		Miro Decorator	DRD4-W	Good	1	Dims down to 1%
		Harmony	H703PTUTC	Best	1	Dims down to 6%
		Adorne Whisper	ADWH700MNTUW2	Best	1	Dims down to 1%
	Cooper	Adorne Touch	ADTH700MNTUM2	Best	1	Dims down to 1%
		Decorator	DAL06P-C2-K-L	Good	1	Dims down to 6%, flicker at 6%
		Skye	SAL06P-W-K-L	Good	1	Dims down to 5%, flicker at 7%

*Maximum Tested (Lamps per Dimmer) - Additional lamps may work with your dimmer system. For maximum capacity please consult dimmer manufacturers.
 †May experience "pop-on"; lights cannot be turned on immediately to their minimum level. The slider needs to be raised above the minimum light level for the lights to first turn on if they were initially off. Then, the slider can be lowered to get to a lower light level; the dimmer cannot be turned on to just the minimum level.

Overall Rating	
Not Compatible	One or more of the following observed: Major flickering at various points, significant audible noise, no dimming range, does not turn off.
Bad	One or more of the following observed: Some flickering observed at various points, audible noise may be present, dimming not smooth.
Good	One or more of the following observed: Minor flickering at some point may exist. Dead travel may exist, which means there may be periods of time when the slider (or other form of control button) is moved without affecting the light level. These periods of dead travel are minor and most of the time not visible. Minor audible noise.
Best	Most of the following observed: No flickering; minimal audible noise (typically less than 25 dba); wide dimming range - can dim down to 20% or less of light output.
High End (H.E.) Dead Travel	Determines how much, if any, dead travel exists at the top and bottom of the dimmer's range. Dead travel is when the slider can be moved without affecting the light level.
Low End (L.E.) Dead Travel
