PE and CPE Shoe Covers

These reliable PE and CPE shoe covers are more durable than polypropylene and help keep floors and walkways clean from outside foreign matter found on the soles of shoes.

PE and CPE shoe covers protect wearers' shoes from many workplace liquids & contaminants. These shoe covers are water-resistant and include a strong elastic closure. A variety of weights and colors offer a solution for nearly any application such as healthcare, cleanrooms, food processing, installers & contractors, pharmaceuticals, & beauty.
