

HLL STANCHION POST

Horizontal Lifeline

The Guardian HLL Stanchion Post is a durable horizontal lifeline support post engineered to provide secure fall protection for workers at height. Standing 102 inches tall and equipped with a choice of two or four integrated D-ring attachment points, it offers versatile horizontal lifeline configurations and enhanced flexibility.

Designed for strength, stability, and ease of installation, the reusable HLL Stanchion Post helps create a reliable overhead horizontal lifeline anchorage system that helps minimize fall clearance requirements while maximizing coverage across the job site.

HLL STANCHION POST

Horizontal Lifeline

HTL Rope HLL System | #04663

The Guardian HTL Rope HLL System is fully compatible with Guardian Stanchion Posts, creating a versatile temporary fall protection solution that delivers safe, continuous tie-off and enhanced worker mobility at elevation.

Key features & benefits

Tough and lightweight

Durable 102-inch aluminum support post built for the most demanding job sites

Job site versatility

Choice of four or two integrated D-Rings providing secure anchorage for fall protection systems

Overhead safety

Raises the attachment point above the user

HLL Kit

Includes a pre-assembled cable with an integrated turnbuckle tensioner, allowing for fast installation with minimal setup time. Engineered to span up to 60 feet without the need for intermediate posts, the system reduces material requirements, installation complexity, and overall project costs.

HLL Stanchion Kit

The complete job site solution includes the HLL Kit above and two Stanchion Posts with four D-rings.

Retractable HLL Stanchion Kit

This portable high-performance cable horizontal lifeline system is designed for quick setup and reliable fall protection. The system includes two Stanchion Posts with four integrated D-rings, providing versatile tie-off options and enhanced worker mobility.
