

DEFENDER ULTRA+

Full-Body Harness

Trust is earned on the job site and the Defender was created to deliver on that.

Developed through extensive collaboration with real users, the Defender Ultra+ harness encompasses the insights, challenges, and expectations of the workers who rely on fall protection every day.

With a tailored approach, we have created a multi-level harness range that delivers the performance, comfort, and innovation demands needed for every type of job.

Every component reflects direct user insights. The result is a harness line full of unique innovations and useful features that reduces fatigue, enhances mobility, and improves productivity - without compromising safety.

This is a harness engineered with purpose. This is a harness you can trust. This is a harness built around you.

**HEIGHT SAFETY.
SIMPLIFIED.**

Declaration of conformity

This product has been tested in an ISO 17025 accredited laboratory in accordance with all requirements specified by **ANSI Z359.7-2019**.

This product is compliant with the following safety regulations and consensus standard:
ANSI Z359.11-2021 | OSHA 1910.140 & 1926.502

Key features & benefits

360-Ring Chassis

Provides unparalleled mobility and comfort when moving around the job site.

Accessory Loop

Integrated into shoulder pad for quick connection of common job site accessories.

Auto-Resetting Lanyard Keepers

Mitigates nuisance interference caused by dangling connector legs.

Additional Rear Lanyard Keepers

Two additional rear auto-resetting lanyard keepers provides connector stowage away from the workspace in front of the worker.

Integrated SRL Adapter Slot

Provides a convenient connection point for dual SRLs, keeping them high and tight for improved weight distribution.

Wear-Indicating Webbing

Has a red inner core, providing a clear visual cue to simplify harness inspection.

Digital Inspection & Asset Management Powered by Twiceme Technology®

with a built-in NFC chip for streamlined digital inspections and effortless asset management via the Twiceme application.

DiaLock Torso Adjuster

Offer a quick and precise adjustment method.

CoolFit-Xtra Enhanced Padding with FlexArmor SRL Impact Shield

CoolFit-Xtra padding combines superior airflow channels with a unique flexible twin shoulder design to keep the wearer cool and comfortable. FlexArmor mitigates nuisance impacts from SRLs connected to the user.

CoolFit-Xtra Fixed Waist Pad (Option)

Superior ergonomic design offers enhanced breathability, while keeping a comfortable and supportive fit. The fixed design prevents sagging when tools or pouches are added, and the Belt Loop Bumpers offer extra protection. Also includes a Tool Tether Anchor Point on each hip.

Aluminum Hardware

Lightweight and improved durability.

Specifications

User weight range (including all clothing, tools, and equipment) | OSHA | 100-420 lb | ANSI | 130-310 lb

Maximum weight range | 100-420 lb (per user)

Materials | Polyester, aluminum, steel, nylon, polyurethane
