the division. The division shall authorize a payment in the amount certified in a claim; except that the maximum payment that the division may authorize is equal to 10% of the amount of money in the fund at the time the claim is filed.

The division shall certify a claim that meets the following guidelines:

- The claim demonstrates, in sufficient detail, the costs or damages that resulted from the prescribed burn;
- The prescribed burn that resulted in the costs or damages was conducted in full compliance with statutory and regulatory requirements for prescribed burning;
- Before conducting the prescribed burn, the certified prescribed burn manager registered the written prescription plan for the prescribed burn with the division and paid an administrative fee; and
- No more than 60 days have passed between the completion of the prescribed burn and the date upon which costs and damages were incurred.

The bill gives rule-making authority to the director of the division to adopt rules and guidelines for the implementation and administration of the program and permits the division to contract with a third-party to administer, certify, and pay the claims. The bill also requires a claimant who accepts a payment that covers the full amount certified in the claim to waive all future claims related to the prescribed burn.

Sections 2 and 3 expand the definition of a "certified burner" in the state to include an individual who has not completed the Colorado division's training and certification program but who meets reciprocity requirements and possesses a valid Colorado certification number. An individual seeking certification through reciprocity may receive a certification number from the division by:

- Applying for certification to the division, according to the rules and standards of the division, including the payment of any associated fee; and
- Submitting evidence to the division, according to the rules and standards of the division, that the individual holds a valid certification from a state government or other entity.

The director of the division, in consultation with the Colorado state forest service, is required to adopt rules and standards pertaining to the qualification for and the terms and durations of certification, including through reciprocity.
