1 Introduction

In the wake of the 2020 Presidential election, a growing mountain of evidence - including lawsuits, supporting affidavits and declarations, videos, photos, and first-hand testimonial accounts from a variety of state venues, think tank publications, legal centers, videos and photos, public comments, and extensive press coverage - revealed the presence of extensive voting process irregularities and activities. Activities include blatant voter fraud, ballot mishandling, process violations, and voting machine irregularities - all strongly indicating a coordinated and deliberate effort to manipulate the outcome of the election.

Evidence indicates these election process irregularities and activities have extended into the State of Colorado.

2 Proposal Objective

Amend existing state election laws and rules to address and remedy any potential voting irregularities, processes, procedures, and activities that would compromise the integrity of state and federal elections and outcome.

3 Initial Language

Shall the Colorado State Constitution Election Rules (8 CCR 1505-1) and Title 1 of the Colorado Revised Statutes (Elections) be amended to strengthen election laws to prevent voter fraud, mishandling of ballots, elimination of voting process and procedural violations, and elimination of voting machine inaccuracies, for the purpose of ensuring fairness and integrity for all legal voters and an accurate voting result for the State of Colorado?

4 Summary

This proposed ballot initiative is to amend the Colorado State Constitution Election Rules (8 CCR 1505-1) and Title 1 of the Colorado Revised Statutes (Elections) to (1) strengthen existing voter integrity laws through change or the addition of new laws; (2) correct deficiencies in the existing election process; and (3) prevent fraudulent activities from occurring during the election process; each for the purpose of ensuring fairness and integrity in the voting and election processes for all legal voters and people in the State of Colorado.

Specifically, this citizen's ballot initiative proposes to address and remedy the following observed and there for potentially fraudulent election activities:

- (1) Outright voter fraud;
- (2) Mishandling of ballots;
- (3) Voting process violations;
- (4) Voting machine irregularities.

5 Definitions

5.1 Voter Fraud

Includes the large-scale manufacturing of fake ballots, the destruction of legitimate ballots, exploiting the elderly or the infirmed by effectively hijacking their identities and votes, “bad-faith voters” registering as “indefinitely confined” breaking election law to circumvent election integrity photo identification requirements, bribery, the counting of dead voters, ballots cast by ineligible voters such as felons and illegal aliens, ballots counted multiple times, the counting of votes by illegal out-of-state voters, and the miscounting of votes resulting in the number of votes cast exceeding the number of legally registered voters.

5.2 Mishandling of Ballots

Includes the failure to properly check the identification of voters, failure to perform a signature match check, failure to invalidate ballots lacking the outer envelope, broken chain of custody, unauthorized ballot handling or movements including transportation of ballots, accepting ballots without postmarks, and the intentional backdating of ballots.

5.3 Voting Process Violations

Includes the abuse of poll watchers and observers, the violation of absentee ballot rules and state laws, the allowing of non-registered voters to vote, illegal campaigning at poll locations, and the illegal curing of ballots by poll workers.

5.4 Voting Machine Inaccuracies

Includes large scale voting machine counting inaccuracies, and inexplicable vote switching and vote count surges, weighting votes, the use of lower image quality signature verification scanning software than suggested by the manufacturer, and the lowering of the accuracy rate threshold.
