

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER PRIOR TO INSTALLING OR SERVICING THIS FIXTURE.

NOTE: Before installing, consult local electrical codes for wiring and grounding requirements.

Installation Steps

1. Carefully unpack your new fixture and lay out all the parts on clean surface. Take care not to lose any small parts necessary for installation.
2. Separate mounting plate from fixture body by loosening the four screws. Do not remove them. Install mounting plate to J-box with j-box screws.
3. Make wire connections: Attach ground wire to building ground wire using a wire nut or attach them to the mounting plate with a green ground screw.
 - FOR DIMMING: If using a dimmer (not included), follow wiring instructions enclosed with dimmer. Double check wiring.
 - FOR NON-DIMMING: If not using a dimming switch, with wire nuts, cap off purple and gray wires individually. Wire positive wire with positive wire, negative wire with negative wire. Double check wiring.
4. Tuck the wire connections neatly into the junction box.
5. Install fixture to mounting plate and tighten the four screws that were loosened in step two. Fixture should be flat and secure against wall.
6. Align diffuser just above center of fixture and slide the diffuser down the front of the fixture body to catch the four retaining clips. Diffuser should be sitting securely against fixture body and flat on shelf-like detail.
7. Turn power back on at fuse or circuit box.
