## PROFESSIONAL HOLLOW CORE FIBERGLASS POLES

### FG-SERIES HOLLOW CORE FIBERGLASS POLES

#### Preferred for Tree Trimming and Aerial Construction

Jameson's strongest and most popular pole is lighter than the JE series, offering greater control and exceptional bending strength.

- Polymer protective surface veil prevents fiber blooming at surface due to abrasion or ultra-violet light.
- Preferred choice for telecommunication linemen, arborists and landscapers.
- Extension poles are equipped with a male ferrule on one end and a female ferrule on the opposite end.
- .125" Wall Thickness, 1.25" Pole Diameter, 2.4 lbs. (Based on 6' extension pole).

#### Batch tested to 100KV per foot for five minutes
