1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly  
3 finds that:

4 (a) Each year, over 750,000 people in the United States are  
5 arrested for drug possession based upon colorimetric field drug test  
6 results;

7 (b) A colorimetric field drug test is a small plastic pouch that  
8 contains a chemical reagent that reacts with aspects of certain compounds  
9 that are often found in drugs. The test is administered by placing a  
10 suspected controlled substance in the chemicals in the pouch to see if the  
11 chemical reagent changes to a specific color.

12 (c) Colorimetric field drug test results are presumptive tests that  
13 should be confirmed by further laboratory testing as these presumptive  
14 tests identify only aspects of a chemical compound, many of  
15 which are shared by both controlled substances and common household  
16 items including sugar, sugar substitutes, items containing sugar or sugar  
17 substitutes, soap, coffee, nutritional supplements, and over-the-counter  
18 medications.

19 (d) A recent study published by the Quattrone Center for the Fair

1 Administration of Justice at the University of Pennsylvania Carey Law  
2 School states:

3 (I) Presumptive field drug tests, like the colorimetric field drug  
4 test, "[are] one of the largest, if not the largest, known contributing factor  
5 to wrongful arrests and convictions in the United States";

6 (II) Approximately "[thirty thousand] arrests each year involve  
7 people who do not possess illegal substances but who are nonetheless  
8 falsely implicated by color-based presumptive tests"; and

9 (III) "On a per capita basis, Black Americans experience these  
10 erroneous drug arrests at a rate [three times] higher than White  
11 Americans";

12 (e) Vendors of colorimetric field drug tests caution that the tests  
13 are recommended only for presumptive purposes absent confirmation  
14 from a crime lab that uses more advanced testing methods;

15 (f) People regularly plead guilty to drug possession offenses  
16 absent confirmation from a crime lab that uses more advanced testing  
17 methods. A plea may be made to avoid prolonged detention while  
18 awaiting advanced testing results from a crime lab. Consequently, the  
19 plea and its collateral consequences burden the person indefinitely, based  
20 on the error-prone colorimetric field drug test.

21 (g) Colorimetric field drug tests are also used in a variety of other  
22 settings in Colorado, including correctional systems, possibly resulting in  
23 unfair disciplinary sanctions. The extent of use in these settings is  
24 unknown.

25 (2) Therefore, the general assembly declares that convening a  
26 working group to make findings and recommendations concerning the use  
27 of colorimetric field drug tests is necessary to improve judicial system

1 outcomes, including preventing wrongful convictions, coercive plea  
2 agreements, and negative correctional outcomes.

3 **SECTION 2.** In Colorado Revised Statutes, **add** part 24 to article  
4 2 of title 2 as follows:

5 **PART 24**  
6 **COLORIMETRIC FIELD DRUG TEST**
