

FIREGUARD VS. UL2085 TANKS:

WHAT'S THE DIFFERENCE?

Your local jurisdiction says you need a “Fireguard tank.”
*What you actually need is a **UL2085-certified tank**.*

WHAT IS FIREGUARD®?

- Fireguard® is a trademarked name owned by the Steel Tank Institute (STI).
- Manufacturers who produce Fireguard tanks do so under license from STI.
- Fireguard® is a brand name. Your jurisdiction may say Fireguard, but what they truly require is a **UL-2085 tank**.

WHAT IS UL2085?

- **UL2085** is a safety standard from UL for *Protected Aboveground Tanks for Flammable and Combustible Liquids*.
- It outlines construction and performance requirements so tanks can withstand fire, impact, and ballistic threats in high-risk fuel storage environments.
