PRECISION, QUALITY, INNOVATION

For more than 145 years, manufacturers, builders and craftsmen worldwide have depended upon saws and precision tools from The L.S. Starrett Company to ensure the consistent quality of their manufacturing processes.

They know that the Starrett name on saw blades, hand tools and measuring tools means exceptional quality, innovative products and expert technical assistance.

With strict quality control, state-of-the-art equipment and an ongoing commitment to producing products with superior quality, the 5,000 plus products in today's Starrett line continues to be the most accurate, robust and durable tools available.

This catalog features Starrett Band Saw Blades, their applications and characteristics.

INTRODUCTION

Starrett has been involved in precision tool manufacturing since 1880, sold products worldwide since the 1890s and introduced its first saw blade around 1890.

06

CHOOSING THE RIGHT BLADE

Terminology, Tooth shapes, and Band Saw Blade characteristics

10

BI-METAL SAW BLADES

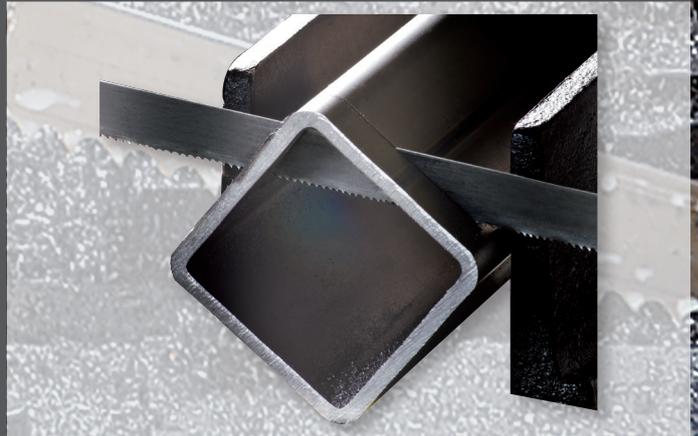

The best solution for cutting a variety of ferrous and non-ferrous materials. These saws suit all cutting, economic or high production needs for any model of machine.

17

CARBIDE TIPPED

Ideal for cutting extremely hard, abrasive materials. Withstands extreme cutting pressures and offers a high resistance to wear and fatigue.

27

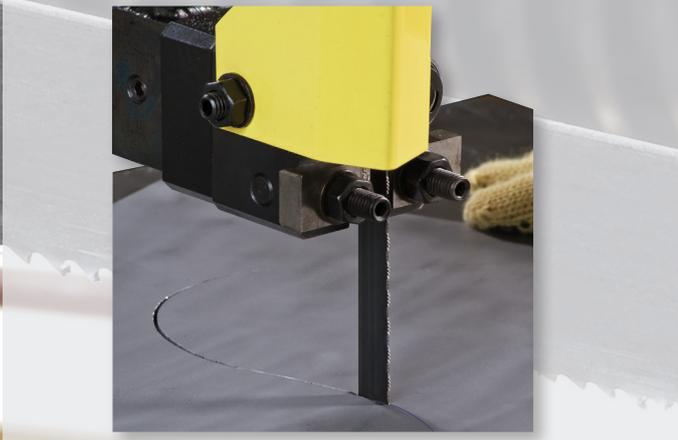

BAND SAW BLADES

CARBIDE GRIT, DIAMOND GRIT

Band saw blades coated with carbide grit or diamond grains are ideal for cutting abrasive materials with precision and excellent finish.

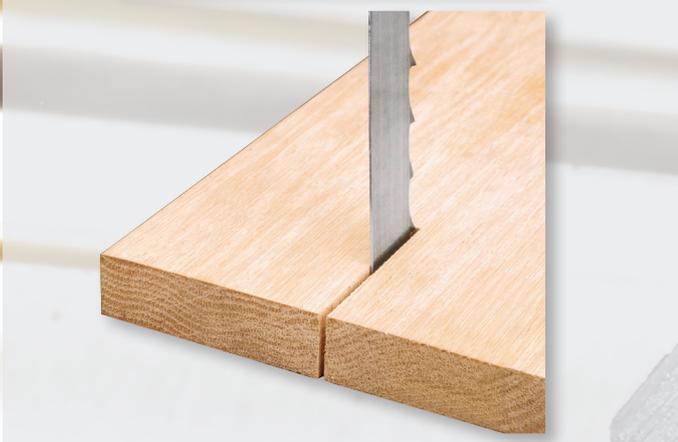

33

CARBON

Suitable for horizontal and vertical machines with manual or gravity feed. A complete line with a wide range of widths, tooth pitches and shapes.

36

WOOD CUTTING

A selection of carbon, bi-metal, and carbide-tipped blades ideal for a variety of wood cutting applications.

41

FOOD PROCESSING

Constructed of the best quality specialty steels, polished and hardened to resist corrosion and contamination. These blades are the ideal choice for accuracy and efficiency at any food processing plant.

47

POWER HACKSAWS

The Bi-Metal or Solid High-Speed Steel (HSS) Power Hacksaw blades are manufactured by Starrett, available in metric and inch.

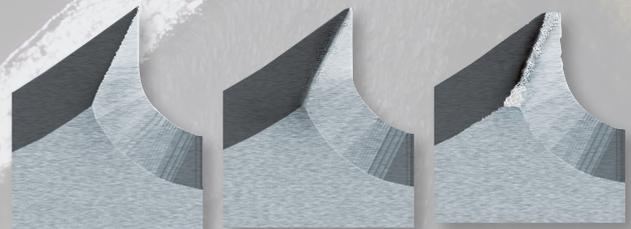

53

RECOMMENDATIONS

Recommendations to ensure longer life and better blade performance. Break-in and installation instructions.

59

ACCESSORIES

Pocket Laser Tachometer kit with case, Band Saw Blade Tension Gage and Band Saw Blade Alignment Gage.

62

RESOURCES

Find information on the Starrett website and other resources to get the best performance from your band saw blade.

TERMINOLOGY

A-WIDTH

Tip of the cutting edge to the back of the blade.

B-BLADE BODY

Distance between the back of the blade and the gullet.

C-LENGTH

Measurement along the back edge of the blade.

D-THICKNESS

Measurement of the body of the blade.

E-BACK EDGE

Opposite side of the blade from the teeth.

F-TOOTH PITCH

Distance from the tip of one tooth to the next tip.

G-TEETH PER INCH/25MM

Number of teeth (constant pitch) per inch (25.4mm).

H-GULLET

The curved area between two teeth, where the chips accumulate until being removed.

I-TOOTH FACE

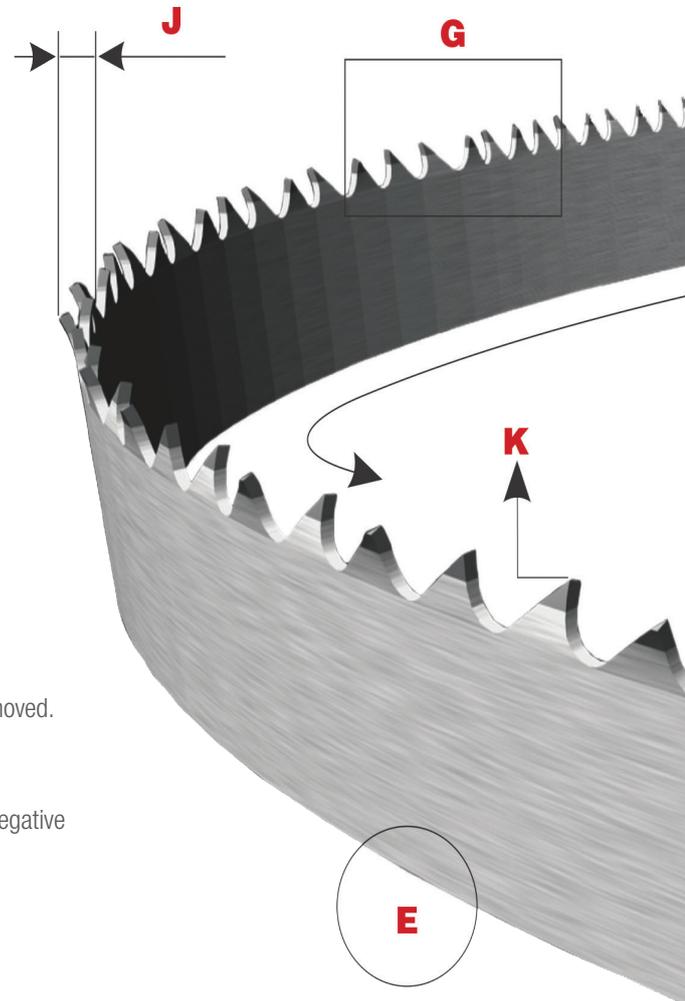

Surface of the tooth where the chip is formed. The tooth can have a positive, negative or straight angle. (Rake)

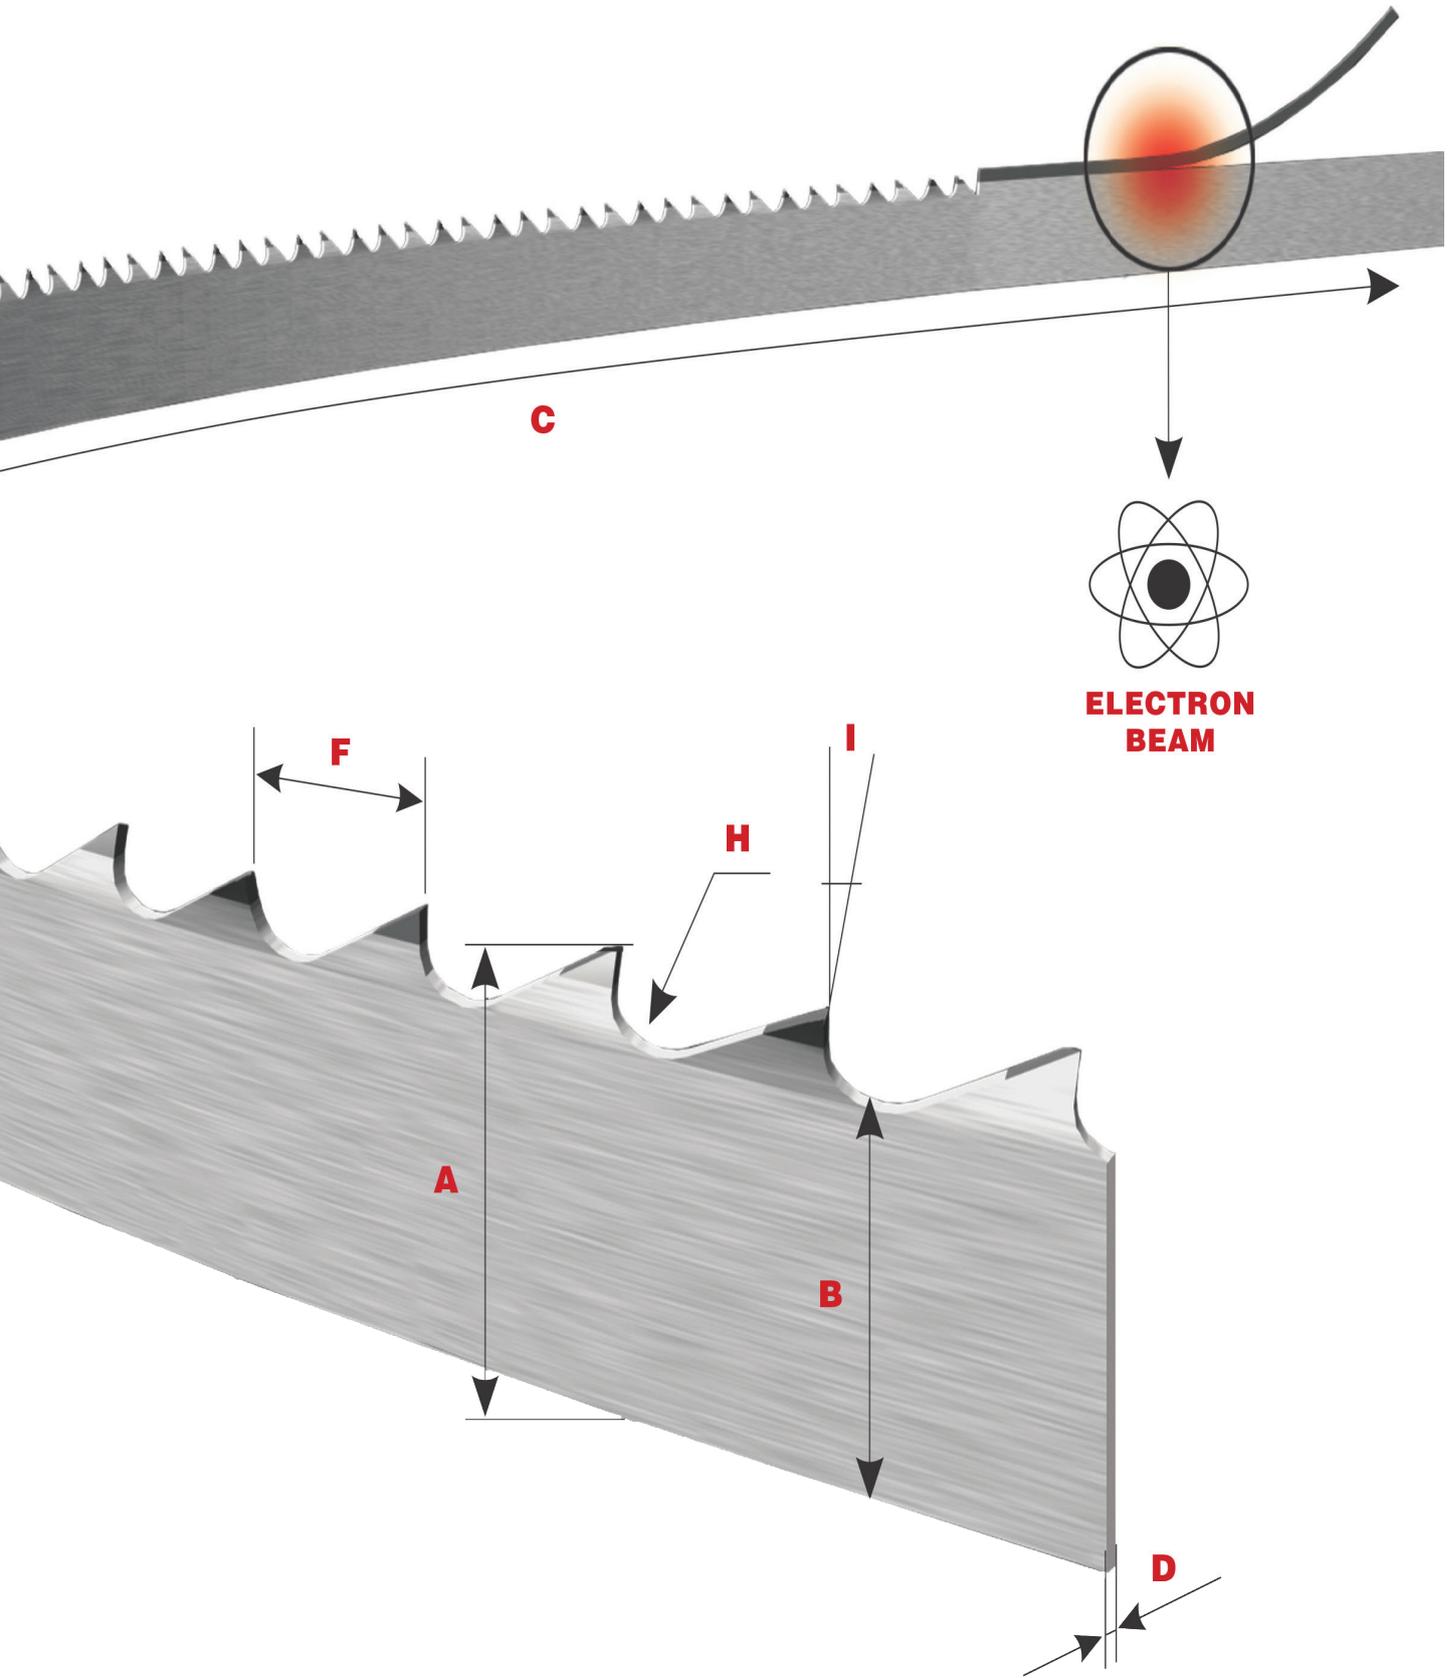

J-TOOTH SET

The side bending of the teeth to allow blade clearance through the cut.

K-BACK ANGLE

Angle formed by the back of the teeth and a parallel line to the tip of the same.

CONTINUOUS	<input type="checkbox"/>	<input type="checkbox"/>	

CHOOSING THE RIGHT BLADE

TOOTH

Constant Pitch

All teeth on the blade have uniform spacing, gullet depth and rake angle throughout the full length. Typically for general purpose cutting. Identified by one pitch number.

Variable Pitch

Size of tooth and depth of gullet varies to substantially reduce noise levels and vibrations. Cuts all structurals, tubing and solids smoothly and quickly. Identified by two pitch numbers.

SETS

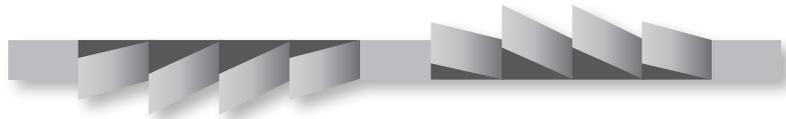

Raker

A recurring sequence of teeth set left and right, followed by one tooth unset. Frequency of unset teeth on variable pitch blades varies depends on the tooth configurations.

Alternate

A recurring sequence of teeth set alternately left and right.

Wavy

Groups of teeth set to each side of the blade, with varying amounts of set in a controlled pattern.

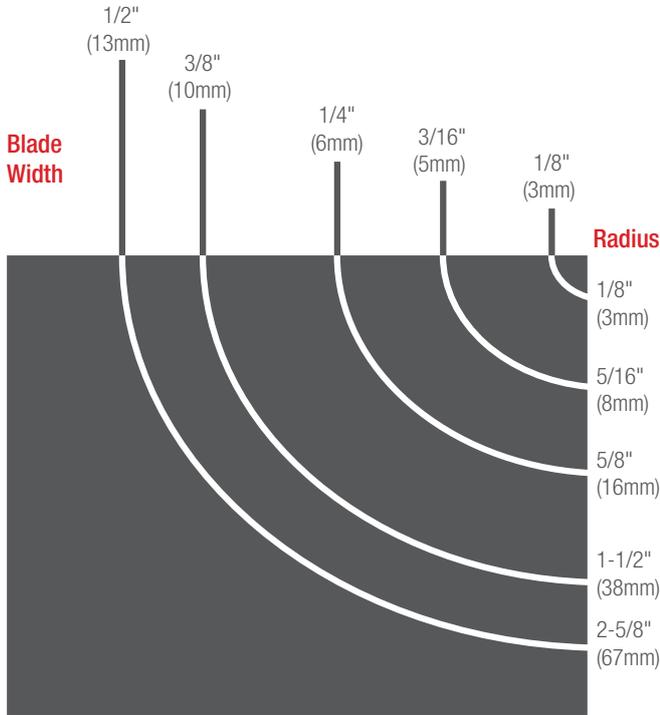

Trapezoid

Special carbide cylinder, welded to an alloy backer, then precision ground with a high/low tooth form.

CHOOSING THE RIGHT BLADE

3 BLADE WIDTH

Use the blade width recommended by the machine manufacturer, except for contour cutting in vertical machines when you should use the chart below.

4 PITCH

Pitch is the number of teeth per inch/25mm. Cutting thinner sections requires a finer pitch (more teeth per inch/25mm). Thick sections require coarser pitches (fewer teeth per inch/25mm).

The charts are good guidelines. Because the cross section limits in the chart are broad and overlap, choose a coarser pitch if the speed of cut is most important.

Section to be Cut (in)	Constant Pitch (TPI)	Variable Pitch
5/32" to 3/8"	32 or 24	14-18
1/4" to 1/2"	18 or 14	10-14
1/2" to 3/4"	14 or 10	8-12
3/4" to 1"	10 or 8	6-10
1" to 1-1/2"	8 or 6	5-8
1-1/2" to 3-1/2"	6 or 4	4-6
3-1/2" to 7"	4 or 3	3-4
7" to 10"	3	2-3
10" to 16"	—	1/4-2
14" to 20"	1/3	1-2
16" to 32"	1/3	1-1/2
Over 30"	1	.8-1/3/.9-1/1

For cutting tubes and profiles, use the horizontal line to find the outside diameter (tube) or the largest section (profile). Find the thickness (tube/profile) using the vertical column. With that information, cross them to find the recommended pitch (chart below).

Tubes and Profiles

Wall Thickness in	Outside diameter of tube or maximum profile section length (in)												
	3/8"	3/4"	1-5/8"	2-3/8"	3-1/4"	4"	4-3/4"	6"	8"	12"	16"	20"	24"
3/32"	14-18	14-18	10-14	10-14	10-14	10-14	8-12	8-12	8-12	8-12	6-10	6-10	5-8
1/8"	10-14	10-14	10-14	10-14	10-14	8-12	8-12	8-12	6-10	6-10	6-10	5-8	5-8
5/32"		8-12	8-12	8-12	8-12	6-10	6-10	6-10	5-8	5-8	4-6	4-6	4-6

2-3/8"									2-3	2-3	1/4-2	1/4-2	1-1/2

5 BLADE LENGTH

The blade length varies according to the band saw machine type and specifications. Please find the correct blade length in your band saw machine user manual.

ON-SITE TECHNICAL SUPPORT

Starrett Saw Specialists are available to tune up and perform preventative maintenance on your production sawing machine using Starrett Band Saw Blades, at no additional cost. They fully review machine condition, blade mounting and operation in detail, making adjustments, as required, to help maintain good sawing and long life for both the machine and blades.

GUARANTEED BLADE SATISFACTION TRIAL PROGRAM

As a part of our Test & Trial Blade Program, Starrett Saw Specialists conduct on-site saw tests to observe your current blade performance and specific saw application. Our band saw testing process drives a data-driven approach to optimize performance and lower your cost per cut.

TRAINING

Starrett Saw Specialists can also instruct saw operators on achieving the best performance of blade and machine for your applications. Contact Starrett directly or your nearest Starrett distributor about arranging a visit to your workplace by a Starrett Saw Specialist.

BI-METAL BAND SAW BLADES

BI-METAL

TENNAX™-PRO

NEW
PRODUCT

BI-METAL

The new bi-metal **TENNAX-PRO Band Saw Blades** by Starrett deliver next generation cutting performance on pipes, tubes, and structural profiles. TENNAX-PRO blades outperform competitive blades with lower noise, heat and vibration, and up to 25% more cuts per blade.

TENNAX-PRO Band Saw Blades replace Starrett Versatix MP. For cross reference support, please visit starrett.com

FEATURES

- New tooth geometry developed for cutting pipes and structural material profiles
- M42 High Speed Edge
- Exclusive tooth setting process

BENEFITS

- High level of productivity in extreme cutting processes used for pipes, profiles and structural materials
- Increased resistance to wear and tooth breakage
- Low noise, low vibration and improved cutting performance

APPLICATIONS

- Pipes, tubes, and structurals
- Small solids
- Bundles
- For all machines: manual, hydraulic, gravity fed, etc.

3/4" to 1-1/4" sizes available in 150' (45m) and 250' (75m) coils. 1-1/2" and 2" sizes available in 150' (45m) coils. 2-5/8" size available only in welded blades.

All coils supplied within plus or minus 10% of ordered size.

Furnished in welded bands for all widths, or in random coils for 3/4" to 2" widths. Special products on request.

BI-METAL

PRIMALLOY™

FEATURES

- Special high-speed steel edge
- Exclusive tooth geometry with positive rake angle
- Extended Life Treatment (EXT)-ensures maximum fatigue life
- Ground teeth

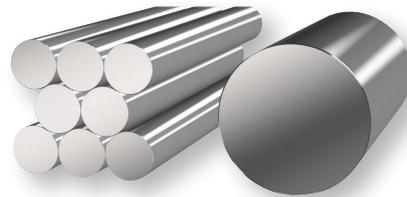

BENEFITS

High content of Cobalt and Vanadium guarantee:

- High production, longer operating blade life with high quality surface finishing
- Increased wear and heat resistance
- Easy penetration in hard and difficult to machine materials, increasing the blade performance
- Cost-effective over conventional bi-metal blades

APPLICATIONS

- Tool steel and high-speed steel
- Stainless steels
- Nickel and titanium alloys
- Hardened steel
- For machines with hydraulic feed control

1" to 1-1/4" sizes available in 150' (45m) and 250' (75m) coils. 1-1/2" and 2" sizes available in 150' (45m) coils. 2-5/8" sizes available only in welded blades.

All coils supplied within plus or minus 10% of ordered size.

Furnished in welded bands for all widths, or in random coils for 1" to 2" widths.

Special products on request.

EXTENDED LIFE TREATMENT (EXT)

The Starrett Primalloy Band Saw product line applies a proprietary Extended Life Treatment (EXT) to its alloy steel backing material. This process, in addition to controlled blast peening, enhances the fatigue life of the blade. The EXT applied during the peening operation adds increased residual stress into the surface of the blade. Higher stress levels aid in the reduction of fatigue cracks that originate along microscopic grain boundaries. The benefits of extended life treatment are proven with X-Ray Diffraction (XRD) and extensive mechanical fatigue tests. This process will soon be applied to most Starrett bi-metal and carbide tip product lines.

BI-METAL

INTENSTM PRO-VTH

Starrett[®] IntensTM PRO-VTH

FEATURES

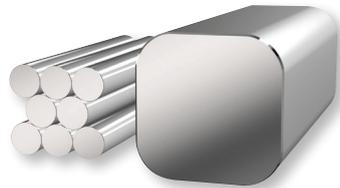

- Uniquely designed tooth edge with variable height and set
- Positive rake, ground teeth

BENEFITS

- Easy penetration for faster cuts
- Excellent heat and wear resistance
- Pulsating action allow the teeth to penetrate, resulting in faster cuts

APPLICATIONS

- Tool steel and high-speed steel
- Stainless steels
- Aluminum bronze alloys
- For machines with hydraulic feed control
- Ideal for cutting all steels and non-ferrous metals up to 40 HRC

Width x Thickness		Pitch/Rake	Material No.
in	mm		
1 x .035	27 x 0.90	3-4/IP-P-R	99949*

BI-METAL

INTENSTM PRO

FEATURES

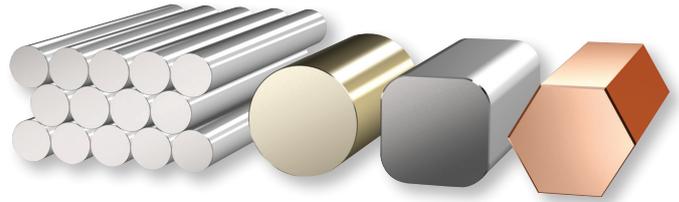

- Complete line with a full range of widths and pitches to suit a variety of cutting needs
- Unique tooth geometry provides intense production cutting in ferrous and non-ferrous metals

BENEFITS

- Faster and straighter cuts
- Improved fatigue and wear resistance

APPLICATIONS

- Ideal for production cutting across a wide range of metals
- For solids and thick wall tubes

BI-METAL

INTENSS™ PRO-DIE

FEATURES

- Split Chip Advantage Technology
- Multiple cutting edges-Multi Edge Performance

BENEFITS

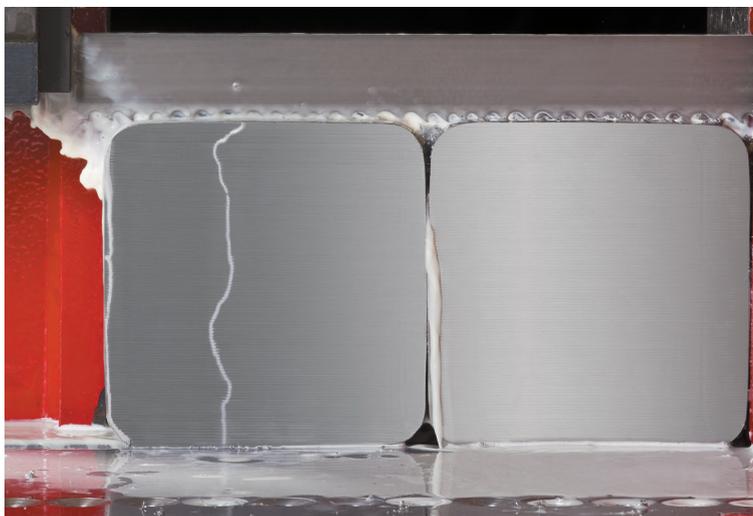

- Technology that allows faster cutting rates for longer blade life
- Cost-effective over conventional carbon steel blades
- Excellent fatigue, abrasion and shock resistance

APPLICATIONS

- Ideal for contour cutting on vertical machines
- Carbon steel and low alloy steels
- Sheet metal
- Die and Mold steel
- Stainless steel

 IP - Intenss™ tooth profile | HH - Hook high tooth profile | P Positive rake
 *bi-metal unique® Technology
 All sizes available in 100' (30m) and 250' (75m) coils or welded bands.
 All coils supplied within plus or minus 10% of ordered size.
 Special products on request.

1. Patented process providing 170% more weld contact for superior teeth stripping resistance
2. Significantly reduced fracture and breakage
3. Multi-edge cutting performance resulting in faster cuts and longer blade life

**bi-metal
unique®**

BI-METAL

INTENSSM

bi-metal
uniqueSM

FEATURES

- Strong tooth geometry
- M42 high-speed steel teeth combined with a fatigue resistant backing

BENEFITS

- Ideal for horizontal machines and light duty verticals
- Ideal for toolrooms and maintenance shops

APPLICATIONS

- Sheets, carbon steel solids and structurals, aluminum, copper, brass, cast iron, alloy steel, stainless steel etc.
- Small and medium solid dimensions

*bi-metal uniqueSM Technology

1/2" sizes available in 100' (30m) and 250' (75m) coils. 3/4" to 1-1/4" sizes available in 150' (45m) and 250' (75m) coils. 1-1/2" sizes available in 150' (45m) coils.

All coils supplied within plus or minus 10% of ordered size.

Furnished in welded bands or in random coils for all widths.

Special products on request.

FEATURES

- Split Chip Advantage Technology
- Multiple cutting edges-Multiple Edge Performance
- Blade thickness: 0.020"

BENEFITS

- Technology that allows faster cutting rates and increased blade life
- More cost-effective than conventional carbon steel blades
- Excellent fatigue, abrasion and shock resistance
- For contour cuts

APPLICATIONS

- Portable machines
- Vertical machines with reduced wheel diameter
- Ideal for metal workshops, construction and hobbyists
- Steel, iron, aluminum

CARBIDE TIPPED

CARBIDE

ADVANZ™ MC7

AVAILABLE WITH
AMP
 TECHNOLOGY

FEATURES

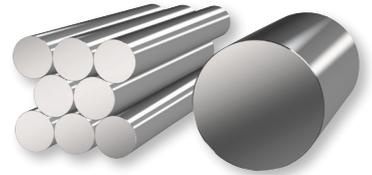

- Exclusive Starrett tooth geometry
- Carbide tipped
- Progressively ground trapezoidal tooth design
- Utilizes a progressive four tooth grind creating seven distinct chips
- Positive rake angle
- Submicron carbide (HV1600)

BENEFITS

- Cutting ferrous metals
- Higher productivity through reduced cutting time
- Precision cuts - superb surface finish
- Excellent "cost per cut" for production cutting
- Exclusive Starrett edge preparation - minimizes micro chipping
- Less wear compared to conventional triple chip

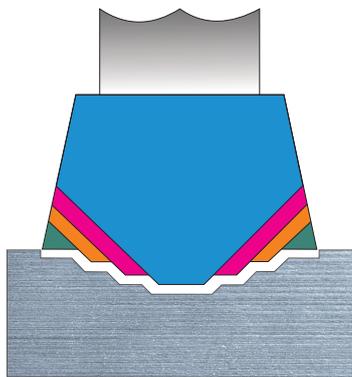

APPLICATIONS

- Difficult to machine steels
- Tool steels, heat-treated steels, stainless materials
- Inconel, nickel alloys
- Titanium

MC7 (Seven Multiple Chips)

CARBIDE

ADVANZ™ MC5

AVAILABLE WITH

FEATURES

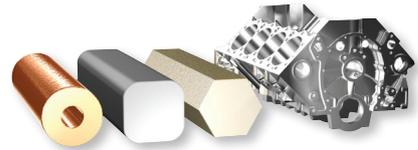

- Exclusive Starrett tooth geometry
- Carbide tipped
- Ground tooth produces 5 chips
- Utilizes a multiple chip grind with a high/low tooth sequence
- Positive rake angle
- Submicron carbide (HV1600)

BENEFITS

- Higher productivity through reduced cutting time
- Precision cuts - superb surface finish
- Excellent "cost per cut" for production cutting
- Starrett exclusive edge preparation - minimizes micro chipping
- Chip load is spread out over more teeth to facilitate longer life

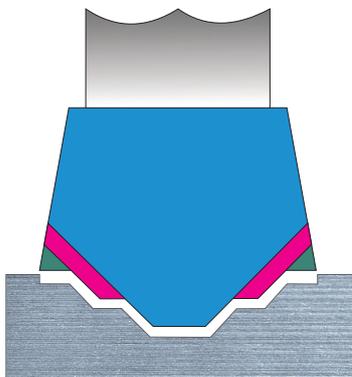

APPLICATIONS

- Automotive aluminum casting blocks
- Alloy tool steels
- Aerospace alloys
- Stainless steel
- Nickel alloys
- Cast iron

MC5 (Five Multiple Chips)

NOW AVAILABLE WITH
 NEW AMP TECHNOLOGY!

The new AMP technology available on Starrett band saw blades increases cutting efficiency and blade life. A custom back edge enhancement on the blade generates a rocking motion while cutting which results in an increase in tooth penetration without added feed pressure. This cutting motion also serves to minimize surface contact area, increasing the blade life on hard to cut alloys.

CARBIDE

CARBIDE

ADVANZ™ TS

FEATURES

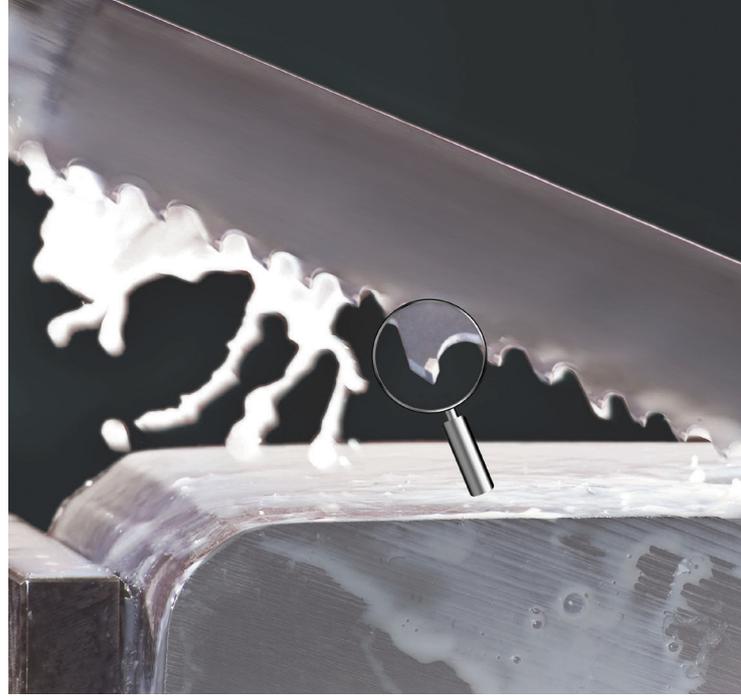

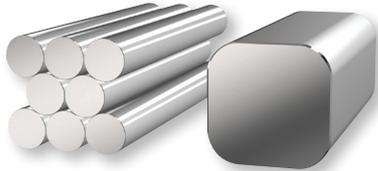

- Carbide tipped teeth
- Triple chip tooth geometry
- Aggressive Rake angle

BENEFITS

- General purpose cutting
- Ferrous and non-ferrous metals
- Reduced cutting time - Higher productivity
- Precise cuts producing excellent finish
- Excellent “cost per cut” for production cutting
- Good for less rigid saw machines

APPLICATIONS

- High-alloy metals
- Aerospace alloys
- Stainless steel
- Nickel alloys
- Hard and abrasive materials
- For machines with hydraulic feed control
- Cast iron
- Brass, bronze, copper

CARBIDE

ADVANZ™ CS

FEATURES

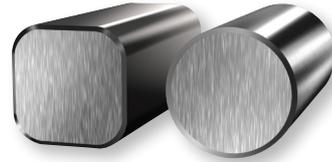

- Carbide tipped teeth
- Triple chip tooth geometry
- Negative Rake angle

BENEFITS

- Ideal for cutting hardened materials
- High resistance to abrasion
- Reduced cutting time - Higher productivity
- Precise cuts produces excellent finish

APPLICATIONS

- Case hardened steel
- Steel for shafts and linear guides
- Case hardened materials up to 60 HRC

CARBIDE

ADVANZ™ FS

Starrett® Advanz™ FS

FEATURES

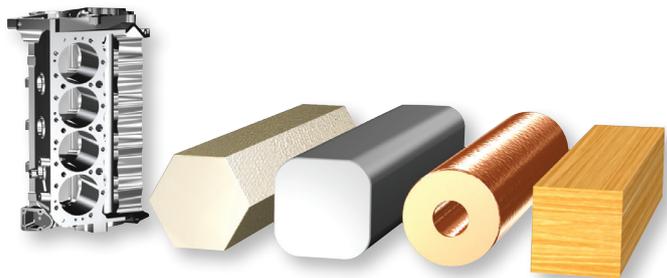

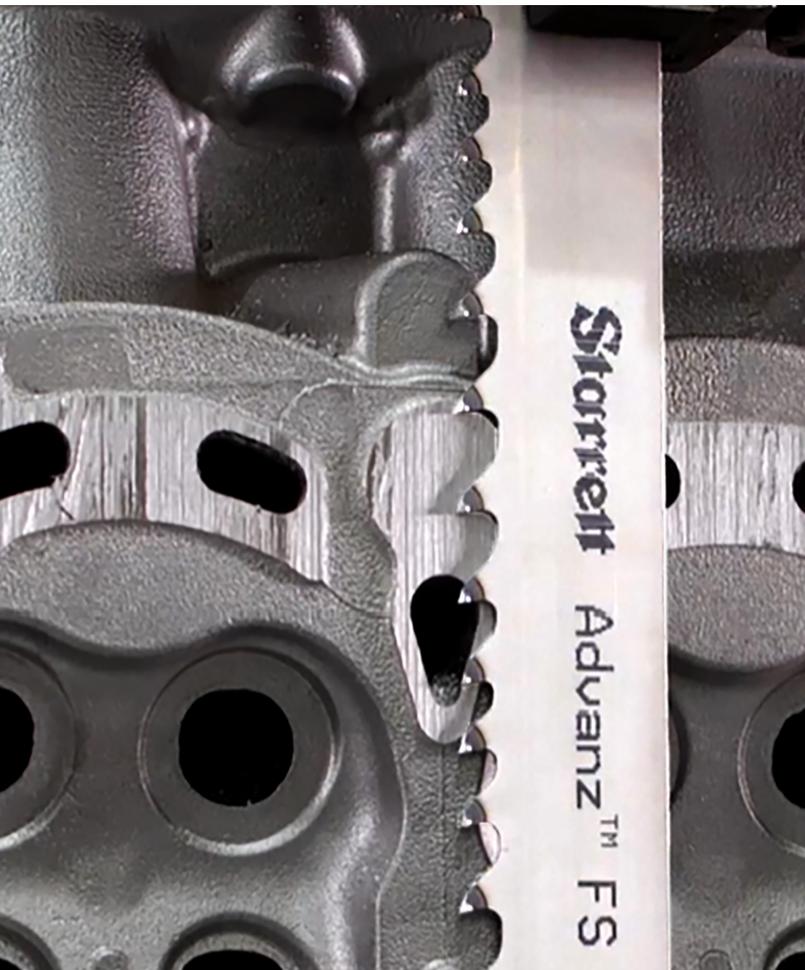

- Carbide tipped teeth
- Triple chip tooth geometry
- Positive Rake angle

BENEFITS

- Ideal for cutting abrasive materials
- Exceptional resistance to fatigue, abrasion and shocks
- Reduced cutting time-Higher productivity
- Precise cuts and excellent finishing

APPLICATIONS

- Abrasive non-ferrous metals
- Aluminum
- Cast materials and risers
- Composite materials
- Fiberglass
- Graphite
- Abrasive and hardwoods such as Tauari and others
- Robust vertical and horizontal machines

DIAMOND GRIT

ADVANZ™ DG

FEATURES

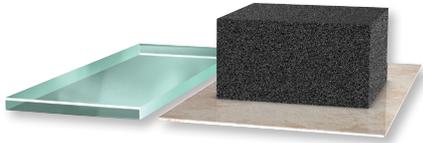

- Cutting edge coated with diamond grains
- Continuous cutting edge
- High strength body

BENEFITS

- Ideal for cutting abrasive materials that conventional blades cannot cut
- Precise cuts and excellent finishing
- Exceptional durability and fatigue resistance

APPLICATIONS

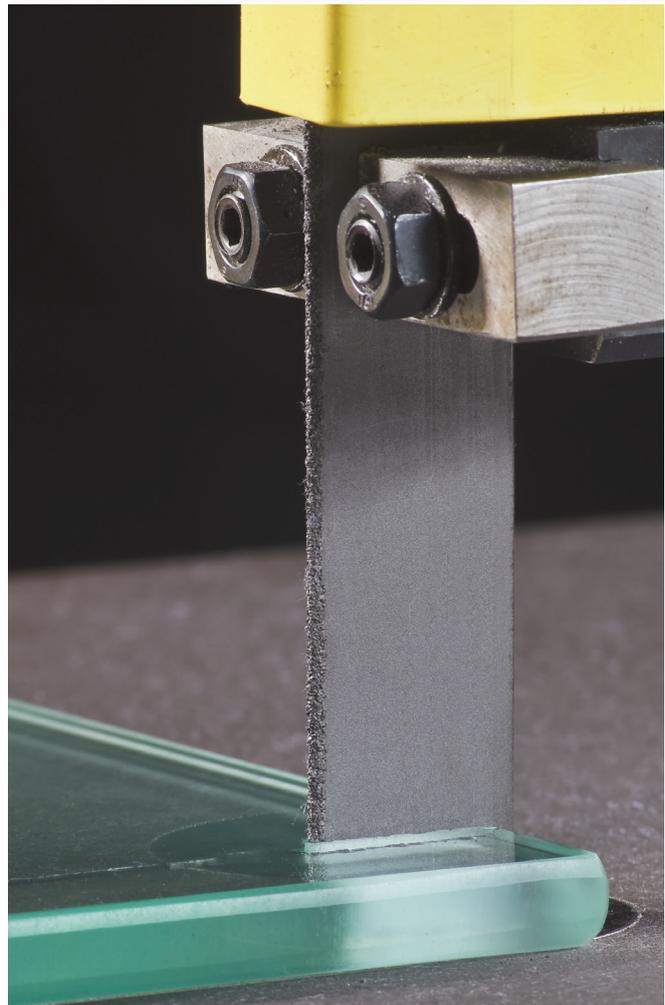

- Glass
- Glazed ceramic
- Silicon
- Graphite
- Fiberglass
- Stones
- Pyrex
- Ideal for machines that have high cutting speed

Starrett® Advanz™ DG

CARBON

CARBON

DURATEC™ SFB

Starrett® Duratec™ SFB

FEATURES

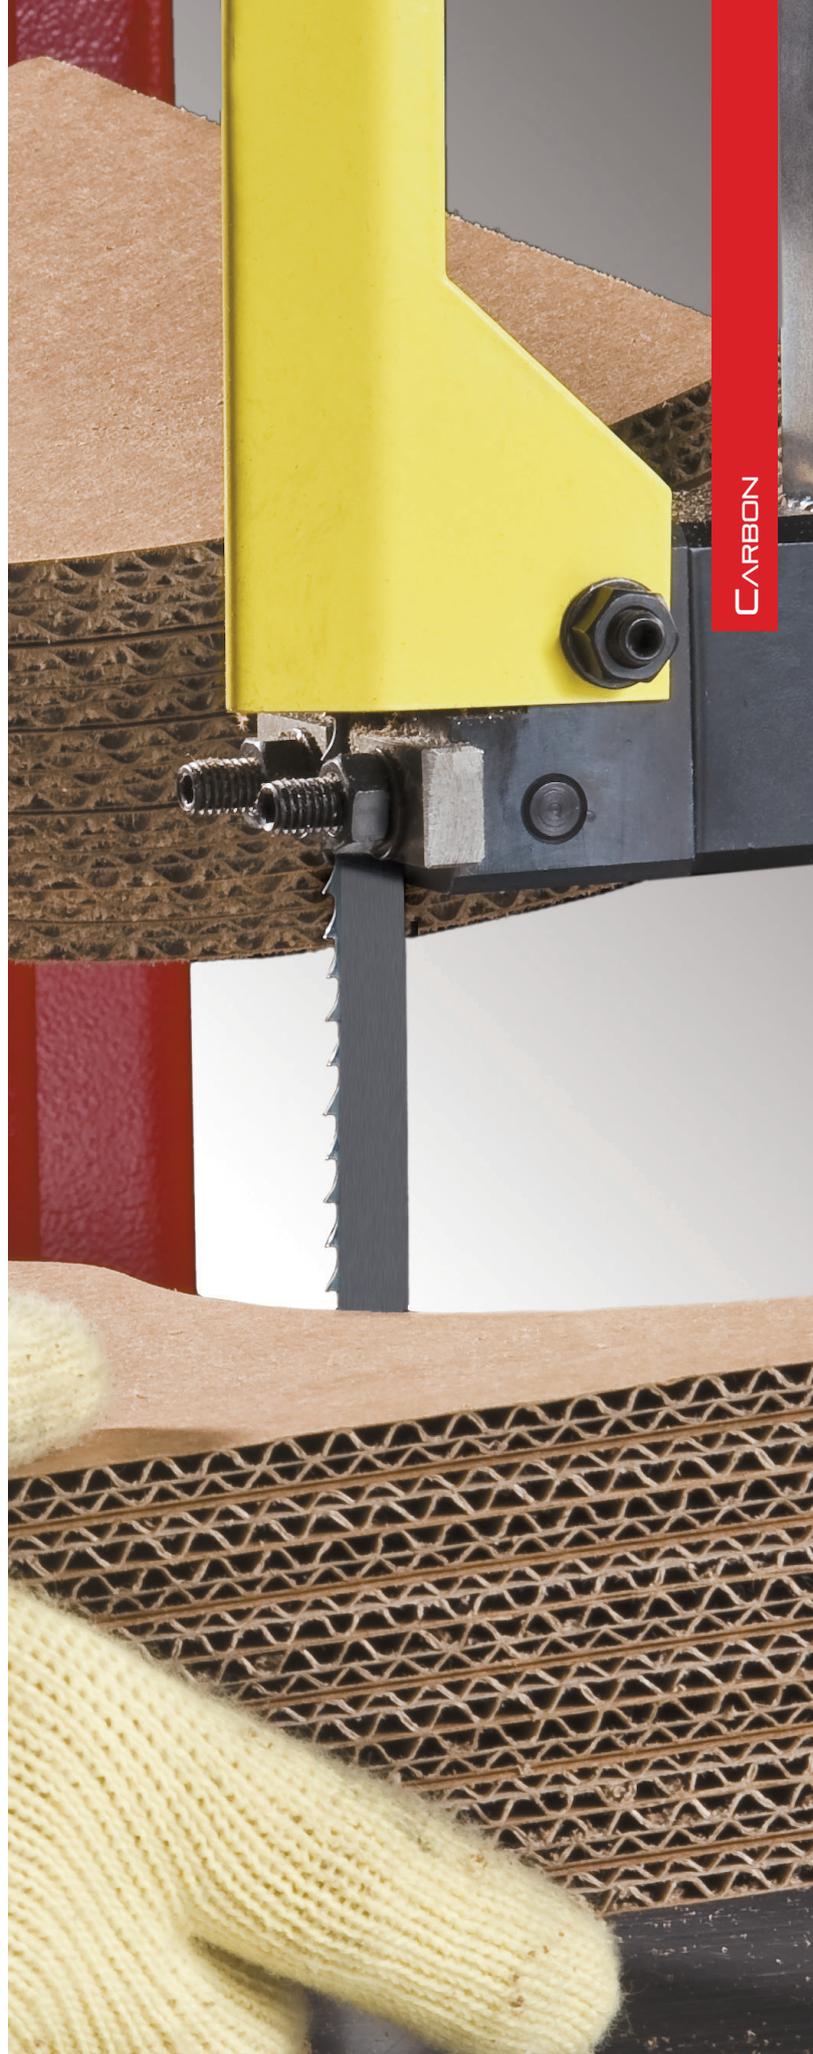

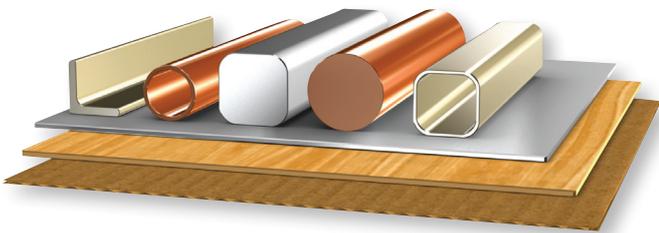

- Made from special high carbon steel
- Flexible back

BENEFITS

- Contour and straight cutting
- Economical
- Can be welded with "standard" welders

APPLICATIONS

- Easy-to-machine carbon steel
- Non-ferrous metals
- Composites and plastics
- Plywood and MDF
- Cardboard
- Ideal for light vertical and horizontal machines
- Mechanical workshops, toolroom, carpentry, etc.

 Special products on request.

FEATURES

- Made of high-carbon steel with high Silicon-content
- Flexible backer for excellent fatigue resistance
- Special set design for increased frictional heat
- Unique "air scoop" tooth geometry
- Fully hardened teeth and tempered back

BENEFITS

- Ideal for cutting materials that conventional blades cannot cut
- High resistance to wear and abrasion
- Teeth specifically designed to bring oxygen into the cut to burn up the material

APPLICATIONS

- Steel-belted radial tires
- Cuts thin, ferrous sections up to 5/8" (16mm)
- Weldments, sheet metal, unconventional shapes
- Vertical machines with speeds up to 15,000 SFPM

CARBON BAND KNIVES

FEATURES

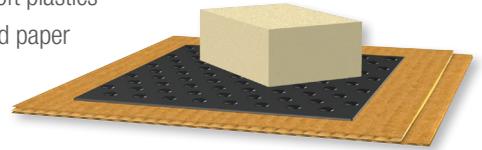

- Available with straight, scallop or wavy tooth cutting edges and a single or double edge bevel
- Made of high-carbon steel and stainless steel
- Razor edge

BENEFITS

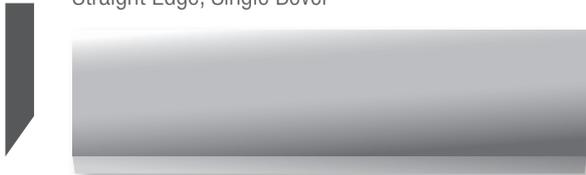

- Quick, smooth and precise cuts, with excellent finishing
- Without material waste

APPLICATIONS

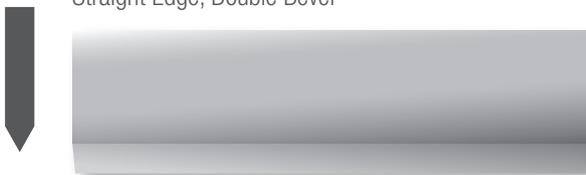

- Foam
- Rubber and soft plastics
- Cardboard and paper
- Cork

WOOD CUTTING

XPW TECHNOLOGY

EXTREME PERFORMANCE FOR WOOD

XPW TECHNOLOGY

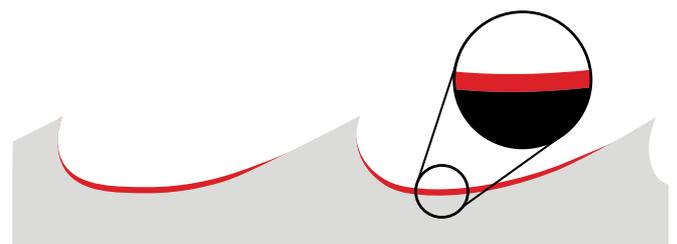

The technology and knowledge from our bi-metal range have been adapted and enhanced to meet the demands of wood applications. XPW Technology is available in both our bi-metal and high carbon blades and is designed for optimal precision, guaranteeing unparalleled cutting efficiency with minimal chips and enhanced quality in every cut.

NEW TOOTH PROFILE

Our new and exclusive tooth profile is designed for sawmill and re-saw applications, ensuring precision at high speeds. It is compatible with the most popular grinders on the market.

FEATURES & BENEFITS

- Superior cutting finish
- Enhanced durability for increased product lifespan
- High fatigue resistance ensures high-quality cuts and superior durability

XPW Technology includes a deeper gullet when compared to previous Woodpecker blades.

GRINDING WHEEL FOR REGRINDING

To complement the XPW technology, we offer a new range of grinding wheels.

WOOD CUTTING

WOODPECKER™ PREMIUM

CARBON STEEL

FEATURES

- Hardened spring-tempered steel back
- Positive angle precision set teeth
- Thin kerf available
- XPW technology on select materials

BENEFITS

- Available as thin as .020" (0.50mm) for contour cutting fine hardwoods, thicker blades are also available for tougher tasks, such as grade lumber re-saws and pallet dismantling work
- Longer life and faster cutting with less feed
- High production rates and increased yields
- Can be re-sharpened

APPLICATIONS

- Blades are available for all band saws
- Capable of cutting softwoods, hardwoods and exotic woods
- Excels in a variety of applications including cutting lumber, boards and panels
- XPW technology ideal for sawmill and re-saw applications

WOOD CUTTING

WOODPECKER™ PRO

BI-METAL

FEATURES

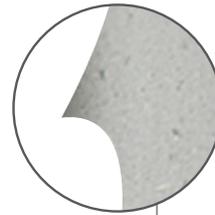

- Manufactured from high-speed steel M42 containing 8% cobalt
- Electron beam welded bi-metal construction
- Rockwell tooth hardness C67-69 ensures longer blade life
- XPW technology available on select materials

BENEFITS

- Wide range widths and thickness to cover fine contour cutting and tougher cutting applications like lumber re-saws and pallet dismantling work
- Increased blade lifespan with bi-metal construction and tooth geometry
- High fatigue resistance ensures long lasting durability
- Improved cutting performance producing precise cuts with minimal waste
- Can be resharpened

APPLICATIONS

- Blades are available for all band saws
- Highly effective on all types of softwoods, hardwoods and exotic woods
- XPW technology ideal for sawmill and re-saw applications

WOOD CUTTING

WOODPECKER™ CT

CARBIDE TIPPED

NEW
PRODUCT

AN IDEAL SOLUTION
FOR CUTTING HARD
AND ABRASIVE WOOD!

FEATURES

- Carbide-tipped teeth for enhanced strength
- Teeth precision-ground with triple sharpening for superior cutting
- Aggressively angled teeth for optimal cutting efficiency

BENEFITS

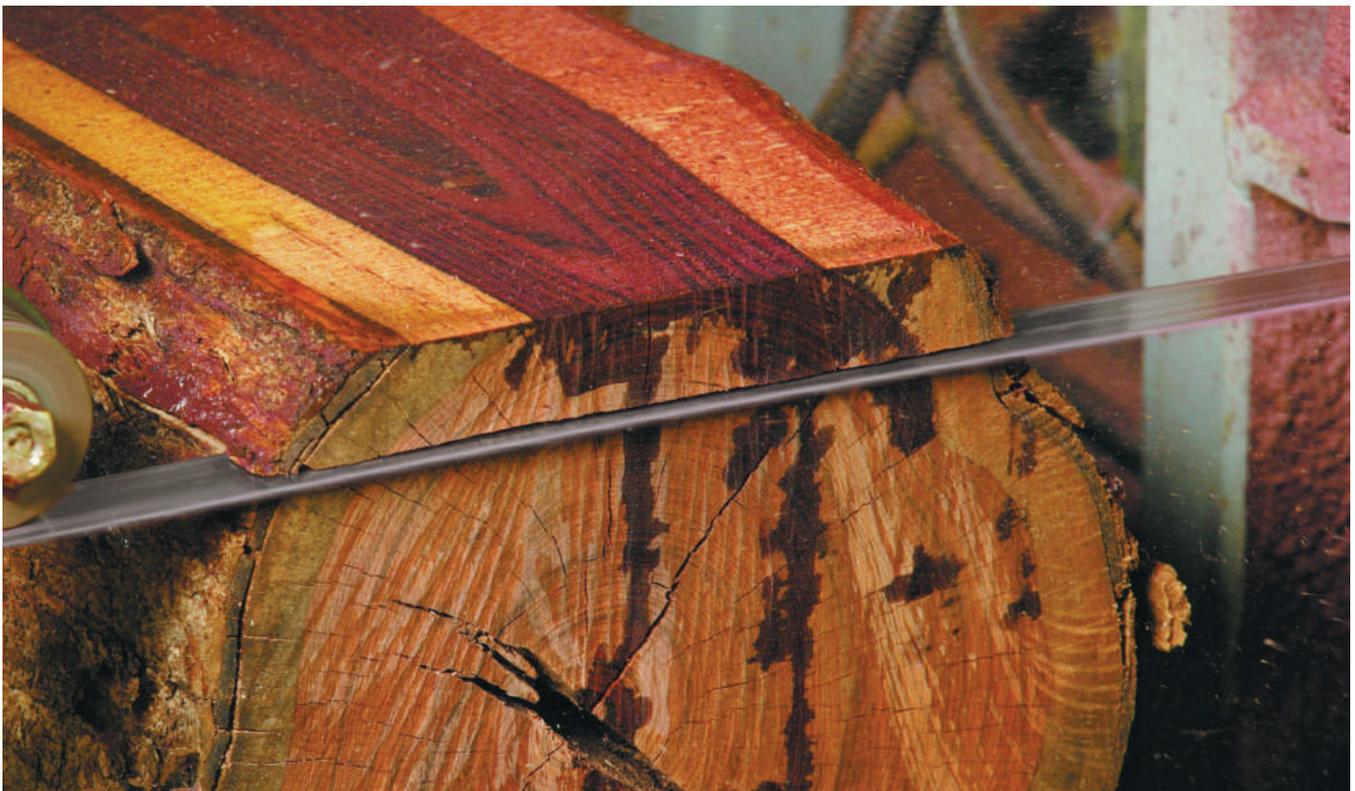

- High fatigue resistance for lasting durability
- Excellent cutting finish
- Contour cutting for versatile applications
- Reduces cutting time, improving productivity

APPLICATIONS

- Blades are available for all band saws
- Superior performance for cutting hard, abrasive and frozen wood especially in high-volume production cutting environments
- Ideal for use on railroad ties, hardwoods and exotic woods

FOOD PROCESSING

MEATKUTTER™ PREMIUM

MKP

FEATURES

- High carbon steel with a polished finish
- Precision ground, hardened teeth
- Engraved laser-etched identification
- USDA approved

BENEFITS

- Highly durable blades with stronger teeth
- Fast, smooth, and clean cuts
- Less kerf loss per cut and higher yield
- Guarantee of origin and traceability

APPLICATIONS

- Great general-purpose blade for fresh meat, frozen meat and prepared foods
- Suitable for cutting meat, bone-in or boneless
- Ideal for butcher shops, supermarkets, meatpacking, case ready facilities and secondary cutting operations

MEAT TYPES

- Fresh, frozen, bone-in and boneless
- Poultry
- Seafood and fish
- Beef, pork, lamb, goat and bison

MEATKUTTER™ STAINLESS MKS

FEATURES

- Stainless steel AISI 420
- Rust-proof
- Precision ground teeth
- Engraved laser-etched identification
- USDA approved

BENEFITS

- Highly resistant to rust to maintain the perfect condition of blades quality
- Fast, smooth and clean cuts
- Durable and corrosion resistant
- Guarantee of origin and traceability

APPLICATIONS

- Fresh or frozen meat with bone or boneless
- Suitable for butcher shops, supermarkets, meatpacking, case ready facilities and secondary cutting operations
- Best for seafood processing and other high corrosion environments
- Ideal for the medical and science industries

CARCASSKUTTER™ PREMIUM

CKP

FEATURES

- Polished high-carbon steel
- Precision ground, hardened, and annealed teeth
- 3 or 4 teeth per inch and excellent balance of width and thickness
- Engraved laser-etched identification
- USDA approved

BENEFITS

- Highly durable blades with stronger teeth
- Fast, aggressive, straight, accurate cuts with less kerf loss per cut
- Optimum blade flexibility for longer operation
- Guarantee of origin and traceability

APPLICATIONS

- Carcass splitting of cattle, pig, lamb and goat
- Designed for kill/harvest and further carcass cutting applications
- Ideal for abattoirs, slaughterhouses, meatpacking, processing plants and cold storage facilities

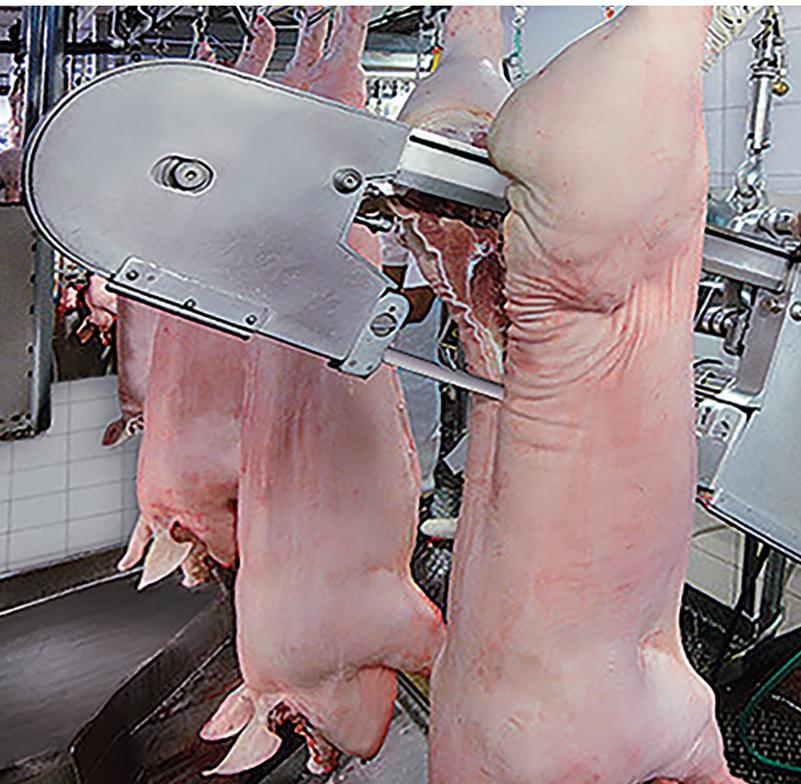

MEAT TYPES

- Animal carcass cuts
- Beef, pork, lamb, goat and bison

MEATKUTTER™ FROZEN

MKF

FEATURES

- High carbon steel with polished finish
- Precision ground, hardened teeth
- Variety of width, thickness, and teeth per inch (TPI)
- Engraved laser-etched identification
- USDA approved

BENEFITS

- Highly durable blades with stronger teeth
- Fast and precise cuts. Longer operation and increased yield
- Accurate, balanced, sharp and fast cutting action with less kerf loss per cut
- Guarantee of origin and traceability

APPLICATIONS

- Designed to cut frozen proteins as low as -4°F (-20°C)
- Frozen fish, frozen meat and fish blocks
- Suitable for butcher shops, meatpacking and case ready facilities
- Ideal for fish and seafood processors, supermarkets and cold storage facilities

MEAT TYPES

- Frozen fish and seafood
- Frozen poultry
- Frozen beef, pork, lamb and goat

MEATKUTTER™ FROZEN BI-METAL MKB

FEATURES

- Bi-metal high-speed steel band saw blade
- Hardened teeth and backing
- Exclusive positive rake angle
- Special tooth set

BENEFITS

- Greater durability compared to conventional blades
- Fast, clean cuts
- Accurate cuts with less food waste
- Easy cutting

APPLICATIONS

- Designed to cut frozen proteins as low as -76°F (-60°C)
- Large fish
- Suitable for meat packing, portioning, secondary cutting operations and cold storage facilities
- Ideal for fish and seafood processing

MEAT TYPES

- Large fish
- Frozen fish and seafood
- Frozen poultry
- Frozen beef, pork, lamb and goat

POWER HACKSAWS

POWER HACKSAWS

BI-METAL HSS-BS

CUTTING EDGE OF HIGH-SPEED STEEL

FEATURES

- Available in metric and inch
- Hardened and tempered high-speed steel teeth
- Tough alloy steel back resistant to shock and breakage

BENEFITS

- Alloy back resists fatigue under the most adverse conditions

APPLICATIONS

- Ideal for all general steel cutting
- Works well in a wide variety of applications, including interrupted cuts

CUTTING CHART FOR POWER HACKSAW BLADES-BS AND RS

Cross Section to be Cut	Material Thickness				Bow Speeds in Strokes per Minute **
	Up to 3/4" (20mm) Pitch*	From 3/4" to 1-1/2" (From 20mm to 40mm)	From 1-1/2" to 3-1/2" (From 40mm to 90mm)	Above 3-1/2" (Above 90mm)	
Low Carbon Steel	14-10	10-6	6-4	4-2-1/2	70-90
Medium Carbon Steel	14-10	10-6	6-4	4-2-1/2	60-80
High Carbon Steel	14-10	10-6	6-4	4-2-1/2	55-70
Carbon Low Alloy Steel	14-10	10-6	6-4	4-2-1/2	65-80
Carbon High Alloy Steel	14-10	10-6	6-4	4-2-1/2	45-60
Easy to machine steel	14-10	10-6	6-4	4-2-1/2	80-100
Tool Steel	14-10	10-6	6-4	4-2-1/2	55-70
Low-Alloy High-speed steel	14-10	10-6	6-4	4-2-1/2	50-60
High-Alloy High-speed steel	14-10	10-6	6-4	4-2-1/2	45-55
Cast Iron Class 20	14-10	10-6	6-4	4-2-1/2	70-80
Cast Iron Class 40	14-10	10-6	6-4	4-2-1/2	65-75
Cast Iron Class 60	14-10	10-6	6-4	4-2-1/2	40-55
Malleable Cast Iron	14-10	10-6	6-4	4-2-1/2	65-75
Austenitic Cast Iron	14-10	10-6	6-4	4-2-1/2	40-55
Inconel and Monel	14-10	10-6	6-4	4-2-1/2	40-55
Stainless Steels	14-10	10-6	6-4	4-2-1/2	50-60
Copper	14-10	10-6	6-4	4-2-1/2	95-140
Bronze	14-10	10-6	6-4	4-2-1/2	85-105
Brass	14-10	10-6	6-4	4-2-1/2	90-110
Aluminum	14-10	10-6	6-4	4-2-1/2	100-140

*The blade should be tensioned correctly.

**Since you have two options for each thickness range, use a finer pitch (more teeth per inch) for thinner sections and coarser pitches (fewer teeth per inch) for thick sections.

** For materials with width higher than 3", decrease at least 20% of cutting rates.

RECOMMENDATIONS AND RESOURCES

RECOMMENDATIONS

BLADE BREAK-IN

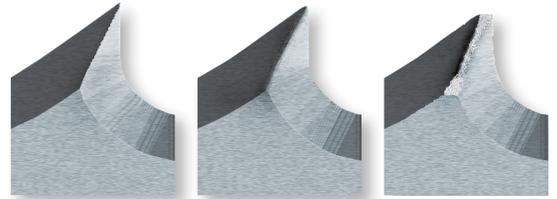

Using the right break-in procedures for a bi-metal blade ensures longer blade life, faster cuts for a longer period of time and consistent performance. Conversely, blade life can be significantly compromised if the proper break-in procedures are not followed.

Softer material such as carbon steel and aluminum:

- Run the normal surface feet per minute (SFPM).
- Adjust the feed pressure to 50% the normal cutting rate for 50-100 square inches (323-645 sq.cm).
- Increase to 100% cutting rate.
- Avoid vibration.

Harder materials such as nickel-based alloys like inconel, hardened steels, tool steels and stainless steels:

- Run the normal surface feet per minute (SFPM).
- Adjust the feed pressure to 75% of the normal cutting rate for 25-75 square inches (161-484 sq.cm).
- Gradually increase cutting rate to reach 100% after 50 square inches (323 sq.cm).
- Avoid vibration.

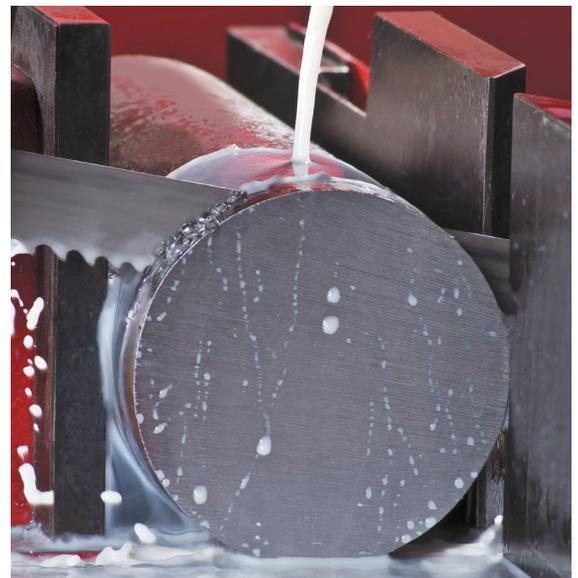

New blade with razor sharp teeth

Tooth correctly broken in

Tooth incorrectly broken in

Start to cut material at reduced cutting rate

After break-in when the blade has fully entered the work-piece, increase the feed rate over a series of cuts until the recommended cutting rate is achieved.

RECOMMENDATIONS

BAND SAW BLADE INSTALLATION GUIDELINES

Always follow the machine manufacturer's instruction and recommendations for blade changes and the safe operation for the band saw machine. Starrett nor its employees shall not be held responsible for the accuracy or completeness of these guidelines.

The general information contained in the guidelines is intended to assist in the proper installation of band saw blades.

Proper blade installation achieves more efficient blade performance.

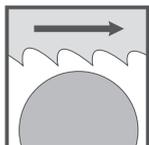

- Wear gloves when handling band saw blade

- Use eye protection, safety shoes, and hearing protection

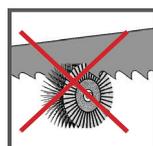

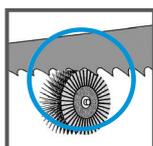

- Select appropriate blade for cutting application
- Unfold blade properly. Do not throw. Throwing the blade will result in tooth damage that will reduce saw blade performance
- Install blade with saw teeth pointing in proper direction

- Apply appropriate tension to the blade
- Be aware of pinch points and keep hands and clothing clear of rotating blade

- Adjust guide arms to appropriate positions to workpiece
- Adjust blade guides for proper blade support
- Adjust chip brush to fully engage saw blade teeth to ensure proper chip removal

- Check hydraulic fluid levels when applicable
- Ensure appropriate cutting fluid placement and mix ratios as applicable per machine, cutting fluid, and blade manufacturer's recommendations

FOLLOW THESE INSTRUCTIONS CAREFULLY

- Follow all the safety instructions shown in the band saw machine operator's manual and on the machine labels. Recognize and read safety and warning signs such as Danger, Warning and Caution
- Follow the saw blade installation instructions on the specific make and model of the band saw machine requiring a blade change

BASIC BLADE CHANGE GUIDELINES

- Remove any chips from saw guides and band wheels
- Position chip brush away from saw
- Relieve saw blade tension and remove blade

ACCESSORIES

POCKET LASER TACHOMETER KIT WITH CASE No. S7793Z

- Powerful tachometer with 32 functions for measurements with or without contact
- From 200.000 RPM (optical measurement) to 20.000 RPM
- Measurement with contact up to 20.000 RPM
- Measurement with contact 2.000 m/min.(linear speed)
- Different measurement units: RPM, cm, inches, feet, yards etc

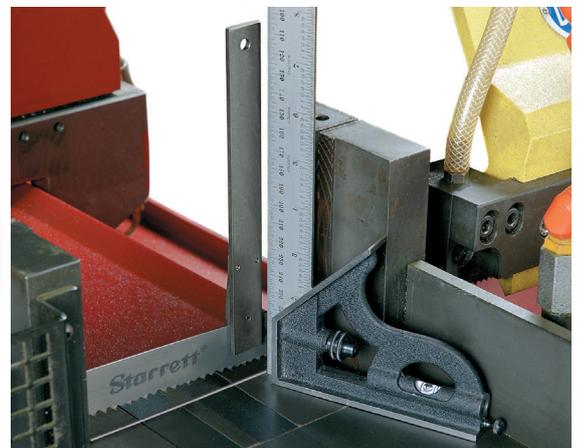

SAW TENSION GAGE FOR BAND SAW BLADES No. 682EMZ

- Check for proper tension in either English or metric
- Graduated in kg/cm² (0 to 4.000) and in pounds/in² (0 to 60.000)
- Supplied in a case with instructions

BAND SAW BLADE ALIGNMENT GAGE No. PT92925

This gage enables you to make sure your blade is running square to the cut.

BAND SAW BLADES CUTTING RATE CHART

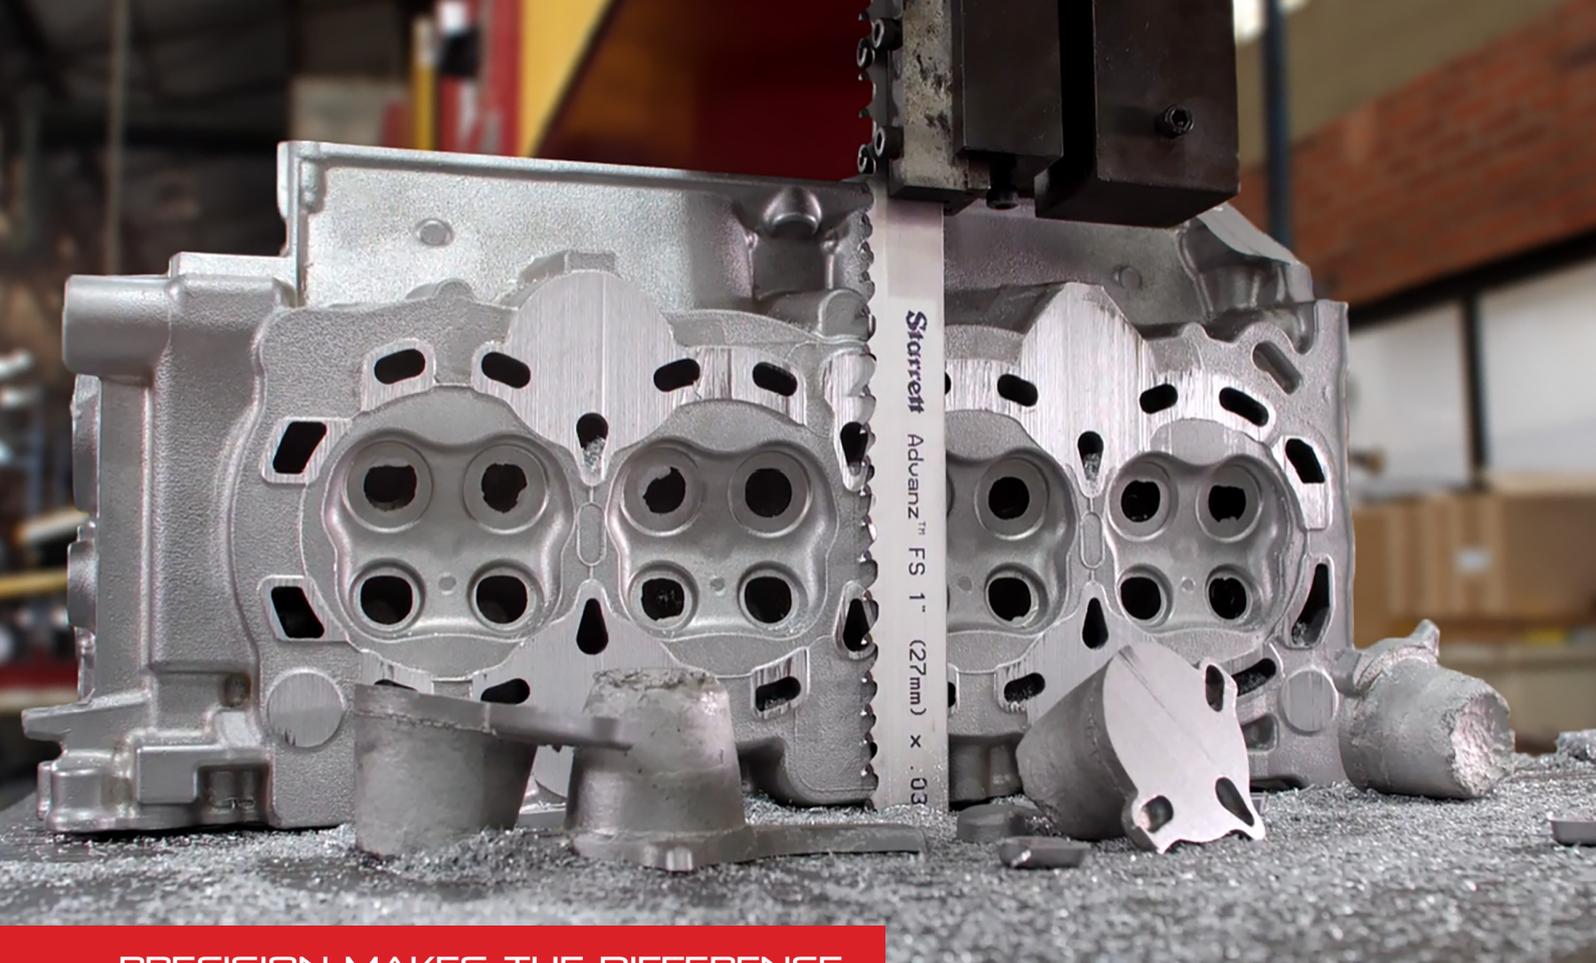

READING THE CHIPS					
Chip Formation	Chip Condition	Chip Color	Blade Speed	Blade Feed	Other
	Thin and Tightly Curled	Silver	Correct	Decrease	Refer to Machining Recommendations for Correct Tooth Pitch
	Powdered	Silver	Decrease	Increase	
	Thick and Short	Blue or Brown	Decrease	Decrease	Check Cutting Fluid
	Thin and Curly	Silver	Correct	Correct	

Recommended Tension for Starrett Band Saw Blades

Blade Width	English	Metric
Bi-Metal and Carbide Tip: 1-1/2" and Wider	30,000 - 40,000 PSI	2,100 - 2,800 Kg/cm ²
Bi-Metal and Carbide Tip: Thru 1-1/4" Wide	25,000 - 35,000 PSI	1,800 - 2,500 Kg/cm ²
Duratec™ SFB	15,000 - 20,000 PSI	1,000 - 2,500 Kg/cm ²

The above tension ranges are supplied as a guide for normal average cutting conditions. Insufficient blade tension can affect the cutting efficiency of the blade. Excessive tension may cause breakage of band saw blades.

As a general rule of thumb, the higher end of the tension range should be used when the guide arms are further apart and the lower end of the range should be used when the guide arms are closer together.

PRECISION MAKES THE DIFFERENCE

INNOVATIVE TECHNOLOGIES FOR OVER 145 YEARS

More than 5,000 products including precision tools, vision systems, force measurement systems, non-contact measurement systems, profile projectors, band saw blades, band saw machines, hand tools and power tools accessories.
