BIG SHOT™ AND THROWING ACCESSORIES

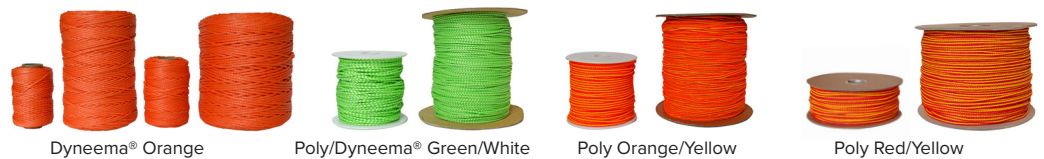

The Big Shot™ slingshot is a high-performance tool that can launch a throw bag and line over tree limbs with remarkable ease, covering distances of up to 150 feet. For safety and performance, we highly recommend using the Big Shot with Jameson FG or JE poles, configured as either two 4 ft. poles or one 4 ft. and one 6 ft. pole. It is essential to begin with a Base Pole in all configurations.

Please note that the Big Shot is not suitable for use with telescoping poles.

Part Number	Description
