

Care Range Basins

Can be installed to comply to AS1428.1-2021 design for access and mobility requirements

Available with integrated shelves to maximise storage in the bathroom space

Designed with optimal basin waste and tapware landing projections to reduce potential splashing caused by the water stream from the tapware flowing directly into the basin waste

No overflow for increased hygiene

Includes white plug and chrome waste, suitable for hospital applications

Anti-splash rim reduces potential splashing

Optional fully integrated vitreous china Care Shroud provides increased infection control and eliminates potential contraband storage (873170W)
