A BILL FOR AN ACT

101 **CONCERNING MEASURES TO INCREASE RAILROAD SAFETY.**

Bill Summary

(Note: This summary applies to this bill as introduced and does not reflect any amendments that may be subsequently adopted. If this bill passes third reading in the house of introduction, a bill summary that applies to the reengrossed version of this bill will be available at <http://leg.colorado.gov>.)

The bill requires that, immediately after a railroad notifies the state's watch center in the department of public safety (watch center) of an emergency involving a train, the watch center must notify the public utilities commission (commission) and the office of rail safety (office) of the incident. The commission is required to submit a report to specified committees of the general assembly on the information reported by railroads regarding an emergency involving a train.

with first responders during an emergency situation after notifying the railroad dispatch. A crew member has discretion in determining the appropriate response to the emergency situation, including cutting the railroad crossing. A railroad or a crew member is immune from civil liability and is not liable in civil damages for actions taken in good faith in the course of a response to an emergency situation involving a train.

The bill eliminates the shared authority that the commission, the department of public safety, and the department of transportation had to inspect and investigate railroads and grants the commission alone the authority to inspect, investigate, and regulate the following railroads:

- A class I railroad;
- A railroad operating any line that was used by class I railroads as of July 1, 2024; and
- A passenger railroad.

The bill requires the office to gather, analyze, and assess information, including:

- Data to create a more comprehensive understanding of railroad safety;
- An assessment of the state's ability to respond to a large-scale release of hazardous materials from railroad transportation;
- The best practices for ensuring financial responsibility for response, cleanup, and damages from major rail events, including reviewing best practices from other states; and
- Communication issues impacting railroad lines in the state.

A railroad regulated by the commission is required to pay a fee to cover the costs incurred by the commission and the office in relation to the bill. The commission shall determine a methodology for calculating the fee by rule, but the commission must include specified criteria in the calculation. A railroad regulated by the commission must pay the fee in equal quarterly installments and is subject to penalties and interest if they fail to timely pay the fee.

1 *Be it enacted by the General Assembly of the State of Colorado:*

2 **SECTION 1. Legislative declaration.** (1) The general assembly
3 finds that:

4 (a) The safety and efficiency of Colorado's rail infrastructure is
5 critical to protecting public health, ensuring environmental sustainability,
6 and supporting economic vitality;

7 (b) Railroad transportation is a critical component of Colorado's

1 economy and provides efficient and cost-effective movement of goods
2 across the state and beyond;

3 (c) Colorado's fragile ecosystems, weather extremes, extensive
4 number of hard-to-maintain and difficult-to-access railroad track miles,
5 and number of communities through which railroads operate necessitate
6 a state office of rail safety;

7 (d) The office of rail safety needs the authority and resources to
8 address all railroad safety disciplines, including crossings, track, signal
9 and train control, motive power and equipment, operating practices,
10 compliance, and hazardous materials; ==

11 (e) The establishment of the office of rail safety in the public
12 utilities commission provides a dedicated, state-led approach to rail
13 inspection, enforcement, and risk mitigation. By securing funding for the
14 office, Colorado will be in line with 30 other states across the country that
15 have rail safety programs and will enhance its ability to conduct safety
16 inspections, enforce rail regulations, and coordinate with federal and local
17 partners to prevent accidents and respond effectively to rail-related
18 incidents. Reducing the risk of accidents, derailments, and other incidents
19 associated with railroad transportation lowers costs, improves efficiency,
20 and reduces liability for railroad companies;

21 (f) Railroads should not face multiple fee structures to support rail
22 safety. A new office of rail safety fund should provide a single funding
23 source for the office of rail safety and the regulation of highway-rail
24 grade crossing safety for subject railroads.

25 (2) Therefore, the general assembly declares that Colorado must
26 fund the office of rail safety to fulfill its mandate of ensuring that rail
27 operations in Colorado meet the highest standards of safety and

1 reliability.
