

PRO BASEPLATE

Guardrail

The Pro baseplate serves as a foundational component for the secure installation of the G-Rail system. Designed to ensure stability and compliance, each baseplate is engineered to meet or exceed all applicable OSHA safety requirements. The Pro model provides options for three attachment sockets, allowing for flexible configuration and enhanced adaptability across a wide range of applications.

Guardian offers three distinct baseplate models—Standard, Pro, and Multi-directional—tailored to accommodate varying job site needs.
