			Miro Decorator	DRD4-W	Not Compatible	4	6	Not compatible <4
			Harmony	H703PTUTC	Not Compatible	5	6	Not compatible <5
			Adorne Whisper	ADWR700MMTUW2	Good	1	6	80% at MAX <5. dims completely
Universal			Adorne Whisper Adorne Touch		Good	1		80% at MAX, dims completely
	Cooper			ADTH700MMTUM2			6	
		_	Decorator	DAL06P-C2-K-L	Not Compatible	2	6	Not compatible with 1, dims completely
			Skye	SAL06P-W-K-L	I	l 1	6	1

*Maximum Tested (Lamps per Dimmer) - Additional lamps may work with your dimmer system. For maximum capacity please consult dimmer manufacturer.
†May experience "pop-on", lights cannot be turned on immediately to their minimum level. The slider needs to be raised above the minimum light level for the lights to first turn on if they were initially off. Then, the slider can be lowered to get to a lower light level; the dimmer cannot be turned on to just the minimum level.

Overall Rating	Description				
Not Compatible	One or more of the following observed: Major flickering at various points, significant audible noise, no dimming range, does not turn off.				
Bad	One or more of the following observed: Some flickering observed at various points, audible noise may be present, dimming not smooth.				
Good	One or more of the following observed: Minor flickering at some point may exist. Dead travel may exist, which means there may be periods of time when the slider (or other form of control button) is moved without affecting the light level. These periods of dead travel are minor and most of the time not visible. Minor audible noise.				
Best	Most of the following observed: No flickering, minimal audible noise (typically less than 25 dBa), wide dimming range - can dim down to 20% or less of light output.				
High End (HE) Dead Travel Low End (LE) Dead Travel	Determines how much, if any, dead travel exists at the top and bottom of the dimmer's range. Dead travel is when the slider can be moved without affecting the light level.
