

Dump Body-Up Warning Indicator Kits

Dual Warning – Buzzer & Red LED Pilot Light

- Both Kits contain **Dual Warning Indicators (70dB Buzzer & Red LED Pilot Light)** to warn drivers of raised dump bodies, reducing the chances of overhead collisions with infrastructure.
- Mounts to the frame of the vehicle to warn the driver from a proximity when the dump body is raised
- IP68 rated, the dual indicator has a working temperature range of -40°C to 85°C.
- Made with 304-Stainless-Steel housing for superior corrosion resistance and durability
- Kits come complete with a dual indicating device (70dB Buzzer and a Red LED), user choice of style of switch (pre-installed on a mounting bracket with a pre-assembled Weather-Pack Connector), body-up switch stop set, a 20FT wire harness (also with a pre-assembled Weather-Pack Connector) in addition to hardware and accessories for **quick and easy installation**
