

Primary Wire

GPT Wire

Techspan® GPT (General Purpose Thermoplastic) primary single conductor wire is manufactured using 100% pure copper conductors with a PVC compound that resists chemical, abrasion and heat, up to 80°C (176°F). Jacket surface is smooth enough for easy, clean wire stripping. Ideal for automotive, truck, trailers, tractor, boats, and other point-to-point, low voltage applications (up to 60 Volts). Type GPT to SAE specification J1128 meets the standard for OEM or replacement applications for general purpose requirements. In chart headings below, O.D. means Outside Diameter.
