

Tractor/Utility Lamps – LED (Extra Heavy-Duty Brackets)

The vibration-damping bracket works like a small shock absorber, keeping the light stable in harsh environments. It uses elastic parts—such as springs, rubber pads, or silicone blocks—to connect the light to the equipment frame. These elements absorb vibrations, reduce impact on internal components like LED boards and lenses, and help extend the lamp's life while maintaining stable performance.

3-1/2" Square Tractor/Utility Lamp (Extra Heavy-Duty)

Extreme Vibration-Resistant Bracket

- 9-32 VDC (3.33A @ 12V)
- 40 Watts (4 x 10W Diodes)
- Aluminum Alloy Housing
- Back also functions as a built-in 'heat-sink'
- Polycarbonate Lens
- Stainless Steel Hardware
- IP69K
- Made with EMC Technology (Electro Magnetic Compatibility), meaning protection against Radio Frequency Interference (RFI)
- Dimensions: 3.43"W x 3.03"H x 3.54"D
- Stud Size: 10mm
- Pedestal Mount

Light Beam Pattern	Lumens	1 PC/PK
Flood Beam (60°)	3600	*725277

4" Square Tractor/Utility Lamp (Extra Heavy-Duty)

Extreme Vibration-Resistant Bracket

- 9-32 VDC (5.0A @ 12V)
- 60 Watts (6 x 10W Diodes)
- Aluminum Alloy Housing
- Back also functions as a built-in 'heat-sink'
- Polycarbonate Lens
- Stainless Steel Hardware
- IP69K
- Made with EMC Technology (Electro Magnetic Compatibility), meaning protection against Radio Frequency Interference (RFI)
- Dimensions: 3.94"W x 3.35"H x 3.54"D
- Stud Size: 10mm
- Pedestal Mount

Light Beam Pattern	Lumens	1 PC/PK
Flood Beam (60°)	5400	*725278
