Insert

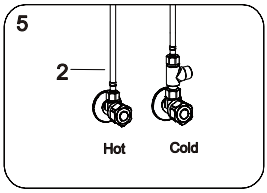

2
C
D
E

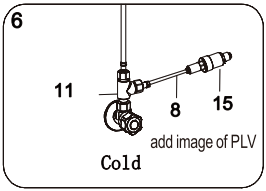

Use a Phillips head screw driver to tighten the 2 screws. See Fig 3

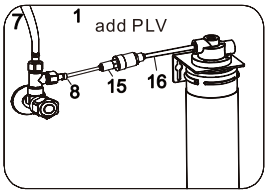

Add flow Restrictor into T Adaptor where it connects to mains water. Side with small O-Ring on flow restrictor faces towards mains water supply. Connect hose (1) onto T adaptor (11) tighten firmly.

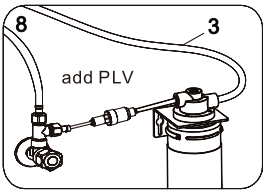

Add Flow restrictor into hose 2 (small O-Ring faces towards mains water supply) Connect Hose (2) to mains water supply.

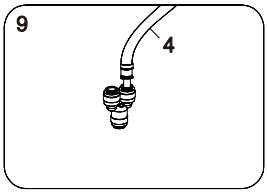

a 6mm dai pipe supplid connect onto PLV(15) and T adaptor(11)

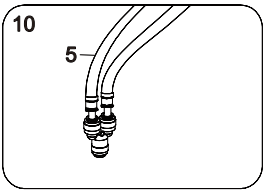

a 6mm dia pipe supplied connect onto filter inlet and PLV

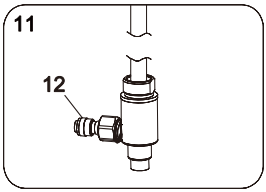

Connect hose(3) onto filter outlet

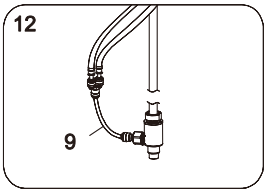

Connect hose 4 to Y Adaptor (mains water supply)

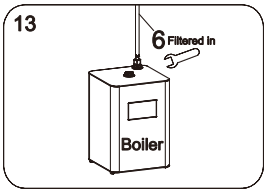

Connect Hose 5 to Y Adaptor . (Filtered Ambient water)

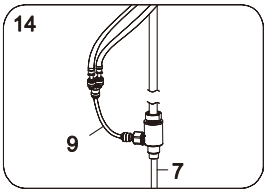

Attached 1/4" quick union

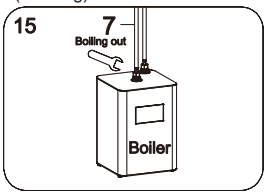

Connect Hose (9) where indicated

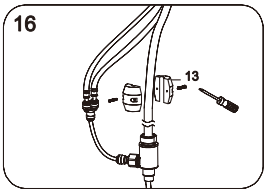

Connect hose(6) onto boiler inlet (blue ring)

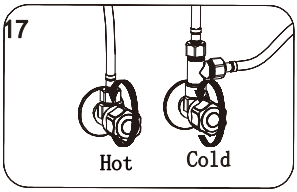

Fit hose (7) onto it as diagram shown

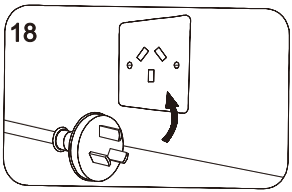

Connect Hose (7)to Red indicator on Boiler. Please ensure clear washer is added to the connector.

assemble counter weight (13) on this pipe

Turn on water supply and check all connections for leaks. Run 20 litres of water through. Note: Stop taps on Hot and Cold mains must be installed

Do not turn on Power. You must run water through the filtered Ambient side to clear filter for 5 minutes. Then fill Boiler (hold down the boiler handle to fill.)Then plug in and turn on.

Note: Installation Must Be As The Plumbing Code Of Australia

COMMISSIONING

It is the installer's responsibility to ensure that your 4IN1 TAP Pull out is fitted following all prevailing national standards and local water laws. It is important to ensure that the plumbing part of the installation is completed and has been tested to ensure it is free of leaks before any electrical connection is made to the unit. Do not install the appliance in rooms where the temperature may drop to 0°C. The Tap or Boiling Water Tank has been stored prior to installation in a place where the temperature could have fallen below 0°C, Allowed to acclimatise at room temperature for a minimum of one hour prior to connection to a water supply.

Before installing the 4IN1 TAP Pull out it is essential to thoroughly flush through the supply pipes in order to remove any impurities from your system. Failure to carry out this simple procedure could cause problems or damage.

NOTE: Minimum supply pressure for the cold water is 150 KPA and maximum is 500 KPA

You must install isolation valves to both the hot and cold feed pipes in an accessible position. This will help prevent premature failure and ease any future maintenance. All parts should be removed from their packaging and inspected prior to installation.

This hot water tap requires a 35mm diameter tap hole; if replacing an existing tap, remove the old tap & clean the ends of the feed pipes using wire wool; the tap hole area should also be free from dirt and sealant.

Positioning the Boiling Water Tank unit and the filter

- The reservoir/heater unit should be positioned on a flat level surface such that:
- There is a minimum air-space of 150mm to each side of the reservoir/heater unit.
- There is a minimum air-space of 25mm to the rear of the reservoir/heater unit.
- Access to any stopcocks, valves, waste traps or other plumbing fittings that may require service is not impeded.

The front display and operating controls are readily accessible and visible.

1. All connection pipes can be installed without stretching or twisting them.
2. Access to the electrical power socket to be used for this appliance is not restricted.
3. Ensure a fused 10AMP power supply within reach of the power cable, Ensure cable is not stretch. If it is necessary to extend the power cable to reach the nearest suitable socket, this must be done by an electrician.

4. The filter is supplied pre-assembled to its plastic wall bracket. This should be mounted in a convenient location on a wall or cabinet side, taking into consideration the length and routing of the connecting hoses.

Boiler Operation

DO NOT SWITCH ON THE HOT WATER TANK at this stage until the following has been carried out.

1.Run the FILTERED ambient WATER for a minimum of 5 minutes to activate and clean the carbon agency inside the Anti-scaling filter before starting the Hot Water Tank.

2.Then Run BOILING WATER for a minimum of 5 minutes.

By taking this small step will prevent any carbon dust from the filter. If there is any black coloured water it is harmless and it will clear itself by running the water.

Open all installed water valves to allow water to flow to the 4IN1 TAP Pull out

For the boiler Turn the spring-back hot water tap handle against its spring and hold there until the water flows from the tap spout which indicates the taps reservoir is full.

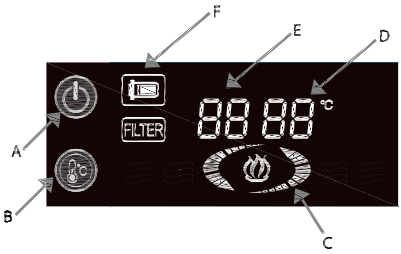

Allow the hot water handle to spring back to its rest position and check all the connections for water tightness and absence of leaks.

Any leaking joints must be tightened and the surrounding area dried before connecting the power supply.

ONLY connect the electricity supply to the Hot Water Tank at this stage. Insert the plug into the electricity socket and switch on.

How to control the INSTANT BOILING WATER TANK

A: On/Off Key
B: Temperature Key
C: Heating Display
D: Set Temperature Indicator
E: Actual Temperature Indicator
F: Filter Life Indicator

Touch the “on/off” key (A) once to switch the heater on. Press again to turn off.

Scroll through temperature settings using temperature key (B), leave on desired temperature, indicator will flash three times and set temperature indicator (D). Filter life indicator (F) will appear when it is time to change your filter.

A reminder will sound after 6 months and again after 12 hours from the first sound to reset, replace your filter and hold the temperature key (B) for 10 seconds until a single beep sounds and the filter logo will return to full. KEYS At all times, the “Actual Temperature” indicator (E) shows the actual temperature of the water in the Boiling Water Tank. When the water is heating up, indicator (C) will illuminate and the “Heating” Display (C) will animate. Care and Maintenance Important:

The Warranty Is Void If The Water Filter Is Not Replaced At A Minimum Of 6 (six) Months From Its First Use. If The System Is Use In The Hard Water Area, Customer Should Consider To Replace The Water Filter In A Shorter Period Before The Six Months Period.

Do Not Perform Maintenance Or Cleaning Of The Boiling Water Tank Without First Switching Off The Electricity Supply. Cleaning Should Be Carried Out With A Non-abrasive Cleaner. Any Abrasive Cleaner (including Cif) Will Scratch The Surface And Could Erase The Marking. Exterior Of Your Boiling Water Tank Can Be Cleaned Effectively By Using A Damp Cloth And Mild Detergent. Finish Off By Drying With A Clean Cloth.

Replacement Filters available through retailer

SPECIFICATIONS

Supply	230V ~ 50Hz
Power	1500W
IP rating	X4
Tank Capacity	2.4 litres
Immediate draw off	1.7 litres
Minimum supply pressure	0.15 MPa (1.5 bar)
Minimum supply pressure	0.5 MPa* (5 bar)
Hot and cold connections	3/8"BSP
Approvals	RCM,CE

Information For Correct Disposal Of The Product In Accordance With The Directive 2002/e.

At The End Of Its Working Life This Equipment Must Not Be Disposed Of As Household Waste.it Must Be Taken To A Local Authority Waste Collection Centre Or To A Dealer Providing This Service.disposing Of Electrical And Electronic Equipment Separately Enables Its Components To Be Recovered And Recycled To Obtain Significant Savings In Energy And Resources. In Order To Underline The Duty To Dispose Of This Equipment Separately, The Product Is Marked With A Crossed Out Dustbin.

*If pressure is above 0.5Mpa(5bar) then a pressure reducing valve is required.

Guarantee

This product is covered by a standard parts or replacement warranty for 5years replacement,3years parts and labour.
If there is a manufacturing defect within the warranty period, we will send spare parts, repair and return the unit or, at our discretion, supply a replacement product.
Incorrect installtion, frost damage, the consequences of limescale deposits or failure to follow correct operating and maintenance instructions are excluded. Consequential costs such as labour charges or damage to fittings and surrounding are expressly excluded.

Commercial Warranty is 12 months parts and Labour.

If you experience a problem with this product you should firstly contact our service department before taking further action. Experience has shown that issues can often be resolved without the need to return or uninstall the product.

Filter must be changed every 6 months. If it is not changed the warranty is voided. Only suitable for mains water connection. Tank water systems void all warranties. Only intended for use indoors. Warranty will be voided if the tap is installed outside.

SCOPE OF USE TO INDICATE COMPLIANCE WITH THE LEAD-FREE REQUIREMENTS OF THE NATIONAL CONSTRUCTION CODE VOLUME 3.

Important Notice On Boiler

Caution: Do Not Use With Water That Is Microbiologically Unsafe Or With Water Of Unknown Quality Without Adequate Disinfection Before Or After The System. Systems Certified For Cystreduction May Be Used On Used On Disinfected Water That May Contain Filterable Cysts
This Product Can Cause Harm If Installed Incorrectly, The Installation Of Your Instant Hot Water Tap Must Be Carried Out By A Professional Installation Service.

SAFETY INSTRUCTIONS:

Alert symbols identify important safety information to make you aware of potential hazards that can cause property damage or in the severest cases, serious injury or death.

This product is not for outdoor use!

A standard 220/240v grounded 10 amp switched electrical outlet is required under the sink for the appliance electrical power.

The power outlet must be connected to the 10amp fused plug supplied.

Do not plug in the tank until all water connections have been checked, watertight and the tank has been filled. The tank is filled once water starts to pass out the tap spout.

It is recommended before using the tank, to flush through several litres of water to remove any air in the system when installing.

Please note, that in order to avoid having pressurized boiling water and to comply with Australian bylaw, this is an open vented system. In order to ensure the instant hot water tank delivers the highest quality drinking water and is protected from limescale build up, the water filter must be replaced every 6 months. Failure to do so will invalidate your product warranty.

The instant hot water tank is only intended for use with compatible taps. Using this tank with any other tap will invalidate the warranty.

The instructions are only intended as a guide, if there is any doubt then please contact a certified tradesperson.

Warning-for Continued Safety Of This Appliance It Must Be Installed, Operated And Maintained In Accordance With The Manufactuer's Instructions.

For Open Vented Water Heaters, An Instruction That Any Vent Or Outlet Intented To Remain Open To The Atmosphere Shall Not Be Obstructed.

For Controlled Water Heaters, The Rated Power Input, In Kilowatts, Or The Total Nominal Gas Consumption In Megajoules Per Hour, As Appropriate.

For Uncontolled Water Heaters(e.g.storage, Auxiliary),maximum Working Pressure, In Kilopascals, And Maximum Energy Input, In Kilowatts Or Megajoules Per Hour.

For Auxiliary Uncontrolled Water Heaters, Maximum Rated Output, In Kilowatts Or Mejajoules Hour.

Warning-this appliance May Deliver Water At High Temperature, Refer To The Plumbing Code Of Australia(pca) or New Zealand, Local Requirements and Installation Instructions To Determine If Additional Delivery Temperature Control Is Required.

+ To prevent against electrical shock do not place the hot water tank near or in water or other liquids and install on a flat surface.

+ Do not install in environments above 35ºC or exposed to freezing.

+ Can be used by children 12+ or people with learning difficulties if they have been given supervision or instructed on the hazards involved. Do not operate or install electrical connections with wet hands.

+ Do not install the appliance if it appears damaged in any way.

+ Only use power lead supplied with the product. If the power lead is damaged, stop using immediately and contact customer services for a replacement.

+ Do not remove tank casing, this product is not serviceable and should be returned to the manufacturer in the event of a fault.

+ Do not modify the tank or remove the plug as this will invalidate the warranty and could cause serious injury. Designed for Australian 3 pin socket only.

+ If the unit is unused for extended periods of time it should be unplugged, drained, re-filtered and refilled.

+ The tank and water tank can be cleaned with a lint free damp cloth. Do not use any abrasive or corrosive cleaning products as this will damage the surface of the product.

+ Replace the filter every 6 months.

Important Notice On Boiler

Below is a list of some of the possible malfunctions.
If the problem cannot be resolved as described, contact the dedicated customer care line(details on back cover).

PROBLEM	POSSIBLE CAUSE	WHAT TO DO
"Set temperature"indicator flashed "E3"	Insufficient water in the tank	Prime the installation as described in the installation instruction below
Water and Steam is spitting from the instant hot water tap spout.	Unit is boiling.	Turn the instant hot water tap handle on and release the water. Adjust the water temperature on the display to a lower setting. Check Aerator not blocked.Re-Prime Bladder to allow correct operation.
Water is not hot.	The electronic instant hot water appliance is unplugged. The electronic display has not been powered up.	Turn the instant hot water tap handle on and release the water. Adjust the water temperature on the display to a lower setting. Check Aerator not blocked.Re-Prime Bladder to allow correct operation.
Water is too hot.	Water temperature setting on display panel is set to high.	Re-set the temperature to the required temperature and confirm the heating up
Water is dripping from the instant hot water tap spout.	The expansion chamber isn't draining the system correctly due to very small draw off of water.Blockage/Restriction after tank.	Draw off 0.5L of water to clear and prime the system. Avoid less than 150ml draw offs of water. Check for kinks in silicon tube. Ensure silicon tube is cut to optimum length. Remove and clean the aerator.
Slow Flow from the spout.	The water filter maybe clogged from impurities in the inlet mains water Blockaged/Restrition after tank.	The water filter must be changed every 6months; Failure to do this may invalidate your warranty Draw off 0.5L of water to clear and prime the system, Avoid less than150ml draw offs of water. Remove and clean the aerator.
Water does not flow immediately	The electronic instant hot water appliance is designed for non-pressurised operation and there will be slight delay till the near boiling water appears.	After a large volume of water has been drawn off there may a slightly longer delay in the water appearing from the instant hot water tap spout.
No Water flows.	Water valves have been turned off. Inlet pipes have become twisted or blocked.	Turn on all the water valves. Ensure the pipes are not twisted or kinked to restrict the flow.
E4		Please call Peppy Taps AUS: 0391220716 NZ: 0800434756
E8	Boiler has over heated	Turn off for half an hour to allow to cool. Please check correct hoses are connected to inlet and outlet of boiler

Important Notice On Boiler

1.Safety notes

1） This appliance is not intended for use by persons(including children) with reduced physical sensory or mental capabilities, or lack of experience and knowledge, unless they have been
given supervision or instruction concerning use of the appliance by a person responsible for their safety.
Note: Children should be supervised to ensure that they do not play with the appliance

2) If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.

3) The instructions for appliances connected to the water mains by detachable hose-sets shall state that the new hose-sets supplied with the appliance are to be used and that old hose-sets should not be reused.

2.Product use

1).Only suitable for indoor use

2).Do not install and use It In ambient temperature exceeding 35°celsius.

3).Do Not install and use the machine in high temperatures and humid environments.

WARNING: TO AVOID A HAZARD DUE TO INSTABILITY OF THE APPLIANCE, IT MUST BE FIXED IN ACCORDANCE WITH THE INSTRUCTIONS.

WARNING: KEEP VENTILATION OPENINGS, IN THE APPLIANCE ENCLOSURE OR IN THE BUILD-IN STRUCTURE, CLEAR OF OBSTRUCTION.

WARNING: DO NOT USE MECHANICAL DEVICES OR OTHER MEANS TO ACCELERATE THE DEFROSTING PROCESS, OTHER THAN THOSE RECOMMENDED BY THE MANUFACTURER.

WARNING:WHEN POSITIONING THE APPLIANCE, ENSURE THE SUPPLY CORD IS NOT TRAPPED OR DAMAGED.

WARNING: DO NOT LOCATE MULTIPLE PORTABLE SOCKET-OUTLETS OR PORTABLE POWER SUPPLIES AT THE REAR OF THE APPLIANCE.

Warning:Installation of the Boiler with Filter is only permitted in frost-free rooms, adequate ventilation must be ensured.If necessary, provide ventilation grilles in the front of the lower cabinet.

Care & Maintenance

Important: Do not perform maintenance or cleaning of the boiling water tank without first turning off and unplugging the power point.
Cleaning should be carried out using a non abrasive cleaner. Any abrasive cleaner will scratch the surfaces and potentially take off the markings.
For the tap do not use citrus based cleaners. We recommend using warm water with a cloth. Particularly for matte black taps as it will remove the colour and this is not covered under warranty.
