

Circuit Breakers

Battery Disconnect/Circuit Breakers (2-in-1)

These 2-in-1 Circuit Breaker/Disconnect Switches are designed with durable thermal housings that offer reliable circuit protection, even in harsh environments. Engineered to meet rigorous **IP67** standards, they operate smoothly under demanding conditions, making them ideal for a wide range of automotive and electrical systems. With a maximum voltage rating of 48VDC, they ensure dependable performance across various applications. User-friendly design allows for quick disconnection and reset, providing added convenience for both automotive enthusiasts and professionals working on cars, motorcycles, and marine equipment. **Compliant to SAE J553, J1171. Ignition Protected.**
