### **Summary of Legislation**

The bill reduces the number of practical work experience hours required to become a registered sprinkler fitter with the Division of Fire Prevention and Control in the Department of Public Safety to a level similar to what is required for a journeyman plumber, from 8,000 hours to 6,800 hours.

### **State Expenditures**

In FY 2016-17, the bill will minimally increase workload in the Division of Fire Prevention and Control in the Department of Public Safety to update its website, rules, and other materials related to sprinkler fitters. This workload can be accomplished within existing appropriations. The division already reviews sprinkler fitter applications for hours worked.

### **Effective Date**

The bill was postponed indefinitely by the House State, Veterans, and Military Affairs Committee on April 5, 2017.
