Q9 Coil Replacement Kit for G2 Turbine Meters Installation Instructions

Kit Includes

- Replacement Q9 Coil Assembly with Glue Dot. Qty. 1
- Instruction Sheet Qty. 1

Installation Instructions:

1. Your meter must be installed with the arrow pointed in the direction of flow.
2. Remove the electronics (display or module) from the meter housing.
3. Disconnect the old coil wire terminal from the electronics and remove the old coil assembly from the meter housing.
4. Connect the new coil wire terminal to the electronics and prepare the new coil assembly for installation onto the meter housing.

COIL ASSEMBLY PREPARATION: Remove the protective liner from the bottom of the coil to expose the glue dot affixed to the bottom of the coil assembly.

5. Installing the new coil assembly onto the meter housing:
 - a. Insert the (2) grip fingers into their receiving holes in the meter housing.
 - b. Press firmly on the (2) fingers and the coil to ensure the entire coil assembly is tight against the machined surface of the meter housing.
6. Mount the previously removed electronics onto the meter housing. Fasten the electronics to the housing through the four corner holes in the electronics housing using the four previously removed screws. Make sure the seal is fully seated in the electronics housing groove before tightening the screws.
7. Refer to the owner's manuals received with your meter to check meter accuracy before using.
