

TELESCOPIC ALUMINUM POLE KITS

COMPATIBLE WITH ALL JAMESON ALUMINUM FERRULE ATTACHMENTS

192 in.

144 in.

83 in.

Introducing our premium telescopic poles, spanning from 83 to 192 inches and crafted from durable aluminum. Both sizes feature a unique tri-oval (non-circular) cross-section designed to minimize flex and a double-lock system to ensure a secure hold.

The female ferrule end makes them compatible with all Jameson attachments, making these the most versatile options available.

- Telescopic design: 83" to 192"
- Lightweight (12' Pole 3.5 lbs. & 16' Pole 4.5lbs)
- Tri-oval, aluminum construction minimizes flexing at full extension
- Double-lock system ensures strong, set-length hold
- Comfort and ergonomic support with the cushioned grip handle
- Integrated slide stop prevents sections from separating
