

BIO SCIENCE LABORATORIES, LLC

May 10, 2021

Dear Sponsors,

We are happy to announce that effective March 10, 2021, BioScience Laboratories was acquired by Sotera Health, a leading global provider of mission-critical sterilization and lab-testing and advisory services. BioScience Laboratories will become part of Sotera Health's Nelson Labs business unit.

BioScience Laboratories has worked very hard to earn an outstanding reputation for providing superior customer service, technical expertise, and quality performance. We know that Sotera Health holds the same values and has a stellar reputation. Sotera Health's mission, Safeguarding Global Health[®], aligns perfectly with the work we have performed for years. By joining Nelson Labs, we become part of a world-class testing organization with a global presence and industry-leading thought leaders.

Moving forward, BioScience Laboratories' site in Bozeman will be led by Mike Rahn. Mike joins our team from Nelson Labs, where he serves as the Senior Director of Lab Operations. He brings with him decades of experience working within the contract microbiology testing industry and a great understanding of the importance of quality data. We are very confident in Mike's ability and expertise to be able to continue to provide the data and service you have come to expect. To help ensure this, the team of experts you know, and trust will stay intact. We will continue to work together to deliver industry leading data as we have done for the past 30 years. At this time, BioScience Laboratories will continue to function as a standalone business unit of Nelson Labs; though we will continuously collaborate to ensure the sharing of best practices and to capture the best possible synergies for our customers. Our expertise in analytical testing and clinical trial services will augment Nelson Labs existing strengths in medical device testing and expert advisory services. Our combined strengths will enhance the ability of our customers around the world to bring their products quickly and safely to market.

Nelson Labs' headquarters are in Salt Lake City, UT, USA; however, our operations will stay in Bozeman, Montana, USA. Your contacts at both companies will all remain the same as they are today. We will continue to update you about new services and options as we integrate BioScience Laboratories and Nelson Labs services and systems. If you have questions, please do not hesitate to speak with our Customer Service team.

Sincerely,

Daryl Paulson, Ph.D.
Director, Science
BioScience Laboratories, LLC
