Jaw Opening	4.125"

Cutting Capacities

Aluminum	4.125"
Telecommunication	4.125"
Lead Sheath	2.5"
ACSR	Do Not Cut

The **SP-105YC** is designed to cut copper and aluminum cables as well as lead-sheathed telecommunication cables. The extremely large jaws and scissor-type blades allow for easy cutting of large underground cables. The sidebar handle allows the user to stabilize and balance the tool.

This head has an open jaw design that allows the user to scoop up cables that are against a wall, in hard to reach areas and on the ground.

NOTE: DO NOT CUT STEEL.
