

TiiGER®

PROFESSIONAL SERIES DIGGING TOOLS

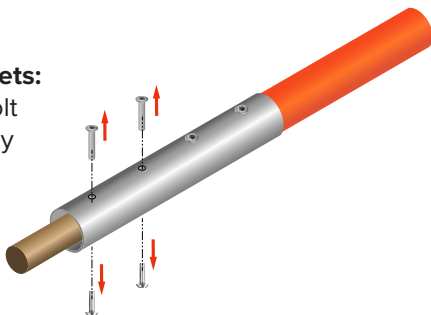

ASSEMBLY INSTRUCTIONS

1

Remove the Barrel and Bolt Sets:

Unscrew the two barrel and bolt sets near the end of the joint by hand. No tools are required, as they are finger-tight.

2

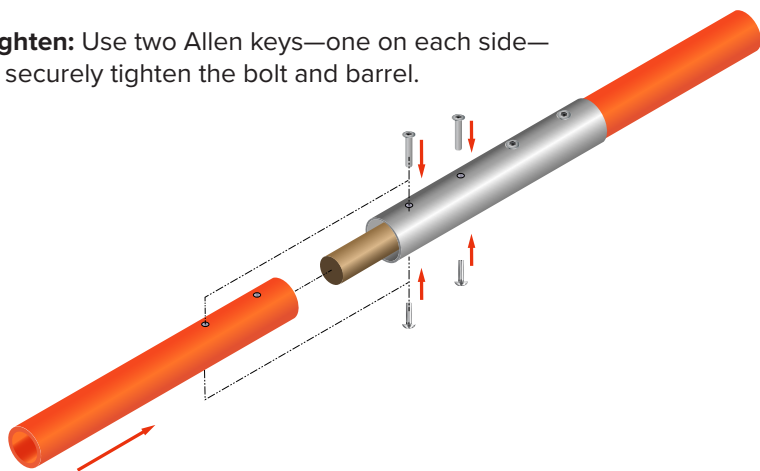

Insert the Extension Pole: Slide the extension pole into the base pole, ensuring the holes in the pole and steel tube are properly aligned.

3

Insert Barrel and Bolt: Push the barrel into one end and the bolt into the opposite end. Start threading the bolt by hand.

4

Tighten: Use two Allen keys—one on each side—to securely tighten the bolt and barrel.
