# SB17-129

# **FISCAL NOTE**

FISCAL IMPACT: ☐ State ☒ Local ☐ Statutory Public Entity ☐ Conditional ☐ No Fiscal Impact

**Drafting Number:** LLS 17-0745 **Date:** February 2, 2017

Prime Sponsor(s): Sen. Sonnenberg Bill Status: Senate Local Government

Rep. Arndt; Becker J. Fiscal Analyst: Chris Creighton (303-866-5834)

**BILL TOPIC:** CLERK & RECORDER PRESERVE PLATS ELECTRONICALLY

## **Summary of Legislation**

County clerks are required to store all plats of land and certify that the plat is recorded from the original plat. This bill allows county clerks to preserve a plat in electronic form as long as it is scanned at a minimum resolution of 300 dots per inch.

### **Background**

A plat is a map of a piece of land that is drawn to scale and shows how such land has been divided.

### **Local Government Impact**

This bill potentially reduces costs for counties that choose to store plats electronically. This impact will vary by county depending on the methods used for storage and the number of plats they are able to convert to electronic storage. Cost savings generated can include reduced staff time related to the retrieval and indexing of plats, reduced off-site storage costs, and operating cost savings related to the storage of the plats.

In counties that choose to convert plats to an electronic version, costs and workload may increase initially to perform the electronic conversion. After the electronic conversion, destruction costs could also be incurred, however counties may choose to keep the original plats. Costs related to the electronic storage of plat records such as servers and security may increase in counties that are able to convert a large number of plats to electronic form.

### **Effective Date**

The bill takes effect August 9, 2017, if the General Assembly adjourns on May 10, 2017, as scheduled, and no referendum petition is filed.
