

LA CROSSE®
TECHNOLOGY

14.2 - Inch Insta-Set Bluetooth® Wall Clock

MODEL: 404-4536

POWER UP

1. If your area follows Daylight Saving Time changes, set the DST switch to ON for automatic adjustments in the spring and fall. Otherwise, set this to OFF.
2. Insert 1 AA Alkaline battery according to the polarity markings.
3. The hands will begin to spin. Wait until they stop at the 12:00 position. Then, Bluetooth® pairing will start.
4. Open the Bluetooth® settings on your mobile device and select **LT CLOCK**.
5. The clock will automatically set to your mobile device's time and begin running.

CONTINUED CALIBRATION

Your Insta-Set Bluetooth Wall Clock will automatically sync with your mobile device at 4:00am, 12:00pm, and 8:00pm daily to remain accurate down to the second without any manual intervention.

MANUAL SETTING (OPTIONAL)

If you wish to set your clock manually without using a mobile device, press and hold the **M-SET** button until the correct time is set. The clock will then run as a normal Quartz clock.

To re-synchronize with Bluetooth®, press the **CAL** button once to place the clock in pairing mode. Access your mobile device's Bluetooth settings and select **LT CLOCK** to enable pairing. Once paired, the clock will set to the time on your mobile device.

BATTERY CHANGE

When replacing the battery, the clock should automatically synchronize with your previously paired mobile device via Bluetooth®, updating to the correct time momentarily. If the time does not update, use the following RESET instructions.

Note: The hands may rotate into the 12:00 position before adjusting to your current time.

RESET

If your clock is not working correctly or if you wish to change the mobile device it's paired to, press and hold the **RESET** button until the hands begin to spin. After this, follow steps 3-5 on page 2 to pair the clock with your mobile device.

- **Clock Face Dimension:** 13.15 inch (33.4cm) Diameter
- **Dimensions:** 14.17 inch (36.0cm) Diameter x 1.89 inch (4.8cm) Depth

CARE AND MAINTENANCE

When batteries of different brand or type are used together, or new and old batteries are used together, some batteries may be over-discharged due to a difference of voltage or capacity. This can result in venting, leakage, and rupture and may cause personal injury.

- Never mix Standard, Alkaline, Lithium and Rechargeable Batteries.
- Do not mix old and new batteries.
- Always purchase the correct size and grade of battery most suitable for the intended use.
- Always replace the whole set of batteries at one time, taking care not to mix old and new ones, or batteries of different types.
- Clean the battery contacts and also those of the device prior to battery installation.
- Ensure the batteries are installed correctly with regard to polarity (+ and -).
- Remove batteries from product during periods of non-use. Battery leakage can cause corrosion and damage to this product.
- Remove used batteries promptly.
- For recycling and disposal of batteries, and to protect the environment, please check the internet or your local phone directory for local recycling centers and/or follow local government regulations.

FCC STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution!

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC RF exposure statement: The equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance between 20cm the radiator your body.
