Bill Outcome: Signed into Law

Drafting number: LLS 25-0162

Version: Final Fiscal Note

Date: June 16, 2025

Fiscal note status: The fiscal note reflects the enacted bill. The bill was recommended by the Water Resources and Agriculture Review Committee.

Summary Information

Overview. The bill clarifies regulations regarding work performed on backflow prevention devices.

No fiscal impact. This bill has no fiscal impact on state or local government.

Appropriations. No appropriation is required.

Table 1
State Fiscal Impacts

Type of Impact	Budget Year FY 2025-26	Out Year FY 2026-27
State Revenue	\$0	\$0
State Expenditures	\$0	\$0
Transferred Funds	\$0	\$0
Change in TABOR Refunds	\$0	\$0
Change in State FTE	0.0 FTE	0.0 FTE

Summary of Legislation

The bill specifies that inspection, testing, or repair of backflow prevention devices does not require plumbing occupational licensure from the Department of Regulatory Agencies (DORA). Occupational licensure is required for installation or replacement of backflow prevention devices, except when the work is on a stand-alone fire suppression system. Additionally, the bill requires that persons servicing backflow prevention devices affix a tag on the device that includes certain information at the time services are performed.

Background

Backflow prevention devices are designed to protect clean water lines from wastewater contamination. [House Bill 24-1344](#) continued plumbing industry regulation and made several changes to plumbing occupational licensure. One change was to require plumbing licensure for all work on backflow prevention devices, including inspection, testing and repair. Prior to this change, licensure was only required for the installation or removal of backflow prevention devices.

Assessment of No Fiscal Impact

The changes made by this bill regarding occupational licensure and scope of practice do not change state or local government revenue and expenditures, as the updated licensing requirements in HB 24-1344 have not yet been fully implemented. This bill returns licensing requirements for work involving backflow prevention devices to those in effect prior to HB 24-1344, with some clarifications that do not impact state or local government workload or costs. Thus, this bill is assessed as having no fiscal impact.

Effective Date

The bill was signed into law by the Governor and took effect on March 28, 2025.
