 2022 through 2024.

Out of the 28 districts that have needed the ETRAN program financing for cash deficits from 2022 to 2024, 24 districts increased the amount of their loans and 4 districts decreased the amount of their loans over the 3-year period. Seven districts required the loan for only 1 of the 3 years. The total dollar amount of loans provided to school districts increased 42 percent over the 3-year period. School districts that continue to require increased amounts to cover general fund cash deficits may be experiencing financial stress.

Exhibit 1.4 shows the corresponding notes issued by the State Treasurer for the Fiscal Years Ended June 30, 2022, 2023, and 2024.

Exhibit 1.4
ETRAN Program Notes Issued by the State Treasurer
Fiscal Years Ended June 30, 2022, 2023, and 2024
(Dollars in Thousands)

Month of Issuance	2022	2023	2024
July	\$370,000	\$350,000	\$500,000
January	\$400,000	\$425,000	\$670,000
Total Notes	\$770,000	\$775,000	\$1,170,000

Total Education Loan Program Notes issued are based on school district estimates and may differ from actual participation noted in Exhibit 1.2. All funds remain invested until loaned out.

Chapter 2

Financial Ratios, Indicators, and Analysis

The Office of the State Auditor's Local Government Audit Division's (Division) Fiscal Health Analysis is composed of a set of financial indicators by which to assess the financial health of Colorado school districts. These ratios, when tracked over time, offer trend information that can warn of potential financial deterioration in a particular school district, when compared with a standard benchmark. The Fiscal Health Analysis uses a 3-year period to evaluate trends.

The Fiscal Health Analysis focuses on the areas of highest risk for school districts. Accordingly, the analysis focuses primarily on each school district's general fund because this fund accounts for state funding and local property tax revenue received and expended for operations and discretionary items. The analysis also focuses on each school district's debt and includes any fund balance deficits. For the purpose of this analysis, we excluded proprietary funds, because school districts can usually address deficits in these funds through increases in charges.

The Fiscal Health Analysis uses six ratios to assess school districts' financial health. The following are general descriptions of the six ratios and associated benchmarks that are indicators of potential financial stress when evaluated over a 3-year period. Appendix A contains further information on each ratio, benchmarks, and financial indicators.

Ratio 1: Asset Sufficiency Ratio (ASR)

What will this ratio tell me?

This ratio shows how much coverage a school district's general fund total assets has over its total liabilities and provides a good indication as to whether the school district has the ability to pay its bills in the short term.

What will a trend in this ratio tell me?

An ASR that is trending downward indicates that a school district has decreasing assets, increasing liabilities, or both. This could be due to a timing issue, meaning that the school district has incurred more liabilities at the end of the financial period, resulting in increased liabilities as of the balance sheet date. Alternatively, it could mean that the school district has paid off more liabilities at the end of the year, decreasing its assets as of the balance sheet date.

Where do I find the information?

The information for this ratio comes from the general fund in the governmental funds balance sheet. If the school district has deferred outflows, they should be included with the total assets. If the school district has deferred inflows, they should be included with the total liabilities.

How do I calculate the ratio?

To calculate this ratio, divide the general fund total assets and deferred outflows by the general fund total liabilities and deferred inflows.

ASR Formula
$\frac{\text{General fund total assets + deferred outflows}}{\text{General fund total liabilities + deferred inflows}}$

What is the benchmark?

The numeric benchmark for this ratio is 1.0. When a school district has an ASR of 1.0, it means that it has exactly enough total assets to cover its total liabilities. An ASR of less than 1.0 means that the school district's liabilities exceed its assets.

Financial Indicator Criteria
Continuous decline in ASR from year 1 to year 3, with year 3 less than 1.0
or
ASR less than 1.0 all 3 years

This ratio has two different criteria. First, the ratio should not consistently decrease over time and go below 1.0. Second, it should not consistently remain below 1.0. A decreasing ratio may mean a school district could be facing liquidity problems.

For analysis purposes, a school district is below the benchmark when there are consistent decreases in the ratio with the last year less than 1.0 or all 3 years less than 1.0.

Example Trend Data
Ratio year 1 = 3.12
Ratio year 2 = 2.09
Ratio year 3 = 0.98
—
Below benchmark? Yes
or
Ratio year 1 = 0.80
Ratio year 2 = 0.90
Ratio year 3 = 0.98
—
Below benchmark? Yes

What questions should I consider if my school district is below the benchmark?

- Does the school district have consistent decreases in the ratio over time? If so, why?
- Does the school district have trouble paying debts as they become due? If so, why?
- Is the school district incurring more liabilities over time? If so, why?
- Are more liabilities coming due faster than cash is coming in to pay them? If so, do cash flow projections reflect this? How is this being addressed?
- Is the school district below the benchmark due to timing issues? For example, does the school district have significant cash flows in the early part of the year, after the balance sheet date?
- Is the school district's cash flow structure sufficient to continue paying liabilities as they become due? How is this being projected?

Ratio 2: Debt Burden Ratio (DBR)

What will this ratio tell me?

The ratio indicates whether the school district's annual revenue will cover its annual debt payments, including principal and interest. The DBR is a very important way to assess a school district's ability to continue to meet its debt service payments. This ratio shows the relationship between a school district's revenue, or debt-paying capacity, and its required debt payment.

What will a trend in this ratio tell me?

If the DBR shrinks every year, it might be a sign that the school district's debt payment is becoming more burdensome and concerning. This ratio can also provide other insights into how a school

district is paying off its debt. In general, if a school district pays its debt service with revenues outside the general fund revenue in 1 year, and then uses general funds the next year, the DBR will fluctuate significantly. This becomes important if a school district has been paying its debt service with other revenue, not reported in the general fund, and then it begins to use general fund revenue. This could be a sign that the revenue stream the school district intended to use to pay off its debt might not be sufficient.

Where do I find the information?

To find the total governmental revenue of funds paying debt service, total all the revenue from any governmental fund with debt service expenditures. Then, examine transfers into any funds paying debt service, and add the revenue from the fund that is the source of the transfer into that fund. Total governmental debt payments are the sum of all debt service payments reported in all governmental funds. Additionally, this information could be located in a few different places within the audited financial statements. Aside from the statement of revenues, expenditures, and changes in fund balance, the information could be in the long-term debt disclosure or in a related schedule of long-term debt. Sometimes it is necessary to dig deeper into the financial statements by examining the combining statements to determine specifically which non-major fund made debt service payments or transferred money into a fund that actually paid the debt service.

How do I calculate the ratio?

To calculate this ratio, divide the total governmental revenue of funds that pay debt service by the total governmental fund debt service payments, including principal and interest.

DBR Formula
$\frac{\text{Total governmental revenue of fund(s) paying debt}}{\text{Total governmental debt payments}}$

What is the benchmark?

A DBR of 1.0 would indicate that annual debt service expenditures equals the annual revenue of the fund supporting the debt.

Financial Indicator Criteria
Continuous decline in DBR from year 1 to year 3, with year 3 less than 1.0 or DBR less than 1.0 all 3 years

This ratio has two different criteria. First, the ratio should remain constant or increase over the 3-year period without going below 1.0. Second, it should not consistently remain below 1.0. A school

district with a DBR of 1.0 has just enough revenue in its funds with debt service payments to pay those debt service expenditures. A DBR of less than 1.0 means that a school district does not have enough revenue in its funds paying debt service to cover those debt service expenditures and it must use fund balance to make up the difference.

In our analysis, a school district is below the benchmark when it has a consistently decreasing DBR with the most recent year's ratio less than 1.0 or all 3 years less than 1.0.

Example Trend Data
Ratio year 1 = 2.13
Ratio year 2 = 1.04
Ratio year 3 = 0.98
—
Below benchmark? Yes
or
Ratio year 1 = 0.95
Ratio year 2 = 0.96
Ratio year 3 = 0.97
—
Below benchmark? Yes

What questions should I consider if my school district is below the benchmark?

- Does this ratio indicate that the school district does not have the ability to pay its future debt service expenditures? If so, how is the district addressing this?
- Is the ratio consistently decreasing over time because the school district has decreasing revenue available to make debt service payments? If so, how is the district addressing this?
- Has the school district determined the cause of the consistently decreasing DBR? How is it being addressed?

Ratio 3: Operating Reserve Ratio (ORR)

What will this ratio tell me?

The ORR indicates the period of time (with 1.0 equaling 1 year) the school district's general fund balance reserve is sufficient to cover future expenditures. Specifically, this ratio shows the amount of fund balance a school district has to pay its future expenditures. The ratio provides information based on the assumption that future expenditures will resemble past expenditures. This means that a school district with a high ORR should have reserves to pay for its expenditures further into the

future, if expenditures remain consistent. This ratio also provides insight into how long a school district could operate if it were unable to collect any revenue.

What will a trend in this ratio tell me?

If the ORR decreases over time, it means the school district has either increasing expenditures or has less fund balance to cover its expenditures. Translated into a time measurement, the fund balance will not cover the same amount of time of operational expenditures as in previous years, assuming expenditures have remained consistent. There are many reasons that a school district might be decreasing its available fund balance, so even 3 years of consistent decline may not automatically mean that there is a problem. Regardless of the actual results of calculating this ratio, the school district should evaluate the trend to determine the sufficiency of its reserves. The key to this ratio is that management is aware of the changes and that they are intentional or planned.

Where do I find the information?

The general fund balance information necessary to calculate the ORR is located on the governmental funds balance sheet, specifically in the general fund. Total general fund balance includes nonspendable, restricted, committed, assigned, and unassigned. Expenditure and transfer information is located on the governmental funds statement of revenues, expenditures, and changes in fund balance. General fund total expenditures (net of transfers) is found by identifying total general fund expenditures and adding transfers out and subtracting transfers in.

How do I calculate the ratio?

To calculate this ratio, divide the general fund balance by general fund total expenditures (net of transfers).

ORR Formula
$\frac{\text{Fund balance of the general fund}}{\text{General fund total expenditures (net of transfers)}}$

What is the benchmark?

The benchmark for ORR is a general fund balance of no less than 1 month of regular current general fund expenditures, or a ratio of 0.0833 (1/12 of a year or 1 month).

Financial Indicator Criteria
Continuous decline in ORR from year 1 to year 3, with year 3 less than 0.0833 Or ORR less than 0.0833 all 3 years

The ORR has two different criteria. First, a school district with an ORR of 0.0833 can pay for 1 month of expenditures in the event of a total loss of revenue inflows. A school district would be below the benchmark if it has consistent decreases in the ratio, with the most recent year less than 0.0833. This means that either expenditures are increasing or fund balance is decreasing to the point where the school district can no longer pay for 1 month of future expenditures. The second part of the criteria is whether a school district has less than 1 month of reserves in all 3 years.

For our purposes, a school district is below the benchmark if it has consistent decreases in the ratio with the most current year's ORR less than 0.0833, or all 3 years are less than 0.0833.

Example Trend Data
Ratio year 1 = 0.1019
Ratio year 2 = 0.0927
Ratio year 3 = 0.0624
—
Below benchmark? Yes
or
Ratio year 1 = 0.0612
Ratio year 2 = 0.0727
Ratio year 3 = 0.0824
—
Below benchmark? Yes

What questions should I consider if my school district is below the benchmark?

- Will the school district have a problem paying its future expenditures? If so, how is this being addressed?
- Does the school district understand the circumstances that resulted in a consistently decreasing ORR and was it planned? What time frame will change the ORR?
- Do consistent decreases in the ratio mean that expenditures are increasing or fund balance is decreasing, or both? If so, how is this being addressed?

Ratio 4: Operating Margin Ratio (OMR)

What will this ratio tell me?

The OMR is a traditional financial performance indicator that private and public entities use for analysis. The OMR looks at revenues and expenditures in the general fund. The ratio indicates the amount added to the school district's reserves for every \$1 generated in revenue.

In general, a school district that has sustainable operations will have more operating revenue than expenditures at any given time. There are numerous reasons why a school district would have more expenditures than revenues for a given year, but if the school district continually has more expenditures than revenue, it might be financing its expenditures with long-term debt or fund balance, which is not a sustainable operational model.

What will a trend in this ratio tell me?

First, the OMR will tend to change consistently over time. It is possible that a school district will have a negative OMR 1 year if there are one time capital expenditures, and a positive OMR the next. However, if a school district has a consistently negative OMR, it could indicate structural problems in the school district's operating decisions, or generally poor economic conditions. A consistent decrease in the OMR, or an OMR consistently less than zero, is not sustainable in the long term because eventually a school district will run out of fund balance to cover the difference. Consistent increases in this ratio could indicate that a school district has a generally improving economic environment, or that it has made operating decisions that have created more sustainable operations.

Where do I find the information?

The information for this ratio is located on the governmental funds statement of revenues, expenditures, and changes in fund balance. General fund total revenue is the total revenues for the general fund. General fund total expenditures (net of transfers) is found by identifying total general fund expenditures and adding transfers out and subtracting transfers in.

How do I calculate the ratio?

To calculate this ratio, subtract total general fund expenditures, net of transfers, from general fund total revenue. Divide that result by general fund total revenue.

OMR Formula
$\frac{\text{General fund total revenue} - (\text{general fund total expenditures, net of transfers})}{\text{General fund total revenue}}$

What is the benchmark?

The benchmark for the OMR is zero. An OMR of zero means that a government has equal revenue and expenditures. An OMR greater than zero is positive and indicates that the government has more revenue than expenditures. For example, an OMR of 0.01 would indicate that \$.01 in net income would result from every \$1 produced in gross revenue. An OMR of less than zero means that the government has more expenditures than revenues.

Financial Indicator Criteria
Decrease in OMR from year 1 to year 3, with year 3 less than zero or OMR less than zero in all 3 years

The OMR has a two-part criteria. First, the OMR can fluctuate based on the district's budget decisions, but should not consistently decrease over time. Second, it should not consistently be below zero.

For our analysis, a school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

Example Trend Data
Ratio year 1 = 0.11 Ratio year 2 = 0.05 Ratio year 3 = -0.04 — Below benchmark? Yes or Ratio year 1 = -0.11 Ratio year 2 = -0.07 Ratio year 3 = -0.02 — Below benchmark? Yes

What questions should I consider if my school district is below the benchmark?

- Is the school district aware that it has a consistently negative OMR? How is this being addressed?
- Does this ratio indicate that the school district is spending too much money? Are cash flow projections indicating this and how is it being corrected?
- Does the decrease in OMR indicate planned reductions in fund balance? If so, what time frame will change the OMR?
- Are there one-time capital expenditures that led to the decrease in OMR? If so, what time frame will change the OMR?
- What is causing the OMR to be consistently less than zero and how can the school district fix this issue? What are cash flow and budget projections indicating for future results?
- Is the consistent decrease due to a timing issue? If so, what time frame will change the OMR?

Ratio 5: Deficit Fund Balance Ratio (DFBR)

What will this ratio tell me?

The DFBR indicates that it will take a greater length of time in subsequent years to cover the net deficit fund balance with existing revenues in a governmental fund. This ratio subtracts the fund balance of the general fund, if the balance is positive, from the total deficit fund balance(s) (shown as an absolute value). This ratio is calculated only when a deficit fund balance cannot be covered by the general fund balance. The ratio divides the total by the total revenue in the governmental fund(s) with deficit fund balance(s). Fund balance is the difference between governmental fund assets and liabilities. A negative fund balance is often referred to as deficit fund balance. Revenue for the governmental fund(s) with deficit fund balance(s) is total revenues in the governmental fund(s) with deficit fund balance.

What will a trend in this ratio tell me?

An increasing DFBR indicates that it will take a greater length of time in subsequent years to recover the deficit fund balance with existing revenue.

Where do I find the information?

The information for this ratio is located on the governmental funds statement of revenues, expenditures, and changes in fund balance in the basic financial statements and/or the combining statement of revenues, expenditures, and changes in fund balance for non-major funds. Current year fund balances are generally located on the last line of the statement.

How do I calculate the ratio?

This ratio is only calculated when a net deficit fund balance (general fund balance less all deficit governmental fund balances) exists.

To calculate this ratio, once a net deficit fund balance has been confirmed, subtract the fund balance of the general fund, if the balance is positive, from the total deficit fund balance(s) (shown as an absolute value) and divide the total by the total revenue in the deficit fund balance(s).

DFBR Formula

$$\frac{\text{Total [absolute value] deficit fund balance(s) – fund balance of the general fund, if positive}}{\text{Total revenue in deficit fund balance(s)}}$$

What is the benchmark?

The benchmark for the DFBR is zero. A DFBR of zero means the district does not have a net deficit fund balance and the DFBR would not be calculated.

Financial Indicator Criteria
Net Deficit fund balances for 3 years or Increase in DFBR from year 2 to year 3

The DFBR has two different criteria. First, the DFBR is triggered when the district has a net deficit fund balance in all 3 years. This can be determined by calculating only the numerator of the DFBR for each year.

Second, if the DFBR increases from year 2 to year 3 this would indicate that the deficit will take longer to recover through existing revenues. This could be due to increasing deficits that cannot be covered by the general fund balance or a reduction in revenues within the governmental funds with deficit fund balances.

Example Trend Data
Net deficit fund balance year 1 = -\$67,601 Net deficit fund balance year 2 = -\$44,525 Net deficit fund balance year 3 = -\$2,929 — Below benchmark? Yes or Ratio year 1 = 0.00 Ratio year 2 = 0.00 Ratio year 3 = 28.23 — Below benchmark? Yes

What questions should I consider if my school district misses the benchmark?

- Is the school district aware that it has a deficit fund balance? If so, what steps are being taken to correct this?
- Does this ratio indicate that the school district is spending too much money in that fund where a deficit fund balance exists? If so, how is this being addressed?
- How is the board of education evaluating compliance with Section 22-44-105(1.5)(a), C.R.S. in relation to any governmental funds with a deficit fund balance?

- What is the district doing to address excess spending in the fund(s) with a deficit fund balance?
- Does the district need to budget for a larger transfer from the general fund to avoid a deficit fund balance? What time frame are projections indicating a turnaround from the deficit fund balance?

Ratio 6: Change in Fund Balance Ratio (CFBR)

What will this ratio tell me?

The CFBR indicates whether the school district's fund balance in its general fund is increasing or decreasing. This ratio could show that a school district needs to adjust its revenue and expense structure in order to remain solvent over time. This ratio subtracts the prior year general fund balance from the current year general fund balance and then divides the resulting amount by the prior year general fund balance. This ratio evaluates a potential concern of declining fund balance and highlights when a school district's general fund balance has reached the lowest point when comparing year 1's beginning balance to year 3's ending balance.

This ratio shows the change in a school district's general fund balance, as a whole, over time. The CFBR goes beyond a traditional operating margin analysis and encompasses all sources and uses of resources for the general fund. However, a declining fund balance may be only part of the district's financial condition. It is important to also consider the ORR ratio, which shows the amount of fund balance a school district has to pay its future expenditures. The ORR is triggered when a district's fund balance covers only 1 month of expenditures. By taking the ORR into consideration when calculating this ratio, the intent is to trigger the CFBR before a school district's fund balance becomes negative.

What will a trend in this ratio tell me?

A consistently decreasing CFBR over time could provide an indication that general fund activities are not sustainable without potential changes.

A school district should ascertain why the general fund balance has declined to avoid a deficit and should determine how to return the general fund to operating sustainability.

Where do I find the information?

The information for this ratio is located on the governmental funds statement of revenues, expenditures, and changes in fund balance. Current year fund balance of the general fund is generally located on the last line of the statement. Prior year or beginning fund balance of the general fund is located on the same statement, generally just above the current year ending value.

How do I calculate the ratio?

To calculate this ratio, subtract the prior year general fund balance from the current year general fund balance and then divide the resulting amount by the prior year general fund balance.

CFBR Formula
$\frac{\text{Current year fund balance of the general fund} - \text{prior year fund balance}}{\text{Prior year general fund balance}}$

What is the benchmark?

The benchmark for the CFBR is zero. A CFBR of zero would indicate that the fund balance has not changed from the prior year.

Financial Indicator Criteria
Decrease in CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance or CFBR less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

The CFBR has a two part criteria. The CFBR is similar to OMR in that a consistently declining or negative CFBR is not a sustainable operating model. Eventually, remaining fund balance will run out to cover the deficiency.

For our purposes, a school district is below the benchmark if it has either (1) consistent decreases in the ratio and has a year 3 fund balance less than year 1 beginning fund balance, or (2) a ratio of less than zero for all 3 years with a year 3 fund balance less than year 1 beginning fund balance, and the Operating Reserve Ratio (ORR) has been triggered, indicating the year 3 ending fund balance may not cover 1 month of expenditures.

Example Trend Data	
Ratio year 1 = 0.10	Year 1 Beginning Fund Balance = \$1,403,000
Ratio year 2 = 0.02	Year 3 Ending Fund Balance = \$975,000
Ratio year 3 = -0.15	—
Below benchmark? Yes	
or	
Ratio year 1 = -0.30	Year 1 Beginning Fund Balance = \$2,658,000
Ratio year 2 = -0.29	Year 3 Ending Fund Balance = \$1,525,000
Ratio year 3 = -0.15	Year 3 ORR Ratio = 0.0784
—	
Below benchmark? Yes	

What questions should I consider if my school district misses the benchmark?

- Do changes in this ratio indicate that the school district is spending too much?
- What does the school district plan to do to reverse this trend? What time frame will it take?
- Should the school district maintain more or less reserves? What are the projections determining?

Trend Analysis

The purpose of the Division's trend analysis is to identify school districts with ratios that are below the associated benchmarks over the 3-year period. The Division established this analysis as a baseline to see how school districts are performing financially over the 3-year period through the latest audited fiscal year, which, for this report, includes the Fiscal Years Ended June 30, 2022, 2023, and 2024. This analysis is conducted annually and examines the most current rolling 3-year period for which audited financial statements are available. The Colorado Department of Education (Department) has stated that even though it receives and typically reviews information on a more detailed basis prior to the release of the Fiscal Health Analysis, the multi-year view of school districts' fiscal health is valuable for the Department's analysis. The Fiscal Health Analysis highlights districts that have missed the benchmark on two or more financial indicators, showing trends that might not have surfaced in the Department's review of prior year financial data.

The Fiscal Health Analysis has some limitations when identifying possible financial stress within a school district. First, the analysis does not highlight school districts that missed a benchmark for only 1 or 2 of the 3 years included in the review. The second limitation of the Fiscal Health Analysis is that it does not take into consideration any current budgetary actions the district has taken that may affect the school district's financial condition. For example, if the district has significantly cut expenditures in Fiscal Year 2025, the changes would not appear until the actual results were reported at the end of the year in the district's Fiscal Year 2025 audited financial statements, which would not be due to the Division until December 2025. Finally, since the analysis is based on historical data, it does not consider school districts' financial condition at the current point in time.

Evaluation of the School Districts

Note: Because the following eight districts did not submit their Fiscal Year 2024 audited financial statements to the Division by the end of our analysis in mid-July 2025, the districts were not included in our Fiscal Health Analysis for Fiscal Year 2024:

- East Otero R-1 School District
- Edison 54-JT School District*
- Fowler R-4J School District*
- Gilpin County RE-1 School District
- Hi-Plains R-23 School District

- Huerfano RE-1 School District
- South Routt RE-3 School District
- Wiley RE-13JT School District

* These districts submitted their Fiscal Year 2024 audited financial statements after we conducted our analysis and before the finalization of this report. However, due to the timing of their submissions, it was not possible to include them in our analysis.

While these districts did not miss any benchmarks in the prior year's analysis, it is not possible to predict whether they missed any benchmarks in the current year's analysis without the data from the audited financial statements. In accordance with the Local Government Audit Law, we have directed the respective county treasurers to place a hold on the districts' property taxes as a result of the districts failure to submit audited financial statements.

Our Fiscal Health Analysis revealed that, of the state's 178 school districts that submitted Fiscal Year 2024 audits, 35 missed the benchmark related to one or more financial ratios. Of these 35 school districts, 23 districts missed one benchmark and 12 districts missed two or more benchmarks. Of the 12 districts, 10 districts missed 2 benchmarks, 1 district missed 3 benchmarks, and 1 district missed 5 benchmarks.

Exhibit 2.1 shows the number of school districts missing benchmarks for each of the six ratios for the Fiscal Years Ended June 30, 2022, 2023, and 2024.

Exhibit 2.1

Fiscal Health Analysis

Number of School Districts Missing Financial Benchmarks

Fiscal Health Ratio	2022	2023	2024
Ratio 1: Asset Sufficiency Ratio	0	1	1
Ratio 2: Debt Burden Ratio	8	6	8
Ratio 3: Operating Reserve Ratio	2	4	4
Ratio 4: Operating Margin Ratio	21	30	26
Ratio 5: Deficit Fund Balance Ratio	0	1	1
Ratio 6: Change in Fund Balance Ratio	11	16	11
Total Indicators ¹	42	58	51
Total Districts With One or More Missed Benchmarks	31	36	35

Source: Analysis performed by the Office of the State Auditor, Local Government Division, using data from audited financial statements submitted by school districts, and the Office of the State Auditor, Colorado School Districts Fiscal Health Analysis Report, Fiscal Years 2021-2023.

¹ Some districts had indicators in more than one category.

Exhibit 2.1 shows that most of the benchmarks were missed in the Operating Margin and Change in Fund Balance Ratios for the current 3-year period ended June 30, 2024. Several districts also missed the benchmark for the Debt Burden Ratio over the 3-year period.

The occurrence of missing one or more of the fiscal health benchmarks may not mean that a school district is facing financial stress. Nonetheless, a missed benchmark should prompt further examination by the decision makers of the school district to determine what led to the occurrence. The more benchmarks a school district misses, the more likely it is to be experiencing financial stress. Continued financial stress could cause a school district to reduce or eliminate programs and jobs and could affect the quality of education.

School Districts Missing Two or More Benchmarks

Exhibit 2.2 shows the change in the number of missed benchmarks for those districts that missed the benchmark for two or more financial ratios in our prior year Fiscal Health Analysis report. Our Fiscal Year 2021-2023 analysis identified 17 school districts that missed two or more financial benchmarks.

Exhibit 2.3 shows the districts that missed the benchmark for two or more financial ratios in our current and 2 prior years' Fiscal Health Analysis reports. Our Fiscal Year 2021-2023 analysis identified 17 school districts that missed two or more financial benchmarks. Additionally, there was one school district, Ellicott 22 School District, that increased its missed financial benchmarks from zero to five in the 3-year period.

¹ Districts missing two or more benchmarks in two or more report years in the 3-year periods shown. See current year and prior years' Appendix B for more information.

▲ Indicates an increase from 2023 to 2024.

The Division discussed the results of the analysis with the school districts to obtain information about the missed benchmarks and the steps the districts are taking to turn the trends around. Appendix B provides further information and explanations from the 12 school districts missing two or more benchmarks, including the districts' plans to improve their financial condition. Of the 12 districts missing two or more benchmarks, all 12 missed the Operating Margin Ratio benchmark, demonstrating losses in reserves. Additionally, 9 of the 12 school districts missed the benchmark for the Change in Fund Balance Ratio. This financial indicator demonstrates the district's reductions in the general fund balance and illustrates the change in a district's general fund balance as a whole, over time.

Although some districts may show a declining fund balance as a result of a planned spend down of fund balance, these districts may still have fund balances well above the benchmark for the ORR ratio, which indicates the period of time the reserves are sufficient to cover future expenditures. For example, Clear Creek RE-1 School District, McClave RE-2 School District, Pawnee RE-12 School District, and Strasburg 31-J School District—all among the districts that triggered the operating margin ratio—each has fund balance reserves in the 4- to 12-month range, meaning reserves are well above the 1-month benchmark for the ORR ratio and may be sufficient to cover future expenditures.

The 12 districts provided the following explanations for missing two or more benchmarks:

- **Alamosa RE-11J School District:** Reported that the district missed the benchmarks due to compensation increases that were made in order to attract and retain teachers from surrounding districts, an increase in the number of employees to support students, and increasing health insurance costs. The district also reported that they have experienced a steady decline in student enrollment since 2020, which also contributed to the missed benchmarks.
- **Bayfield 10 JT-R School District:** Reported that the reason for the missed benchmarks was due to a decrease in the amount of federal funding revenues received in prior years from the Coronavirus Aid, Relief, and Economic Security (CARES) Act and the Elementary and Secondary School Emergency Relief Fund (ESSER). The District also reported that they completed a staffing change in order to align with an expected reduction of students, and augmented staff salaries to make them more competitive. Additionally, the District made a capital improvements transfer for a planned building improvement project.
- **Clear Creek RE-1 School District:** Reported that the missed benchmarks were due to a planned spend down of the general fund balance for capital reserve needs and to offer competitive salaries to employees.
- **Elizabeth School District:** Reported that the underlying causes for the missed benchmarks were a combination of factors including deferred maintenance, inflation, and rising labor and service costs including increased reliance on contracted transportation and special education providers due to staffing shortages. The District also reported that it has prioritized compensation increases in real-time in order to remain competitive with metro-area salaries.

Additionally, the District indicated that it made significant transfers from the general fund into the athletics and capital reserve funds in order to address student and facility needs.

- **Ellicott 22 School District:** Reported that the missed benchmarks were due to the district's increased costs for a construction project to add 13 more classrooms at elementary and high schools. The district also reported that the turnover in the Business Manager position resulted in a lengthy training process for new staff and also impacted accounting practices.
- **Hanover 28 School District:** Reported that the missed benchmarks were due to the result of an error that occurred in Fiscal Year 2022, resulting in a prior period adjustment in Fiscal Year 2023. Corrections were made in Fiscal Year 2024 that further reduced the general fund balance.
- **McClave RE-2 School District:** Reported that several factors contributed to the missed benchmarks including the occurrence of significant one-time expenditures to pay off debt incurred for a gym and the resurfacing and striping of the District's track. The District also reported they invested in infrastructure including turf and sprinklers for the football field, installation of an irrigation pond and pumping system, and a roof replacement.
- **Moffat County RE-1 School District:** Reported that the District experienced high turnover within their finance department which resulted in inconsistencies in their accounting practices, specifically in budgeting for large capital projects and in keeping the financial records current and up to date. Additionally, the turnover resulted in a lack of oversight and transfer of institutional knowledge between administrators and directors.
- **Pawnee RE-12 School District:** Reported that the missed benchmarks were due to an 18 percent increase in salaries in order to attract and retain staff, the purchase of three new vehicles, and construction projects to improve facilities.
- **Roaring Fork RE-1 School District:** Reported that the underlying causes for the missed benchmarks were due to maintaining a competitive compensation package for teachers and staff, additional housing units for staff, and increased costs for health insurance. The District also reported that increases in local costs of living put pressure on the District's finances and contributed to the missed benchmarks.
- **Strasburg 31-J School District:** Reported that the missed benchmarks were due to an intentional and planned spend down of fund balance on nonrecurring capital projects.
- **Summit RE-1 School District:** Reported that the missed benchmarks were due to a planned spend down of fund balance to address staffing challenges caused by post-COVID-19 housing costs. With an increase in assessed property values of 40 percent in the county in 2023, the District reported that recruitment and retention became severely comprised, forcing a strategic choice between maintaining reserves or ensuring adequate staffing for educational quality.

Although there are various explanations for the reasons these school districts missed the financial benchmarks, the school districts reported that they are rectifying the problems in similar ways.

Some districts plan to make improvements to their annual budgets through financial planning and increased monitoring. Some of the school districts are planning to reduce expenses by implementing salary freezes and not refilling vacant positions. Additionally, some districts are implementing new systems to support accurate tracking of expenses and improving oversight by hiring budget analysts and outside accounting firms. Some districts reported that they intentionally planned one-time expenses and therefore, these districts do not expect missed benchmarks to reoccur in future periods.

Various economic conditions have adversely affected districts of all sizes and geographic areas across the state. Eight of the 12 school districts have pupil counts that are less than 2,000 students. The map in Appendix C shows the districts with two or more missed benchmarks and that the majority of these districts are located in predominately rural areas.

Analysis of Per Funded Pupil Revenues and Expenditures

Analysis of per funded pupil information, illustrated in Exhibit 2.3, reveals that general fund revenue per funded pupil has generally increased over the 3-year period for most of the 12 districts highlighted in this section. However, in all but two cases (Alamosa RE-11J and Elizabeth), expenditures per funded pupil have increased at a faster rate over the same period. This can lead to the operating margin and fund balance issues noted earlier in this report. The chart in Appendix D shows the change from Fiscal Year 2022 to 2024 for each district's general fund revenue and expenditures per funded pupil.

Exhibit 2.4

Fiscal Health Analysis

Change in Total General Fund Revenue and Expenditures Per Funded Pupil Fiscal Years 2022 to 2024

School District ¹	County	Increase (Decrease) in Total General Fund Revenue per Pupil	Percent Change in Total General Fund Revenue per Pupil	Increase in Total General Fund Expenditures per Pupil	Percentage Change in Total General Fund Expenditures per Pupil
Ellicott 22 School District	El Paso	\$2,054	17%	\$8,079	45%
Roaring Fork School District	Garfield/Eagle/Pitkin	\$2,964	23%	\$6,231	42%
McClave RE-2 School District	Bent	\$3,822	23%	\$6,529	41%
Strasburg 31-J School District	Adams/Arapahoe	\$2,388	21%	\$4,881	40%

Source: Analysis performed by the Office of the State Auditor, Local Government Division, using data from audited financial statements submitted by school districts. District student count figures were obtained from the Colorado Department of Education's statewide funded pupil counts for Fiscal Years 2022 through 2024.

¹ School districts are sorted by percent change in total general fund expenditures per pupil.

Conclusion

Financial trend analysis is an important tool because it can identify potential areas of concern for the Department, the school districts, and citizens. The analysis can be used to assist the Department and school district officials in their decision making to be able to take action when there is an indication of possible financial stress.

Response to Analysis

Colorado Department of Education

The Colorado Department of Education, School Finance Unit, has two main functions in regard to school district financial activities: (1) to provide technical assistance to school districts regarding complex funding formulas and reporting requirements; and (2) to monitor compliance with budgeting, accounting, and reporting requirements related to school district financial accreditation.

Each district's audited financial statements are annually reviewed by the Department for compliance, and a "Financial Accreditation Report" is collected from each school district for the purpose of assuring compliance with Articles 44 and 45 of the Colorado Revised Statutes. During this review process, the Department works closely with finance staff within the districts, providing detailed guidance and support on a variety of financial reporting topics. If any areas of non-compliance are identified, the Department follows-up with the district to resolve the issue(s), requiring districts to provide a corrective action plan when appropriate. If the violations are significant, further action is taken by the Department with respect to the district's accreditation contract.

The Department has enhanced the educational outreach and support to district business managers in recent years. CDE provides coaching and mentoring with new business managers, holding monthly group meetings augmented with regular individual meetings to address any challenges, answer questions and train on important topics. The Department runs two cohorts, one for school districts and BOCES and one for charter schools. Additionally, the Department provides a variety of trainings and supports on core school finance and accounting areas, including:

- Regional in-person training sessions all over Colorado (typically 1 ½ days each)
- On-line training sessions (typically 90 minutes each)
- In-person site visits with individual school districts in order to address specific challenges
- Presentations at professional group conferences
- Google Forms "tests" to teach fundamental governmental accounting and school finance matters
- On-call services via telephone and e-mail to assist with struggles and challenges

This tailored fiscal support program has provided invaluable guidance and assistance to districts across the state. The Department has 1.5 FTE dedicated to provide this type of fiscal support. Unfortunately, the support provided by such a small team is not nearly enough to address the needs of districts. School districts are in dire need of additional support from the Department given the fiscal challenges facing districts across the state and the demands placed upon district business managers.

Districts across the state work diligently to proactively manage their finances to provide quality educational services and take prudent and intentional actions in response to their financial constraints. Some districts have experienced challenges with proactive financial management. A large number of districts are experiencing turnover in the finance office, in addition to staffing challenges throughout district operational areas including special education services, school transportation, and school nutrition services. This turnover adds additional stress to the system. In addition, districts often experience difficulties hiring qualified business managers with experience in school district operations and governmental accounting. It is especially challenging to recruit qualified candidates in rural communities. There is a shortage of financial auditors with expertise in governmental accounting and experience working with school districts.

The impact of these challenges is evidenced by the trends in the submission of audited financial statements and associated financial data. Financial data for each fiscal year is required to be submitted by districts and BOCES within six months of the fiscal year end (December 31), or within eight months (February 29/March 1) if a 60 day extension was approved by the Office of the State Auditor. As shown in the following table, the number of late submissions has dramatically increased, with six districts or BOCES with pending audit submissions over 14 months after the end of the fiscal year.

	Fiscal Year 2014-15	Fiscal Year 2023-24
Submitted Prior to December 31	167 (82.7%)	117 (58.2%)
Submitted between January 1 and February 28	32 (15.8%)	51 (25.4%)
Submitted between March 1 and March 31	3 (1.5%)	9 (4.4%)
Submitted between April 1 and September 15	–	18 (9.0%)
Not Submitted as of September 15	–	6 (3.0%)

Additionally, the type of fiscal support requested of the Department has evolved as districts have faced more serious issues, including concerns with the ability to meet payroll obligations, non-payment of payroll taxes and PERA contributions, and inability to record financial transactions throughout the year. The Department has had to step in to provide detailed hands-on support in cases where districts are facing serious issues and/or do not have any financial staff. As the number of districts struggling to perform these types of fundamental financial duties increases, the Department will be unable to provide the necessary level of support. This could result in catastrophic issues for struggling districts.

Colorado school districts have received increased state funding in recent years due, in part, to the elimination of the Budget Stabilization Factor and significant investments in special education

funding. Further, the implementation of the new School Finance formula starting in FY 2025-26 will result in increased per pupil funding for many districts. However, 21 of the 178 districts (11.8 percent) are projected to utilize the hold harmless provision of the new formula, resulting in FY 2025-26 funding level with FY 2024-25 funding. Despite the additional funding received by many districts, most districts across the state continue to experience budgetary challenges due to cost pressures in several areas. Many districts are experiencing significant difficulties recruiting and retaining teachers and staff and face increased costs to support students, including historically underserved students. Additionally, districts have increased costs to maintain their schools and many are making needed investments in buildings and capital assets. Districts are struggling with meeting costs that raise beyond the rate of inflation, such as salaries, healthcare, and insurance rates. Finally, while significant distributions of COVID-19 federal stimulus funds for education have provided much needed one-time financial resources for districts, the extensive management and reporting requirements that come with these funds have placed additional fiscal administrative burdens on districts already stretched thin. The sunset of the federal stimulus funding in the fall of 2024 may present financial challenges for some districts. This can sometimes create a fiscal cliff as districts are forced to move recurring expenditures back into the General Fund. While we have trained on this situation relentlessly over the last three years, some districts are still dealing with the aftermath of those decisions.

The Department will continue to work to provide proactive educational outreach and support to district business managers on core school finance areas and provide the fiscal support to the extent practical with existing resources. Further, the Department will continue to collaborate with the Office of the State Auditor to make meaningful comparisons of the financial data collected and reviewed, especially as that data is used to help districts facing financial challenges.

Appendix A

Understanding the Fiscal Health Ratios and Indicators

Ratio	Calculations
ASR Asset Sufficiency Ratio Formula	$\frac{\text{General fund total assets + deferred outflows}}{\text{General fund total liabilities + deferred inflows}}$
DBR Debt Burden Ratio Formula	$\frac{\text{Total governmental revenue of fund(s) paying debt}}{\text{Total governmental debt payments}}$
ORR Operating Reserve Ratio Formula	$\frac{\text{Fund balance of the general fund}}{\text{General fund total expenditures (net of transfers)}}$
OMR Operating Margin Ratio Formula	$\frac{\text{General fund total revenue – (general fund total expenditures, net of transfers)}}{\text{General fund total revenue}}$
DFBR Deficit Fund Balance Ratio Formula	$\frac{\text{Total [absolute value] deficit fund balance(s) – fund balance of the general fund, if positive}}{\text{Total revenue in deficit fund balance(s)}}$
CFBR Change in Fund Balance Ratio Formula	$\frac{\text{Current year fund balance of the general fund – prior year fund balance}}{\text{Prior year general fund balance}}$

Description	Benchmark	Financial Indicators
Indicates the coverage of general fund assets to general fund liabilities.	An ASR of 1.0 would indicate that total assets equals total liabilities.	Continuous decline in ASR from year 1 to year 3, with year 3 less than 1.0 or ASR less than 1.0 all 3 years
Indicates the coverage of revenue of fund(s) paying debt service to the annual principal and interest payments.	A DBR of 1.0 would indicate that debt service equals the annual revenue of the fund supporting the debt.	Continuous decline in DBR from year 1 to year 3, with year 3 less than 1.0 or DBR less than 1.0 all 3 years
Indicates the period of time the general fund ending fund balance will cover of the current year general fund expenditures, including transfers.	An ORR of 0.0833 (1/12, or 1 month) equates to one month of reserves for current expenditures and transfers.	Continuous decline in ORR from year 1 to year 3, with year 3 less than 0.0833 or ORR less than 0.0833 all 3 years
Indicates the amount added to reserves for every \$1 in total general fund gross revenue.	An OMR of zero means that revenue equals expenditures.	Decrease in OMR from year 1 to year 3, with year 3 less than zero or OMR less than zero in all 3 years
Indicates the portion of annual revenue required to cover the deficit (or negative) fund balance. This ratio is only calculated when a net deficit fund balance (general fund balance less all deficit governmental fund balances) exists.	An increasing DFBR indicates that it will take a greater length of time in subsequent years to cover the deficit fund balance with existing revenues.	Net deficit fund balances for 3 years or Increase in DFBR from year 2 to year 3
Indicates the change in the fund balance of the general fund from one year to the next in relationship to the prior year fund balance.	A CFBR of zero would indicate that the fund balance had not changed from the prior year.	Decrease in CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance or CFBR less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures

Appendix B

Alamosa RE-11J • School District

Alamosa and Conejos Counties

Understanding the Ratios

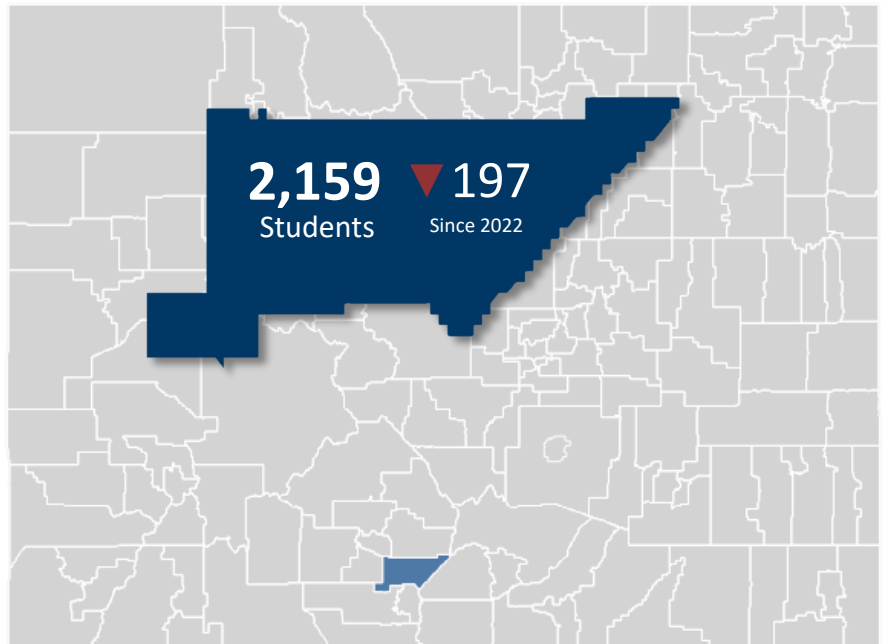

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue. An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Debt Burden Ratio** indicates the coverage of revenue of fund(s) paying debt service to the annual principal interest payments, including leases.

A DBR of 1.0 would indicate that debt service equals the annual revenue of the fund supporting the debt.

A school district is below the benchmark when it has a consistently decreasing DBR with the most recent year's DBR less than 1.0, or all 3 years less than 1.0.

Response

Alamosa RE-11J School District

Missed benchmarks are due to several factors. The district has had to increase compensation in recent years to attract and retain teachers from surrounding districts, has increased the number of employees to support students, while dealing with increasing health insurance costs. During this time we have also seen a steady decline in student enrollment since 2020. The District and Board of Education understand that this trend cannot continue and is diligently monitoring and planning for decreased enrollment going forward and has approved a balanced budget for fiscal year 2025 to reverse this trend. The District has also worked with the Alamosa Education Association and agreed upon a salary freeze for the 25-26 school year. A Memorandum of Understanding has also been agreed upon to look at funding after the October count to determine whether the freeze can be lifted. In response to the DBR ratio, the District has taken measures to minimize the burden to its stakeholders by attempting to only levy the number of mills necessary to meet their payment obligations. The Debt Service Fund had excess reserves to cover the underlevying of property taxes in relation to the debt service payments of FY24.

Bayfield 10 JT-R • School District

La Plata and Archuleta Counties

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Change in Fund Balance Ratio** indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

Response

Bayfield 10 JT-R School District

The OMR and CFBR are both missing the benchmark due to a spend down in the general fund balance. The expenditure of the fund balance was deemed necessary primarily to address deferred maintenance costs as well as to augment staff salaries to make them more competitive. In addition, the change in fund balance over the years listed, decreased mainly due to the federal revenue reduction: Cares Act, COVID, ESSER, etc. In FY23/24 there was also a capital improvements transfer for building improvement needs across the district. The capital improvement transfer was part of a planned project and approved by the district board of education.

The district has completed a staffing change to align with the reduction of students expected. The district right-sized its staffing numbers based on declining enrollment. The anticipated decline in enrollment is based on trending class sizes, larger class sizes graduating, and enrollment numbers provided by the local preschool. New community housing and other community developments are ongoing, giving the district the expectation the student enrollment will not continue to drop but will grow in the coming years. Quality staff retention and expanded course offerings are a focus of the district administration to continue the push to grow student count numbers. The board of education has adopted a zero based budget to move into the 25/26 FY and expect to outperform the 24/25 budget.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

Response

Clear Creek RE-1 School District

The OMR and CFBR are both missing the benchmark due to a spend down in the general fund balance. The FY 21 ORR ratio showed that the District's Fund balance was high at .8803. A planned spend down of the fund balance was implemented beginning in FY 22 to use the excess fund balance for capital reserve needs and to offer competitive salaries to employees. The Board of Education and district staff are aware of the risks of spending one time funds on salaries but will ensure to balance the budget before dropping below the required reserves for TABOR, and maintain the District policy of 15%. Reductions were made in FY25 by natural attrition/not refilling positions and continuing into FY26. We also made reductions to technology through vendor/contract selection and renegotiated contracts, as well as changes to subscriptions and efficiencies.

Source: Response provided by the School District. District student count figures were obtained from the Colorado Department of Education's statewide funded pupil counts for Fiscal Year 2022 and Fiscal Year 2024.

Elizabeth • School District

Elbert County

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The Change in Fund Balance Ratio

indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

The **Operating Reserve Ratio** indicates the amount the general fund ending fund balance will cover of the current year general fund expenditures, including transfers.

An ORR of 1/12 or 0.0833, equates to one month of reserves for current expenditures and transfers.

A school district is below the benchmark if it has consistently decreasing ORR with the most recent year's fund balance less than one month of expenditures, or an ORR below 0.0833 for all 3 years.

Response

Elizabeth School District

The District has remained focused on rebuilding financial sustainability while continuing to address structural and systemic challenges identified in prior years. Leadership changes including a new Board of Education, Superintendent, and CFO—have brought greater focus to fiscal discipline, transparency, and long-term planning.

The underlying causes for missing FY2023–24 benchmarks stem from continued impacts of deferred maintenance, inflation, and legacy issues including previous overestimates of revenue tied to housing growth that did not materialize. The District continued to face rising labor and service costs, including increased reliance on contracted transportation and special education providers due to staffing shortages. To remain competitive with metro-area salaries—despite the absence of local mill levy overrides—the District prioritized compensation increases in real time.

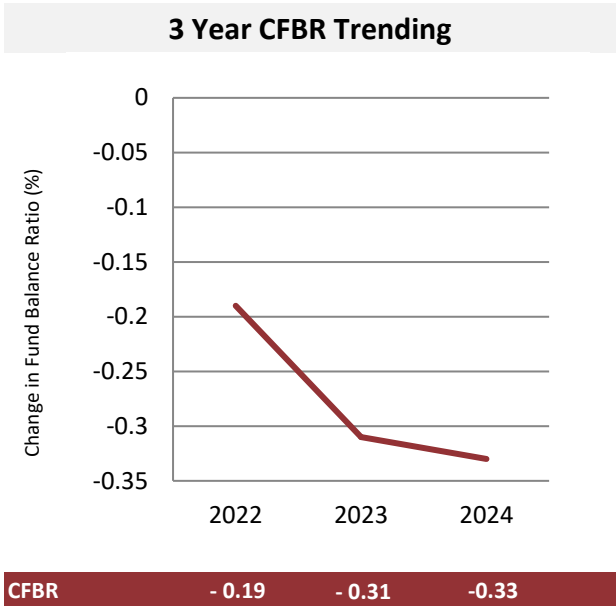

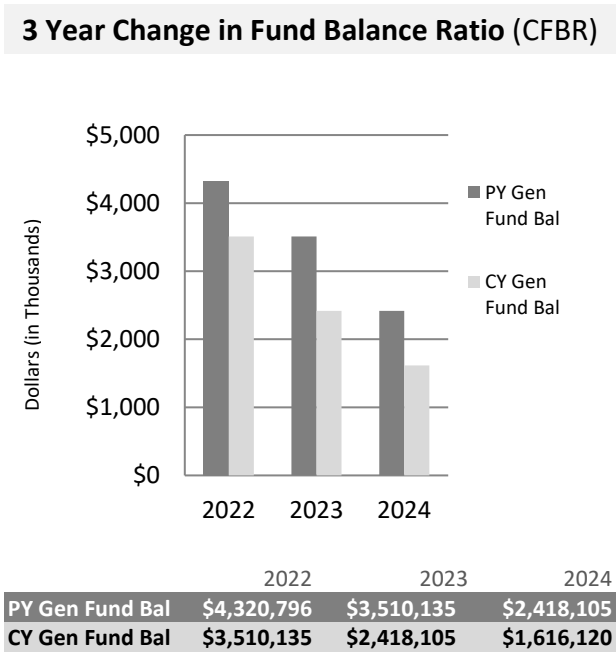

In FY2023–24, the District decreased its General Fund balance by \$801,985, reflecting the third consecutive year of fund balance reduction. Significant interfund transfers from the General Fund—\$1.7 million to Athletics and Capital Reserve Funds—were made to address student and facility needs. The District maintains bank deposits of over \$2.3 million.

To reverse this trend, the District has adopted a multi-year policy to restore the General Fund balance to 10% of expenditures by FY2027–28. In the 2024–25 school year, we made significant improvement in that fund balance. Developer fee structures have been reassessed and updated after 15 years, recovering critical lost revenue. The new ERP system, fully operational in 2023–24, now supports accurate tracking of actual versus budgeted expenses, including position control. Full benefits of these efforts will be realized beginning with the 2024–25 budget.

Ellicott 22 • School District

El Paso County

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Change in Fund Balance Ratio** indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

The **Operating Reserve Ratio** indicates the amount the general fund ending fund balance will cover of the current year general fund expenditures, including transfers.

An ORR of 1/12 or 0.0833, equates to one month of reserves for current expenditures and transfers.

A school district is below the benchmark if it has consistently decreasing ORR with the most recent year's fund balance less than one month of expenditures, or an ORR below 0.0833 for all 3 years.

Response

Ellicott 22 School District

The key factor in the missing of the financial benchmarks is that the Ellicott School District began a construction project to add 13 more classrooms at our elementary and high school. The district secured a Certificate of Participation (COP) for \$5,088,000. This project was supposed to be over the course of 3 years. It was complete in 18 months and classes were in the buildings the Fall of 2024. The overall project is as follows:

Construction Project-

Total Cost of Project- \$9,485,271

1st Payment- 5/11/2024 for \$802,687.

Last Payment- 5/30/2024 for \$119,824.

National Bank Holdings (NBH) COP was for \$5,088,000. (20 yr. loan)

Dec. Payment- \$79,576.32 - \$6,440.07

June Payment- \$189,626 - \$350,004

Colo Trust- Bank Statement

as of 5/1/22- \$4,511,831.68

As of 9/10/2024- \$539,640.79

The district does not have any capital construction projects in the near future and the budgeting is being done conservatively. The transition in the Business Manager Position has also been a major negative impact because accounting practices are lost and training new staff for this position is a lengthy process and it is a very difficult position. The District has gone through 6 Business Managers since 2017.

Source: Response provided by the School District. District student count figures were obtained from the Colorado Department of Education's statewide funded pupil counts for Fiscal Year 2022 and Fiscal Year 2024.

Ellicott 22 • School District

El Paso County

The **Deficit Fund Balance Ratio** indicates the portion of annual revenue required to cover the deficit (or negative) fund balance in a governmental fund. This ratio is only calculated when a net deficit fund balance exists in a governmental fund.

An increasing DFBR indicates that it will take a greater length of time in subsequent years to cover the deficit fund balance with existing revenues.

A school district is below the benchmark if it has deficit fund balances for all 3 years, or if it has a decrease in the DFBR over the last 2 years.

The **Asset Sufficiency Ratio** indicates the coverage of general fund assets to general fund liabilities.

An ASR of 1.0 would indicate that total assets equals total liabilities.

A school district is below the benchmark if it has consistently decreasing ASR with the most recent year less than 1.0, or an ASR less than 1.0 for all three years under analysis.

Hanover 28 • School District

El Paso County

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue. An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Operating Reserve Ratio** indicates the amount the general fund ending fund balance will cover of the current year general fund expenditures, including transfers.

An ORR of 1/12 or 0.0833, equates to one month of reserves for current expenditures and transfers.

A school district is below the benchmark if it has consistently decreasing ORR with the most recent year's fund balance less than one month of expenditures, or an ORR below 0.0833 for all 3 years.

Response

Hanover 28 School District

These ratios are the result of an error in Fiscal Year 2022 resulting in a prior year adjustment in Fiscal Year 2023. Following a thorough review of the adjustment, corrections were made in Fiscal Year 2024 that further reduced the general fund balance. We have a reserve built into our budget at this time in order to be sure that we are able to get our reserve up to the required level and that we will not exceed our budgeted expenses.

McClave RE-2 • School District

Bent County

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Change in Fund Balance Ratio** indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

Response

McClave RE-2 School District

In our district, several factors contributed to missing financial benchmarks. One key issue was the occurrence of significant one-time expenditures, such as the payoff of our Certificate of Participation (COP) debt to UMB Bank totaling \$322K for our white gym, a new gym that we built onto our existing school using the funds acquired from the COPs, and the resurfacing and striping of our track for \$119K in FY22-23. These costs are not typical and will not recur in future budgets. Additionally, in FY23-24, we invested in crucial infrastructure, including turf and sprinklers for our football field costing \$360K, and the installation of an irrigation pond and pumping system for \$236K. We also replaced the roof at a cost of \$460K, with insurance proceeds of \$450K received in FY22-23 to help offset this expense.

To improve our financial condition, the local board of education has focused on prudent financial planning and budgeting to accommodate these expenses without compromising our operational funds. We are also exploring new funding opportunities and closely monitoring expenditures to ensure we are within our means. Moving forward, we aim to stabilize our financial health by prioritizing essential services and maintaining a clear vision to guide our investments in infrastructure while seeking to enhance revenue sources.

Response

Moffat County RE-1 School District

The District has had several administrative positions change over the fiscal periods that are included in the analysis. Due to the high turnover in the finance department, consistency in accounting practices have been lacking. Budgeting and keeping the financial records current have been a challenge in previous years. In addition large capital projects throughout the District were not budgeted correctly and the expenses far exceeded what had been originally budgeted. Due to the lack of oversight from the continuous administration turnover, supplemental budget(s) had to be established.

Appropriate institutional knowledge handoff between administrators and directors did not occur as it should have.

To rectify historical errors, better accounting practices have been put in place, outside accounting firm has been hired for oversight, and internal accounting department is being backfilled. A balanced budget has been built going back to when the District was in a healthier state and adjusted for current state and federal funding. MCS D now has the monitoring in place and staff to align expenditures to budgets moving forward with far less deviation.

Pawnee RE-12 • School District

Weld County

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Change in Fund Balance Ratio** indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

Response

Pawnee RE-12 School District

The district has maintained a generous fund balance and kept the budgeted reserve amount in the general fund constant over the last few years. The amount in the general fund reserve has been depleted recently due to 18% salary increase to attract and retain staff, the purchase of three new vehicles to update the school fleet, and smaller maintenance construction projects to improve facilities. The district has a special reserve fund that is not reflected in the general fund budget. Because the expenditures were made from the general fund and not the special reserve fund, the OMR and CFBR as calculated have both decreased, but if the district special reserves were counted in the general fund reserves neither trigger would have been met. The district is in sound financial condition.

Roaring Fork RE-1 • School District

Garfield/Eagle/Pitkin Counties

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

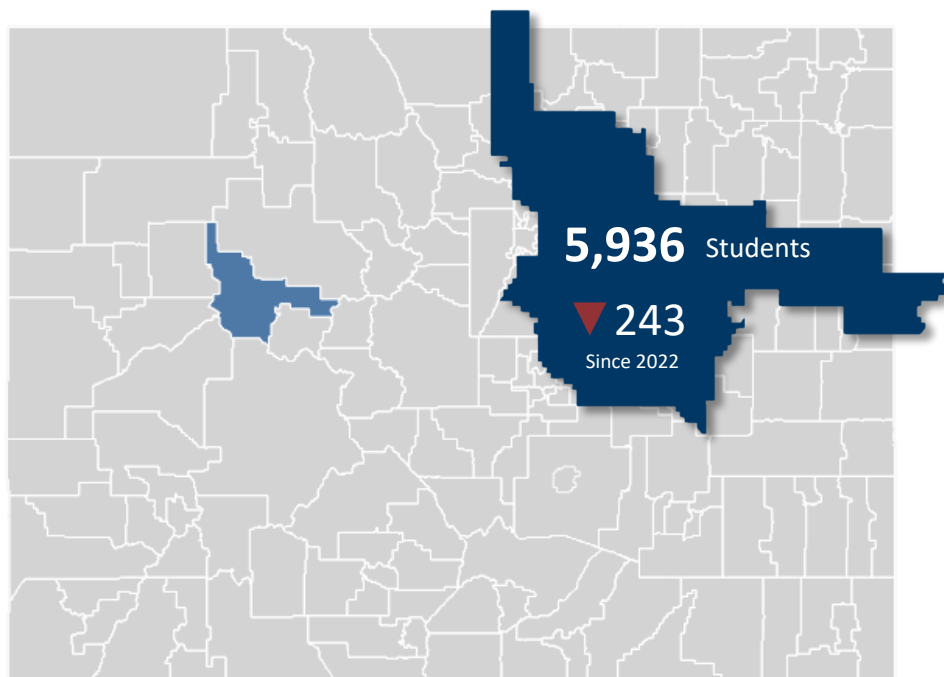

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Change in Fund Balance Ratio** indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

Response

Roaring Fork RE-1 School District

The benchmarks that were missed were caused by the following uses in fund balance:

- The District has a strategic priority to maintain a competitive compensation package for teachers and staff. Increases in health insurance costs, coupled with local cost of living increases, have put pressure on the District's finances.
- The District started a self-insurance plan for employee health insurance as of July 2023 to improve flexibility of health insurance offerings to employees. The District lost an estimated \$4 million total during 2023/24 and 2024/25 due to high claims during those years. This loss reduced the fund balance for the District by \$2 million for 2023/24. The District moved back to an insurance pool, Colorado Employers Benefit Trust (CEBT), effective 1/1/25 to mitigate future potential losses.
- The District utilized \$1.1 million in reserves in 2022/23 plus \$7.8 million in reserves during 2023/24 towards building additional staff housing units. These expenditures are one-time and will not have an impact on future financial results.

The District has hired a budget analyst in 2025 to monitor financial results more closely. The District is not planning to spend down fund balance for 2024/25 or 2025/26.

Strasburg 31-J • School District

Adams and Arapahoe Counties

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Debt Burden Ratio** indicates the coverage of revenue of fund(s) paying debt service to the annual principal interest payments, including leases.

A DBR of 1.0 would indicate that debt service equals the annual revenue of the fund supporting the debt.

A school district is below the benchmark when it has a consistently decreasing DBR with the most recent year's DBR less than 1.0, or all 3 years less than 1.0.

Response

Strasburg 31-J School District

Operating Margin Ratio

The district acknowledges the accuracy of the data. The negative trend in this ratio is the result of the district's intentional and strategic decision to spend down its fund balance on nonrecurring capital projects. Over the past several years, the fund balance had grown significantly, reaching 61% of total expenditures in 2022. In subsequent years, the balance was reduced to 40% in 2023 and 36% in 2024. The Board of Education has established a long-term goal to maintain a fund balance of approximately 25% of total expenditures, ensuring strong financial health while responsibly managing taxpayer resources. The district does not plan to continue drawing down the fund balance once this target is achieved.

Debt Burden Ratio

We also confirm the accuracy of the Debt Burden Ratio data. The district's fund balance experienced substantial growth due to favorable interest earnings on deposits. While the ratio declined from 1.03 in 2022 to 0.91 in 2024, the district remains financially sound. The Board of Education has prioritized maintaining appropriate reserves while also mitigating the risk of collecting excess taxes. The district's long-term financial planning process includes forecasting both tax revenues and debt service obligations, and we are confident in our ability to meet these obligations while preserving fiscal responsibility.

Summit RE-1 • School District

Summit County

Understanding the Ratios

The **Operating Margin Ratio** indicates the amount added to reserves for every \$1 in total general fund gross revenue.

An OMR of 0.01 would indicate that every \$1 in gross revenue would result in \$.01 in net income.

A school district is below the benchmark if it has consistently decreasing OMR with the most recent year less than zero, or a negative OMR for all 3 years under analysis.

The **Change in Fund Balance Ratio** indicates the change in the balance of the general fund from one year in relation to the prior year.

A CFBR of zero would indicate that the fund balance had not changed from the prior year.

A school district is below the benchmark if it has consistent decreases in the CFBR from year 1 to year 3, with year 3 fund balance less than year 1 beginning fund balance, or a CFBR of less than zero for all 3 years, with year 3 fund balance less than year 1 beginning fund balance and when a district's year 3 ending fund balance covers less than 1 month of expenditures.

Response

Summit RE-1 School District

The district's missed financial benchmarks resulted from an intentional spend-down of fund balance to address critical staffing challenges caused by post-COVID housing costs. With assessed property values increasing 40% in our county in 2023, recruitment and retention became severely compromised, forcing a strategic choice between maintaining reserves or ensuring adequate staffing for educational quality.

We do not expect to continue spending down fund balance, as we have reached the minimum Board requirement of 10%. This demonstrates fiscal discipline while having addressed the immediate crisis. Our financial planning now incorporates stabilized market conditions and adjusted revenue projections from increased assessed valuations. The Board has taken concrete action by establishing and enforcing the 10% minimum fund balance requirement as a fiscal guardrail. Additionally, the Board actively supports a county-wide workforce housing initiative that addresses root causes of affordability challenges, reducing future pressure on district budgets. These proactive measures ensure sustainable solutions rather than temporary fixes, positioning the district for long-term fiscal stability while maintaining competitive compensation and educational excellence.

Source: Analysis performed by the Colorado Office of the State Auditor, Local Government Division, using data from audited financial statements submitted by school districts. District student count figures were obtained from the Colorado Department of Education’s statewide funded pupil counts for Fiscal Years 2022 through 2024.

Note: School districts are sorted by percent change in total general fund expenditures per pupil.
