Black Diamond Equipment, Ltd. 2025  
MT2493\_H DYNAMIC ROPE INSTRUCTIONS

#### A WARNING [EN]

**For climbing and mountaineering only. Climbing and mountaineering are dangerous. Understand and accept the risks involved before participating. Minors and others not able to assume this responsibility must be under the direct control of an experienced adult or guardian.** Before using this product, read and understand all instructions and warnings that accompany it and familiarize yourself with its proper use, capabilities and limitations. Seek qualified instruction. Contact Black Diamond if you are uncertain about how to use this product. Do not modify this product in any way. Failure to read and follow these warnings can result in severe injury or death!

#### INSTRUCTIONS FOR USE

This document contains information for the correct use of the equipment depicted in the illustrations. Other possible misuse exists. Correct equipment use and the use of redundant systems will reduce some of the risk associated with climbing. If you lack experience, use this equipment under proper supervision. Dynamic Ropes are one part of the safety system that protects the user from a fall from height when climbing or mountaineering.

#### HOW TO USE YOUR ROPE

(See accompanying illustrations)

#### CARE AND MAINTENANCE

Climbing ropes must not come into contact with corrosive materials such as battery acid, battery fumes, solvents, chlorine bleach, antifreeze, isopropyl alcohol or gasoline. After contact with saltwater or salt air, always rinse with clean tap water and air dry.

#### CELSKAN, INSPECTION AND RETIREMENT

Climbing ropes do not last forever. Inspect your rope (and other gear) before and after each use, and retire it when it fails inspection or when it reaches its maximum life span. Use it within 10 years after the date of manufacture, even if unused.

See the accompanying illustrations. Retire your rope immediately if any of the illustrated conditions are found:

• Factors that may reduce the useful life of climbing ropes: Impact, both severe and mild, and exposure to heat, sunlight, solvents, fumes, battery acid or battery fumes.

• Damage and extreme conditions may shorten your rope's useful life, and could require retiring it during its first use.

• If you have doubts about the condition of your rope, or after a serious fall, retire it.

• Retired rope should be destroyed to prevent future use.

In the event that your rope needs to be disinfected, we recommend that you return it rather than clean it.

The rope length is measured from the date of manufacture, not the date of sale. Refer to the Markings section of these instructions in order to determine the date of manufacture of this equipment.

**WARNING:** Climbing ropes are known to swell in diameter and shrink in length up to 10% across their lifetime. We advise regular inspection of rope length per the maximum life span.

(See accompanying illustrations)

#### ADOPTING CLIMBING ROPES

We strongly discourage secondhand use. In order to trust your gear you need to know its history.

#### CHOOSING OTHER COMPONENTS

Other components must be CE certified. In Europe, choose other CE certified mountain-equipment that is compatible with this product.

#### MARKINGS (WHEN PRESENT)

• Black Diamond: Black Diamond's logo.

e.g. 9.2 mm: Diameter of the rope in millimeters.

e.g. 70 m: Length of the rope in meters.
