

LOGICAL COLOR DARKJET HEAT TRANSFER INKJET PAPER

Product Description

DarkJET is a soft, 4.5 - 4.8 mil, matte finish, adhesive-backed inkjet printable thermal transfer film on a kraft coated release liner. This is a universally printable paper suitable for use with solvent, eco-solvent and aqueous (dye or pigment) inkjet printers, and LED laser printers.

For best results, use with LXi software and a contour-cutting vinyl cutter

Suitable For

Cotton, polyester, acrylic and blended garments. For best results, use 100% cotton garments. DarkJET is not a PVC film and is compliant with CPSIA guidelines.

Application & Recommended Settings

- 1) Design the image "right reading" (DO NOT MIRROR) and send to print device.
- 2) For contour-cut decals, use a standard 45° blade with approximately 70 grams of force (Vinyl Express Qe or Q Series or Graphtec users should set force at 13).
- 3) Weed and mask with low-medium tack heat transfer tape such as Siser TTD EasyMask or Logical Color ClearMASK LT.
- 4) Pre-press the garment for 5-10 seconds to remove excess moisture, then press at 375°F (150° - 170°C) for 20-30 seconds with medium pressure. Peel Cold.

*Don't use sign transfer tapes. Standard vinyl transfer tape is not recommended

Maintenance

Washing Instructions: For best results, wait 24 hours before first washing. For first laundering, wash inside-out separately in cold water. Remove garment from washer as soon as possible and tumble dry on warm. Do not bleach! Iron shirt inside out. Do not iron the transfer.

Storage: Store your DarkJET inkjet paper in a cool dry place away, avoid exposure to excessive humidity

Caution

These recommendations are based on the manufacturer's test data. We suggest you test with your own materials before beginning full scale production and sales.

ORDERING INFO

Part Number:	Description	Part Number	Description
MET-DARKJET-85X11-50	8.5" X 11" sheets, Qty 50	MET-DARKJET-11X17-50	11" X 17" sheets, Qty 50

LOGICAL COLOR DARKJET HEAT TRANSFER INKJET PAPER

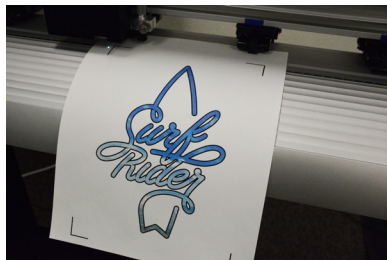

Printer Settings

Printer	Media Settings	Print Mode
Epson	Plain	Photo
lexmark	Plain	Best
HP	Plain	High
Canon	Photo Paper Plus Glossy	Standard

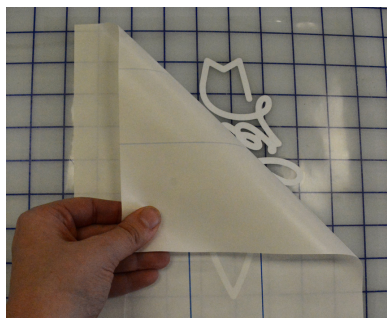

Cutter Settings

Cutter	Force
Vinyl Express Rogue	70
Vinyl Express Rogue Plus/Pro	70
Vinyl Express Qe6000	13
Vinyl Express Q Series	13
Graphtec	13

All settings are just recommendations. Users should conduct their own tests before using. The speed should be slowed. The slower speed will give the best cut quality.

If you have more questions about contour cutting on your Rogue, scan this QR Code with your smart phone.

If you have more questions about contour cutting on your Q-Series, scan this QR Code with your smart phone.
