The fastest way to get started is to watch the online Setup Video.

1.

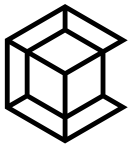

Assemble the stand.

If you purchased the M24 or M60, you have a stand with your cutter. The online video shows how to put the M24 together, but the same video can be used for the M60.

2.

Install the software.

Your package includes a sealed envelope with instructions on how to download Create Space or LXI. The setup videos also go over how to install your software.

Create Space

3.

Use your smart phone to scan the QR code for your software. The code will take you to our tech support blog over the Create Space or LXi tutorials and training videos. This blog will help set up and answer questions that you may have about your software.

Scan this code for Create Space
