# SIMPLE, CONSISTENT, AND CONNECTED

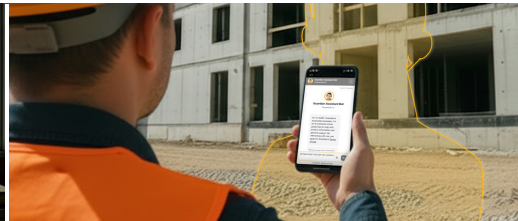

Guardian OS brings together everything you need to work safely and efficiently at height, all in one connected place.

## WHERE TO BUY

**Select and buy products online quickly and confidently to keep jobs operating safely at height.**

Locate and confirm the availability of specified products near you in seconds, and seamlessly navigate from product information to purchase.

## GABY AI

**Meet GABY, your “always-on” AI assistant for finding, recommending, and buying the right height safety solutions.**

Get immediate answers to product questions 24/7 and access to technical specs, manuals, and compliance docs on demand.

## GUARDRAIL ESTIMATION TOOL

**Design a project specific guardrail plan in minutes by uploading documents or drawing on a map.**

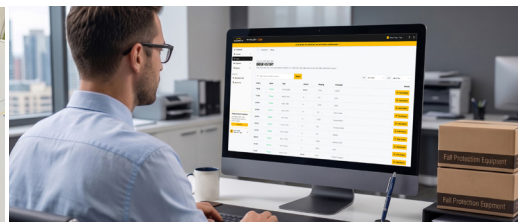

Guardian's Engineered Systems team reviews and validates your design, then provides a professional, OSHA-compliant quote. Fast, accurate, and qualified person reviewed layout.

## ANCHOR & HLL SELECTION TOOL

**Plan height safety systems with confidence and ease.**

Identify the right anchors and horizontal lifeline configurations for your specific project. Reduce guesswork and unnecessary risk with expert-backed validation. Receive a quote and a path forward from our Engineered Systems team that you can feel confident in.

## CUSTOMER PORTAL

**Your dedicated, centralized hub for frictionless ordering, tracking, and confident account management.**

Check real-time inventory levels, pricing, track order status and delivery updates, and access invoice history, all with built-in tiered tracking.

## REQUEST YOUR CUSTOMER PORTAL INVITE

## ABOUT GUARDIAN OS

Over thirty years ago, Guardian introduced the Skyhook roof anchor, setting a standard and a promise: keeping workers safe at height. Today, as technology transforms every link in our industry's value chain, we're anchored by that same commitment. That's why we built Guardian OS, the first connected digital ecosystem for height safety customers, all powered by intuitive tools that make every interaction with Guardian simple, consistent, and connected.
