HOUSE BILL 25-1259

BY REPRESENTATIVE(S) Froelich and Brown, Boesenecker, Clifford, Lindsay, Willford, Woodrow, Bacon, Garcia, Lieder, Lukens, Mabrey, McCormick, Rutinel, Sirota, Stewart R., Story, Valdez, Velasco, Zokaie; also SENATOR(S) Cutter and Daugherty, Jodeh, Michaelson Jenet, Mullica, Sullivan, Wallace, Winter F.

CONCERNING ASSISTED REPRODUCTION, AND, IN CONNECTION THEREWITH, ADOPTING IN VITRO FERTILIZATION AND OTHER ASSISTED REPRODUCTION AND FERTILITY PROTECTIONS AND ELIMINATING OTHER ADMINISTRATIVE REQUIREMENTS.

*Be it enacted by the General Assembly of the State of Colorado:*

**SECTION 1. Short title.** The short title of this act is the "Reducing Barriers to Building Families Act".

**SECTION 2. Legislative declaration.** (1) The general assembly finds that:

(a) On February 16, 2024, the Alabama supreme court ruled that embryos formed through in vitro fertilization, or IVF, are considered children under the state's "Wrongful Death of a Minor Act";

---

*Capital letters or bold & italic numbers indicate new material added to existing law; dashes through words or numbers indicate deletions from existing law and such material is not part of the act.*

(b) The ruling raised great concerns about the impact on, in particular, provision of women's health-care services, fertility care for all individuals, and assisted reproductive technologies.

(c) After the ruling, IVF clinics in Alabama ceased providing infertility medical services and also ceased transferring embryos owned by their patients to clinics outside of Alabama due to potential legal and felony risks if an embryo was inadvertently destroyed.

(2) (a) The Alabama ruling, coupled with new, intrusive, and difficult-to-implement requirements for gamete donation, has had negative impacts on people seeking fertility treatments in Colorado.

(b) Colorado has been recognized for decades as a medical destination for those seeking sophisticated and cutting-edge medical care for infertility. Colorado's fertility clinics are highly respected; the state's medical practitioners are known as pioneers in assisted reproductive technologies, or ART medical care; and Colorado continues to advance and provide top-notch ART fertility care.

(c) Equally matching its sophisticated ART medical care, Colorado also ranks highly among all states due to its progressive laws and legal protections for children born through assisted reproductive technologies, laws that ensure donors of gametes (ova and sperm) and embryos are not considered legal parents of any resulting children, and the laws protect the parental rights of parents whose children are born through ART, including through donated gametes and surrogacy. Children born through ART in Colorado legally are able to know who their parents are from the moment of birth, and potential parents are likewise safeguarded due to Colorado's protections, including not requiring a genetic relationship between parent and child and not requiring parents to be married, and including opposite gender individuals' access to ART, making Colorado a top choice for domestic and international individuals seeking assisted reproduction medical care treatment options.

(3) Therefore, the general assembly declares that:

(a) Colorado should remain a world-class destination for all people who want to start a family, providing safe, cutting-edge medical care for

individuals in need of those services;

(b) It is also important to keep the transparency and rules around disclosure in order to address the concerns of donor-conceived individuals while preserving the whole ecosystem of Colorado's world-class assisted reproduction technologies, infertility medical care options, and gamete donation medical environment; and

(c) This act seeks to streamline implementation of the provisions of the "Donor-Conceived Persons Protection Act" while preserving the important transparency and reporting requirements.

**SECTION 3.** In Colorado Revised Statutes, **add** 25-57-113 as follows:
