

# ASSEMBLY AND INSTALLATION INSTRUCTIONS

**WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER PRIOR TO INSTALLING OR SERVICING THIS FIXTURE.**

**NOTE: Before installing, consult local electrical codes for wiring and grounding requirements.**

## Installation Steps

1. Carefully unpack your new fixture and lay out all the parts on a clean surface. Take care not to lose any small parts necessary for installation.
2. Pull all wires through down rod, down rod coupler, canopy plate, canopy and crossbar. Secure the crossbar to the outlet box by threading the two outlet box screws through the key holes.
3. Make wire connections: Attach ground wire to building ground wire using a wire nut or attach them to the mounting plate with a green ground screw.
  - **FOR DIMMING:** If using a dimmer, follow wiring instructions enclosed with dimmer. Double check wiring. Tuck the wire connections neatly into the junction box.
  - **FOR NON-DIMMING:** If not using a dimming switch, with wire nuts, cap off purple and gray wires individually. Wire positive wire with positive wire, negative wire with negative wire. Double check wiring. Tuck the wire connections neatly into the junction box.
4. Slide canopy and canopy plate over threaded pipe. Secure canopy set and swivel ball hanger by tightening ring below canopy. Install down rod to coupler. Fixture should be secure against ceiling.
5. Install diffuser by inserting it at an angle into the fixture until it is completely inside. Carefully lower the diffuser until it sits flat and level against inside ring. Install finial.
6. Turn power back on at fuse or circuit box.
