

## **G-RAILS**

### Guardrail

The Guardian G-Rail™ System functions as a complete passive fall prevention solution when used in combination with Guardian G-Rail™ baseplates and other guardrail receivers such as Guardian's Trench Box G-Rail™ Receiver. Guardrail systems are always preferred over Fall Arrest systems because they form a barrier between the user and fall hazard. When used properly, the use of Guardian G-Rail™ can eliminate any chance for a fall to occur. Guardian G-Rail™ can be installed permanently but is also simple to disassemble and transport to a different location with our G-Rack™ Guardrail Storage System.

# GUARDRAILS

G-Rail™ Fall Prevention

**6 ft G-Rail™**  
Part #15183

**8 ft G-Rail™**  
Part #15182

**10 ft G-Rail™**  
Part #15181

## Key Features & Benefits

### Free-standing fall prevention system

Blocks workers from exposure to fall hazards

### Powder-coated or galvanized steel construction

Superior durability and weather resistance

### Simple modular design

Easy to install and uses common parts to fit a variety of applications

### Versatile installation

Can be used with weighted baseplates, guardrail knuckles, standing seam bases, and screw-down baseplates.

## Specifications

**Height** | 42 in (1,06 m)

**Materials** | Powder-coated steel or galvanized steel

All products are compliant with the following safety regulations:  
**OSHA 1910.29 and 1926.502**

Part numbers	Description	Finish	Guardrail Length
15181	G-Rail™	Powder coated	10 ft (3 m)
15182	G-Rail™	Powder coated	8 ft (2,4 m)
15183	G-Rail™	Powder coated	6 ft (1,8 m)
15181-GALV	G-Rail™	Galvanized	10 ft (3 m)
15182-GALV	G-Rail™	Galvanized	8 ft (2,4 m)
15183-GALV	G-Rail™	Galvanized	6 ft (1,8 m)

### Declaration of conformity

This product has been tested in an ISO 17025 accredited laboratory in accordance with all requirements.

This product conforms with the following safety regulations and consensus standard:  
**OSHA 1910.140 & 1926.502**
