 c 2x	 d 1x	 e 4x		
		 f 10x	 g 6x	 h 8x
 i 6x	 j 6x	 k 6x		

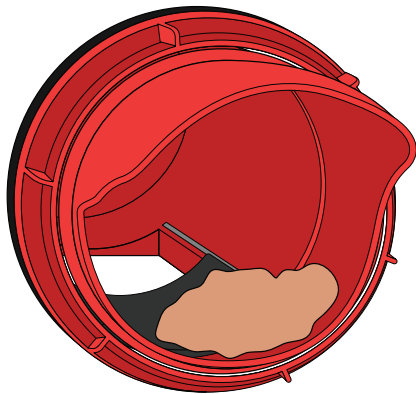

DETERMINING FEEDER HEIGHT

The bottom of the feed port should be at your smallest chicken’s shoulder-height.

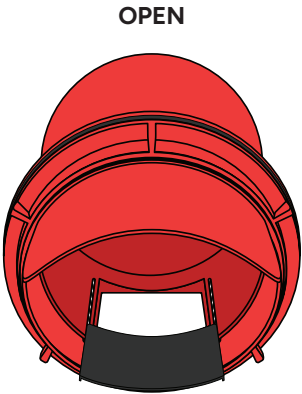

TRAINING CHICKENS TO USE THE FEEDER

IMPORTANT:
YOU MUST REMOVE THE OLD SOURCE OF FEED AND PUT THIS FEEDER IN ITS PLACE IN ORDER FOR CHICKENS TO BECOME FAMILIAR WITH THEIR NEW FEEDING SOURCE.

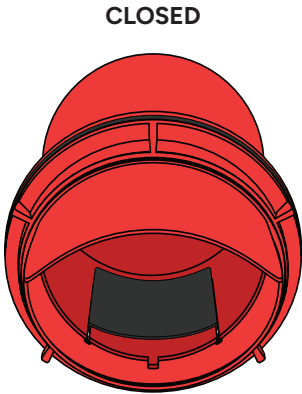

Pour feed into the port so that the feed is visible to the chickens.
You only have to do this step once.

USING THE FEED PORT COVERS

Slide port cover open to allow access to feed

Slide port cover closed to restrict rodents and other animals from accessing feed

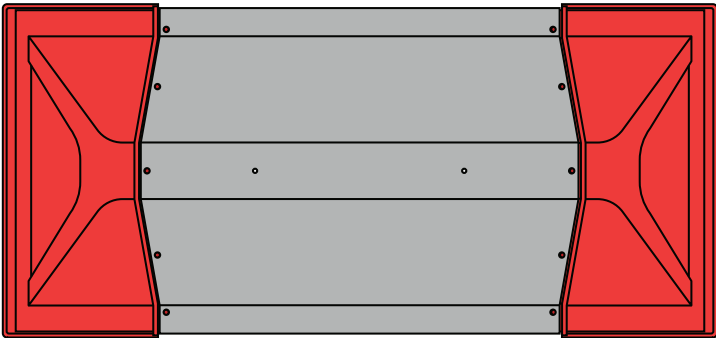

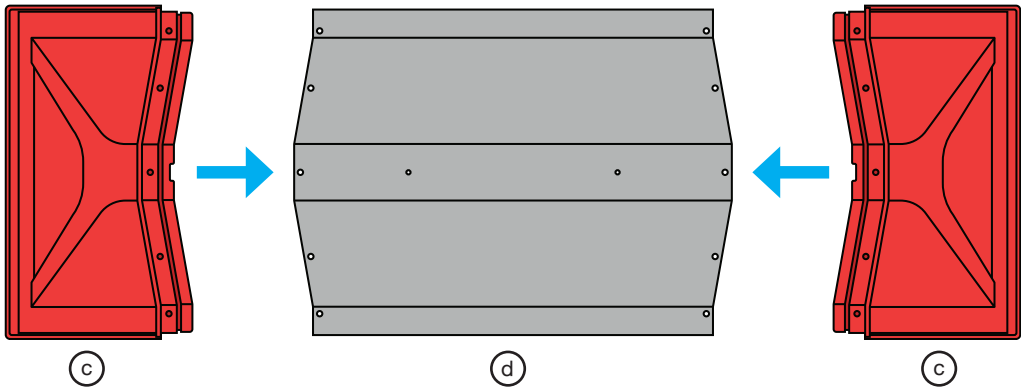

INSTRUCTIONS: HOW TO ASSEMBLE

WHAT YOU WILL NEED:

- drill (recommended)
- screwdriver

1. Assemble the feeder lid by sliding the two end pieces (c) under piece (d).

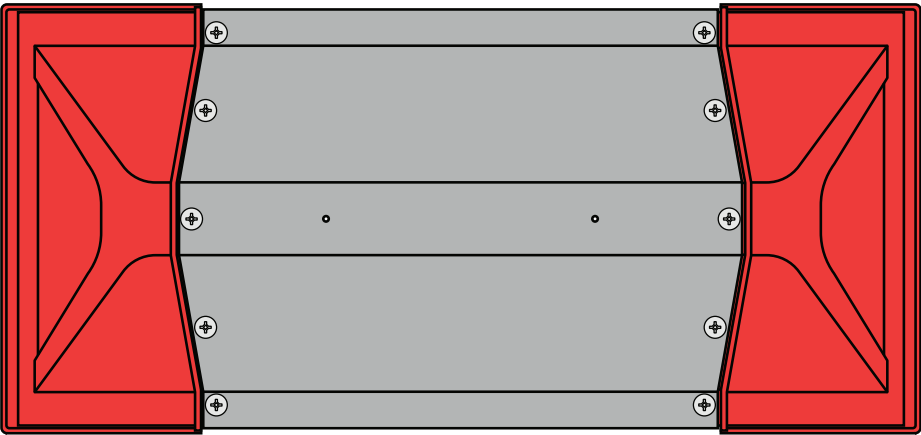

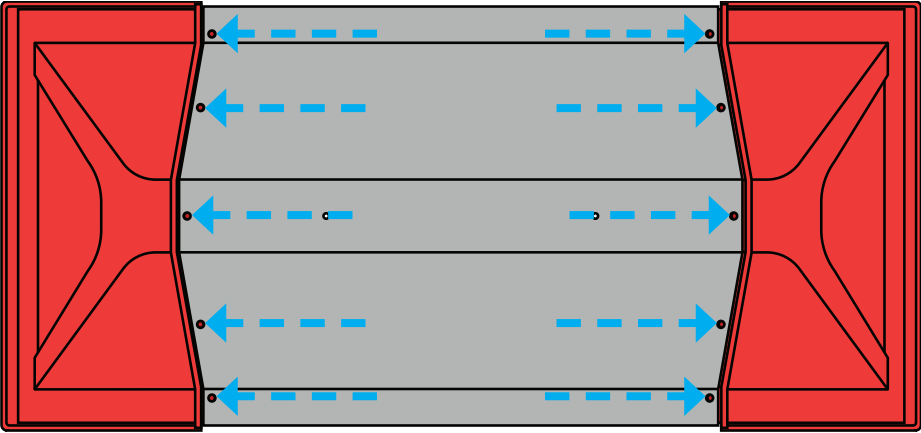

2. Secure the feeder lid pieces together with 10 screws (f).

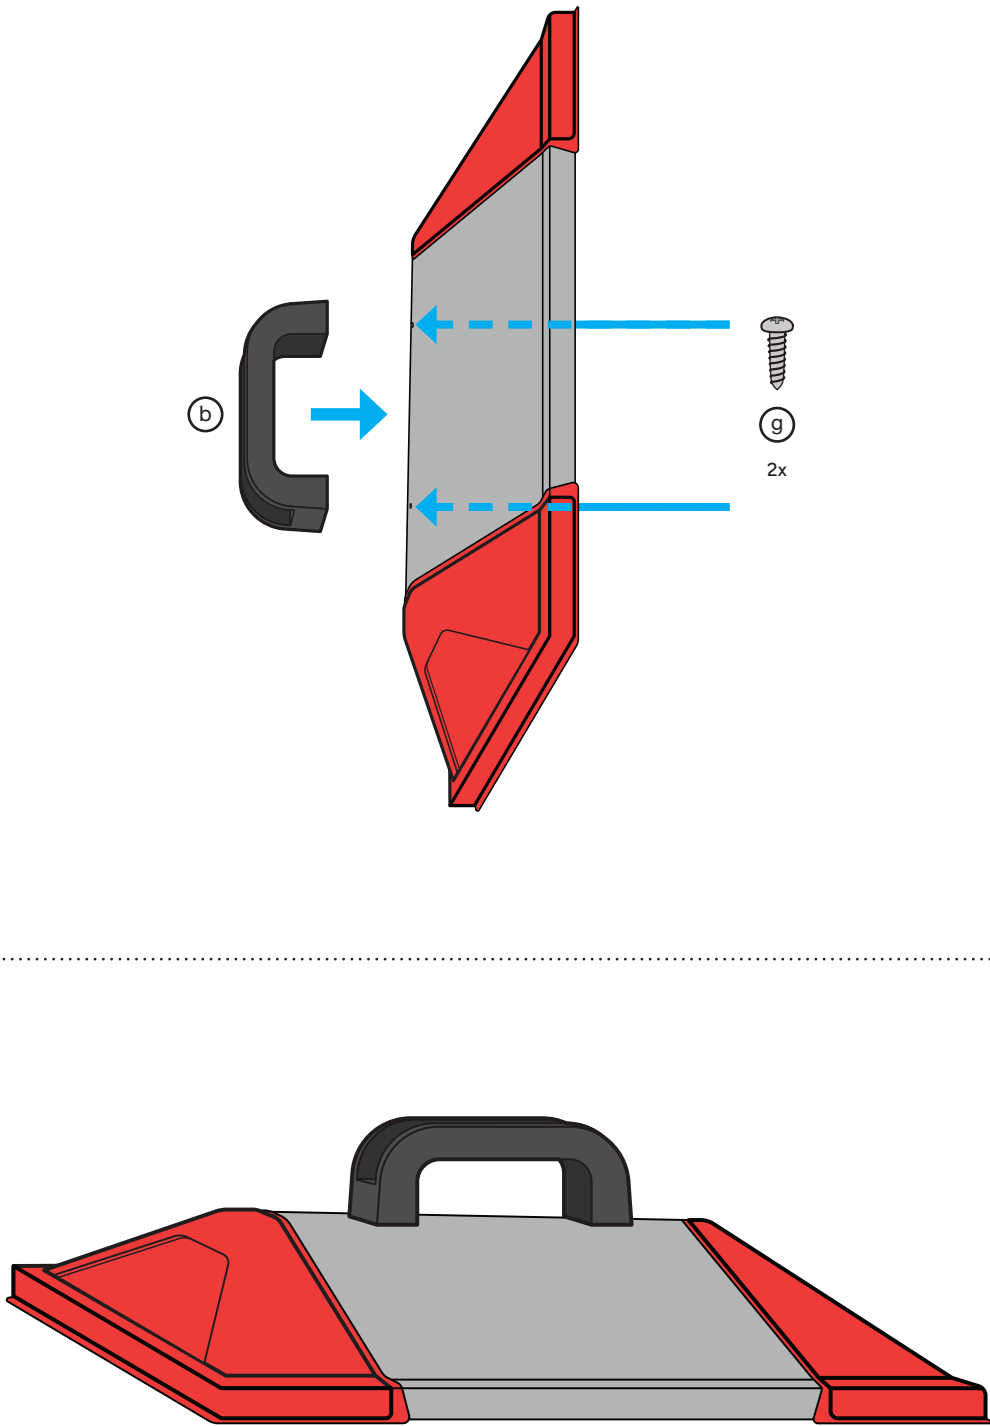

(f)

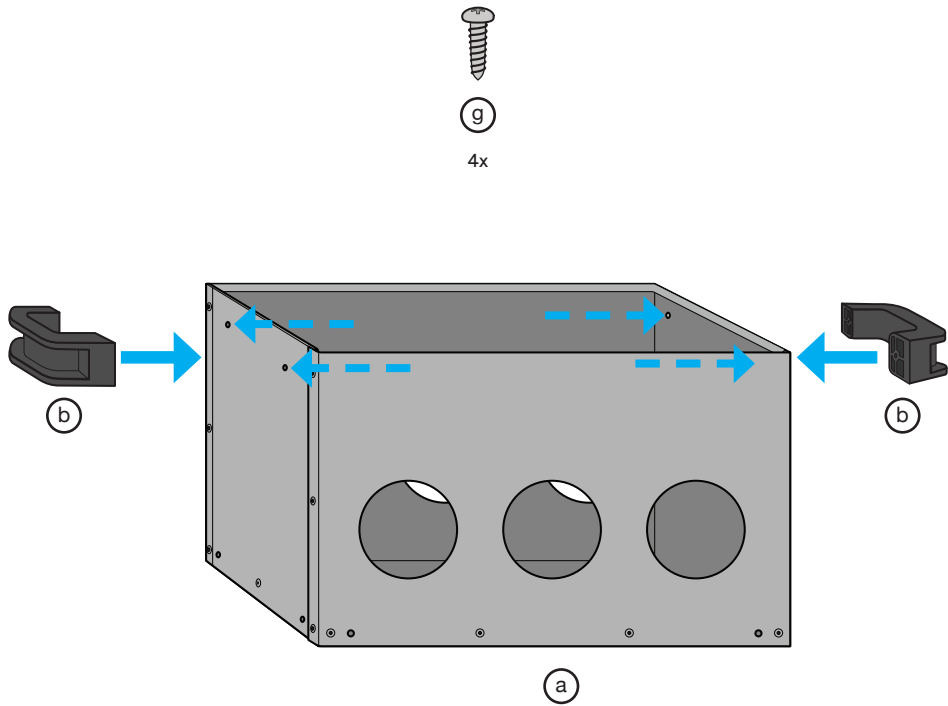

10x

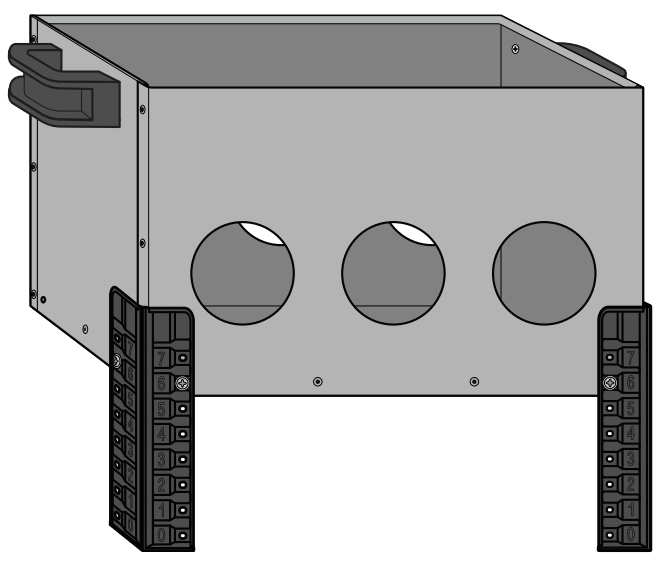

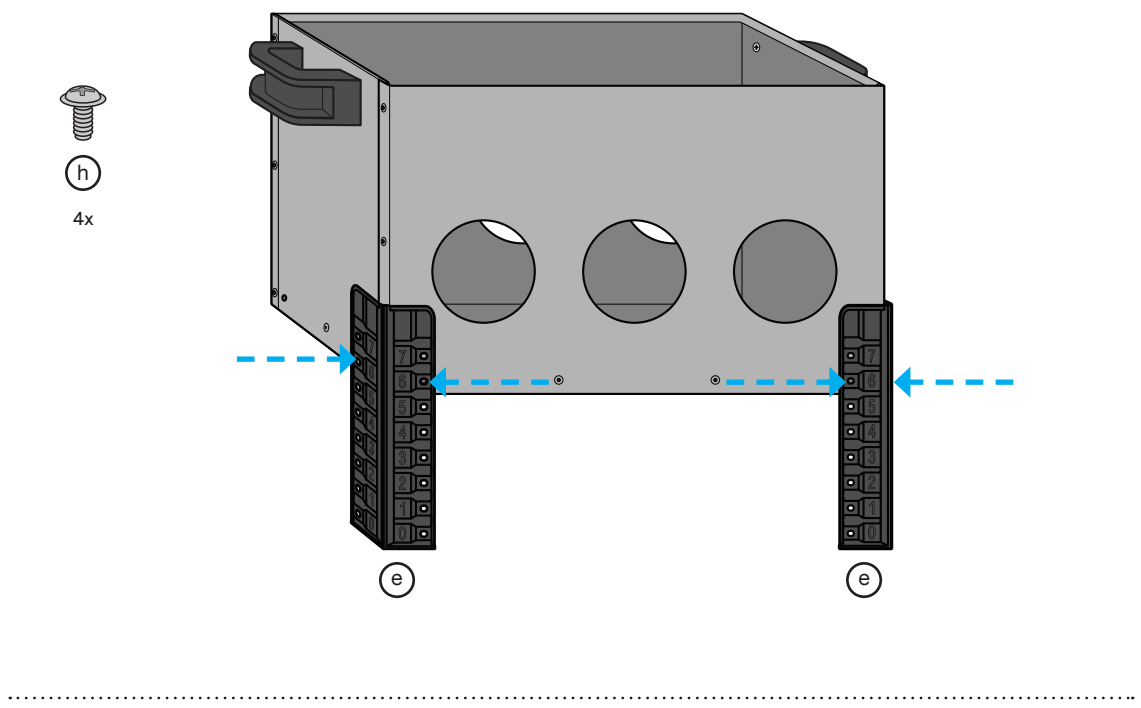

3. Install a handle (b) on the feeder lid using two screws (g).

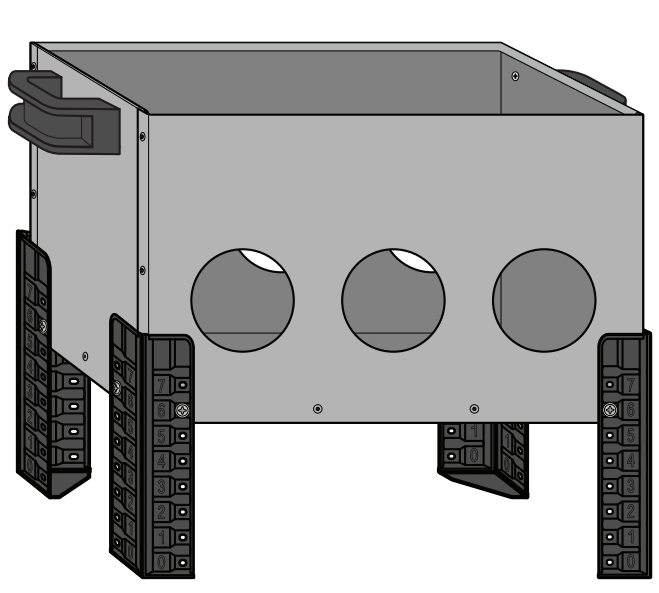

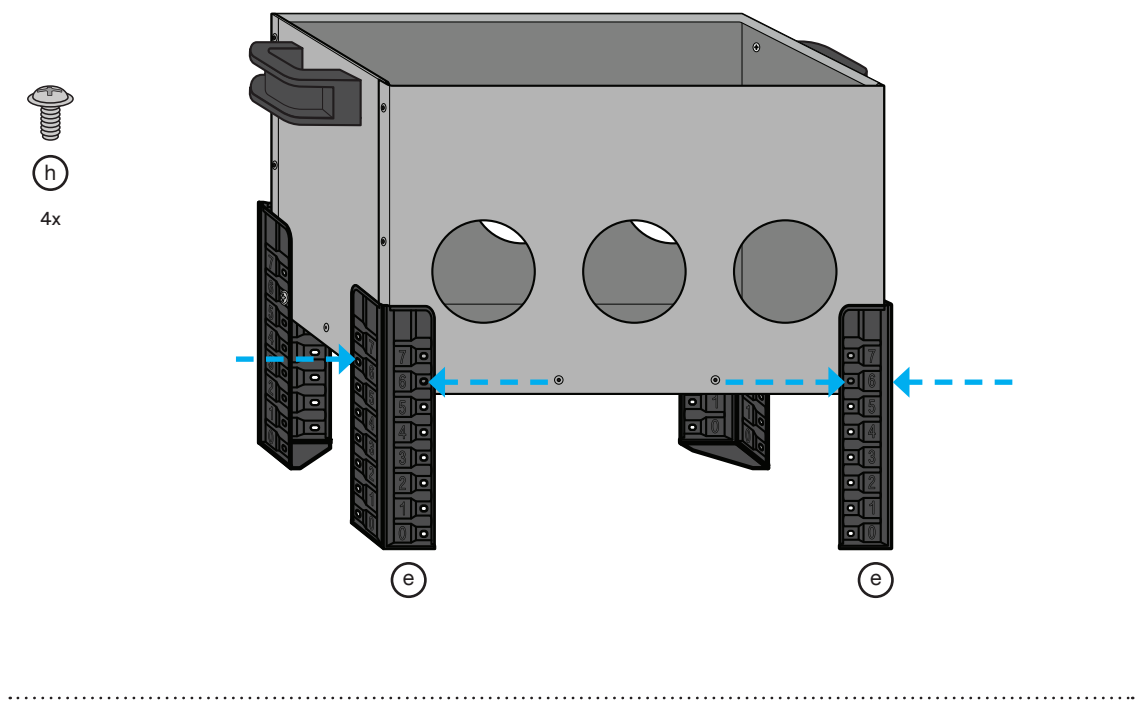

4. Install remaining two handles (b) onto the feeder (a) using 4 screws (g).

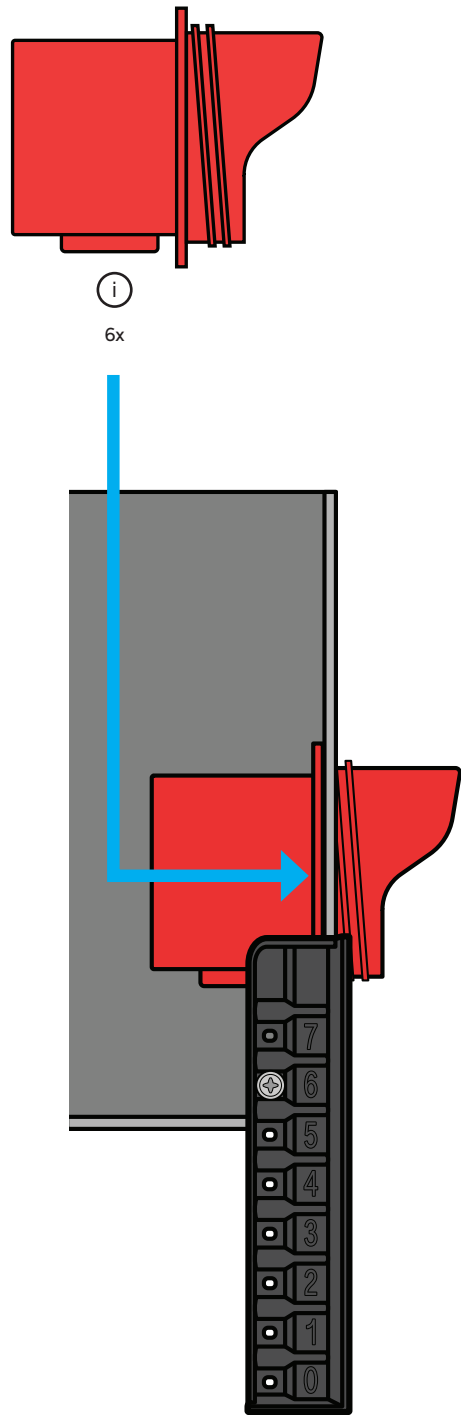

5. Determine the height of the desired height on the feeder before installing legs (see page 3). Lay the feeder down on its back and attach two of the four legs (e) onto the feeder using the other provided screws (h).

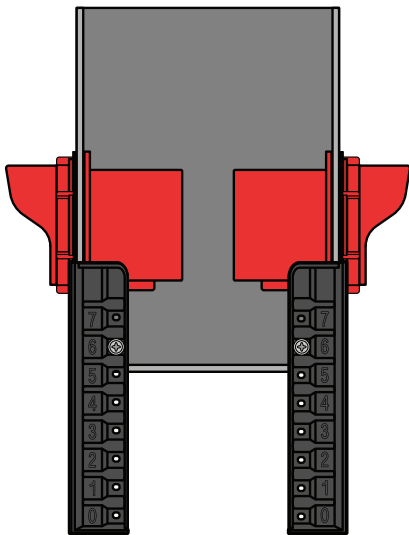

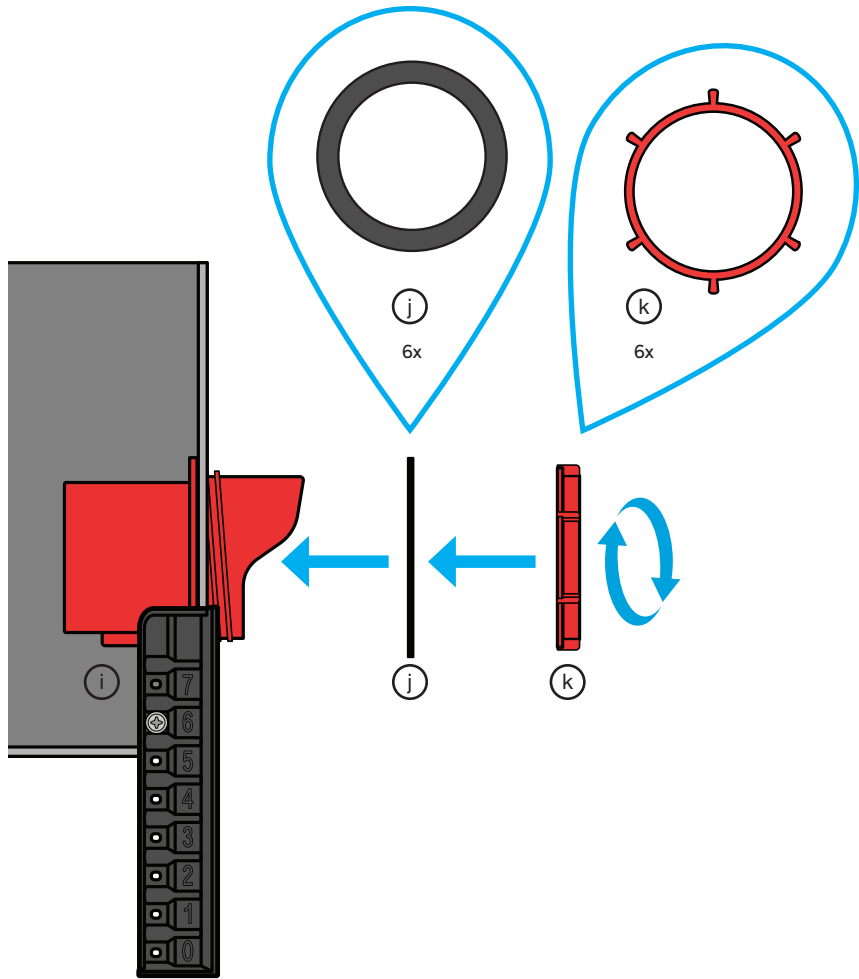

6. Flip the feeder onto the other side and install the remaining two legs (e) on the opposite side using the remaining 4 screws (h).

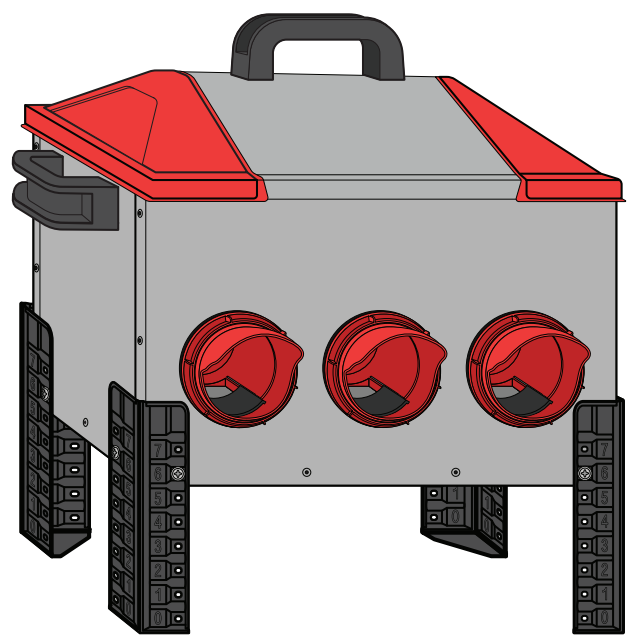

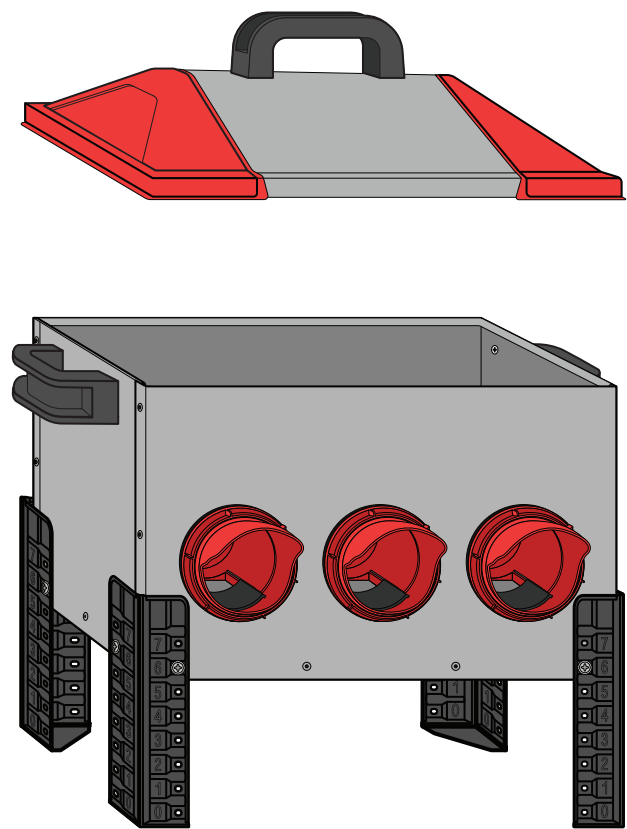

7. Install feed ports by inserting the ports (i) into the holes from the inside of the feeder with the rain hoods facing out. Make sure to remove the gaskets (j) and the locknuts (k).

8. Finish installing the feed ports by placing the gaskets (j) onto the rain hoods from the outside of the feeder and secure the port by twisting the locknuts (k) onto the gaskets and ports.

9. Fill with feed and cover with lid.
