

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER PRIOR TO INSTALLING OR SERVICING THIS FIXTURE.

NOTE: Before installing, consult local electrical codes for wiring and grounding requirements.

Installation Steps

1. Carefully unpack your new fixture and lay out all the parts on clean surface. Take care not to lose any small parts necessary for installation.
2. Secure the Universal mounting plate with the long j-box screws using the outer slots like shown. The Universal Mounting Plate contains several pairs of threaded holes. Find the pair of holes that match the hole spacing in your fixture. Adjust the universal mounting plate so those pair of holes are horizontal.
3. Guide wires from fixture through the wall plate.
4. Make wire connections: Attach ground wire to building ground wire using a wire nut or attach them to the mounting plate with a green ground screw. Connect the orange connector from the fixture mounting bracket to the orange connector from the fixture.
 - **FOR DIMMING:** If using a dimmer (not included), follow wiring instructions enclosed with dimmer. Double check wiring. Tuck the wire connections neatly into the junction box.
 - **FOR NON-DIMMING:** If not using a dimming switch, with wire nuts, cap off purple and gray wires individually. Wire positive wire with positive wire, negative wire with negative wire. Double check wiring. Tuck the wire connections neatly into the junction box.
5. Secure the wall plate and the fixture mounting bracket to the universal mounting plate by installing the two mounting screws. Slide fixture over the fixture mounting bracket while carefully tucking the mated orange connectors into the cavity of the fixture. Secure with the fixture screw.
6. Turn power back on at fuse or circuit box.
