Heavy-Duty Cable Tie Screw Mounts

Heavy-duty screw mounts are purpose-built to deliver exceptional strength and durability for securing large or heavy cable bundles in demanding applications. Designed for use with heavy-duty cable ties, they provide maximum support and long-term reliability, while the **impact-resistant, heat-stabilized UV black nylon** construction ensures superior performance in harsh environments. The slanted slot design allows cable ties to be easily inserted over bolts, simplifying installation, and enables quick addition or removal of bundled items without removing the mount itself. Engineered to withstand repeated high impacts, vibration, extreme temperatures, and weather exposure, these screw mounts are an ideal solution for heavy equipment OEM and MRO industries where rugged performance is essential. Contact Techspan if you require these mounts for 175LB or 250LB grade Cable Ties.
