

JE-SERIES FOAM CORE FIBERGLASS POLES

JE FOAM CORE POLES

Preferred For Aerial Construction & Vegetation Management

The JE Series Fiberglass Base Poles feature a solid foam core, providing 2½ times the strength of wood. Their high-visibility polymer coating prevents fiber blooming and prevents internal debris and moisture buildup, ensuring long-lasting electrical protection.

- Ideal for aerial construction and Vegetation Management, they allow quick coupling.
- Foam core prevents debris and moisture build up inside pole and adds extra hoop strength and rigidity
- Polymer protective surface veil prevents fiber blooming at surface due to abrasion or ultra-violet light
- High visibility safety yellow color
- Meets requirements of OSHA Subpart R 1910.269(j)(1)(i):
Individually tested to 100KV per foot for five minutes
