Everyone’s heard the adage “Build tight, ventilate right.” It’s been consistently drilled into us by the best in the industry. But it’s easier said than done; the devil is in the details! How do you ventilate “right”?

Zehnder has thought through the details so you can put your energy into building tight. With our diverse range of the highest-performing ERVs in North America and our complete distribution systems for airtight installation and predictable results, you’ll be delivering like an expert on your most challenging projects. We provide plan review and complete system design!

Ventilate “**right**” with
Zehnder ERVs and
distribution systems!

Ask us how.
