

End Side Outlet RIGHT or ESO-R with CHUTE LID installed

CHUTE LID Included

ESO-R shown with a R300 Rainhead attached

# ESO-R 300

END SIDE OUTLETS make the transition connection between your box gutter and the overflow device such as a Rainhead or Sump, where you have the exit at the end of the Box gutter.

They come in a Left or Right Hand version and have an outlet size of 300mm that connects directly to a R300 fixed receiver Rainhead or Sump.

The Box gutter end is adjustable to any size from 300mm up to 450mm wide box gutters

Each unit is sold with the CHUTE LID

If at all unsure of just which sized unit you need, or would like a lot more technical data etc, there are detailed information charts and calculators, and also installation instructions available for download on the Dambuster website below.
