Subject-Proposal for insurance and funding of State run Hospitals

I would like to get an issue on the ballot, whereby any medical entity (hospital, clinic, medical manufacturer, medical service, sales, dentist, insurance company etc.) doing business in the state of Colorado would pay a 5% tax on any sales or service to the state for the purpose of having the state build hospitals around the State with clinics attached to the hospitals. The state would also provide interested parties who would want to sign up to be seen at the state run hospitals/clinics, independent insurance at the cost of one-thousand dollars per year. The 5% tax and insurance premiums for those who sign up would allow for funding of the hospital and hiring of personnel to run those hospitals/clinics. There would also be added benefits such as increased number of hospitals for the next pandemic outbreak and would force other hospitals and medical entities to come in line with the reduced costs these hospitals/clinics would be creating by their operation.

Sincerely

Ronald Leinbach
