

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER PRIOR TO INSTALLING OR SERVICING THIS FIXTURE.

NOTE: Before installing, consult local electrical codes for wiring and grounding requirements.

Installation Steps

- Carefully unpack your new fixture and lay out all parts on a clean surface. Take care not to lose any small parts necessary for installation
- Feed light assembly wires through metal shade and attach with washer and hex nut
- Attach conical fitting
- Attach stems - Determine length needed for installation. Feed Black/Red wires through first stem, then attach stem to conical fitting. Feed wires through the next stem then attach stem to the first stem and so on until the last stem is attached
- Attach canopy to top stem
- Connect driver inside canopy - Refer to driver label for identification
 - Connect Black wire (negative) from light fixture to Output Black wire (negative) on driver
 - Connect Red wire (positive) from light fixture to Output Red wire (positive) on driver
- Attach mounting plate to j-box - Feed building wires through center hole in mounting plate and attach to j-box using j-box screws
- Raise fixture to make wire connections
 - Attach ground wire to building ground wire using a wire nut
 - Attach White (neutral) wire from driver to White wire from building using a wire nut
 - Attach Black (hot) wire from driver to Black wire from building using a wire nut
- Tuck wire connections inside j-box and place canopy over mounting plate and secure with screws provided
- Turn on power at fuse or circuit box and enjoy
