### Please Note:

- This Kuzco LED fixtures comes with pre-wired LED module(s).
- Unless instructed to do so, please do not touch any part of the LED module(s) as any unnecessary contact with the module could cause permanent damage.
- For dimming, an ELV (Electronic Low Voltage) or TRIAC or 0-10V type of dimmer is required.
- 120-277V input

1. Remove the fixture from its original packaging. Next, remove the mounting plate (1c) from the canopy (2a) by un-threading the decorative nuts (2b). Attach the mounting plate (1c) to the junction box (1a) using two set screws (1d). For additional support, add wood screws (1e) to the plastic anchors (1f) in the ceiling.
2. Before you mount the canopy to the mounting plate select the desired length you wish the pendant to hang. To set the fixture hanging height, simply push in the sleeve (2c) at the canopy where the wire comes out from. Push the wire up to shorten, or pull the wire down to lengthen. Release the sleeve (2c) and the wire will be held tightly in place.
3. Make proper electrical connections (**black to hot "L"**, **white to neutral "N"**, **ground to "GND"**) with wire nuts (1b) provided in hardware package. Connect 0-10V dimming wire, DIM+ to purple, DIM- to gray, with wire nuts provided.
4. Align the threaded studs (1g) with the holes on the surface of the canopy (2a). Next, push the canopy (2a) up towards the mounting plate (1c) and thread on the decorative nuts (2b) on to the threaded studs (1g). This will secure the canopy to the mounting plate.
5. You have now completed the installation of your fixture, enjoy.
